2. SAFETY INFORMATION

Always prioritize safety when operating the tricycle. Failure to follow these safety guidelines may result in injury.

- **Adult Supervision:** Always ensure an adult supervises children while riding the tricycle.
- **Protective Gear:** Encourage your child to wear a helmet and other protective gear (knee and elbow pads) when riding.
- **Riding Environment:** Use the tricycle on flat, paved surfaces away from traffic, steep inclines, stairs, and swimming pools. Avoid riding on uneven terrain or near hazards.
- **Weight Limit:** Do not exceed the recommended weight limit for the tricycle.
- **Pre-Ride Check:** Before each use, check that all bolts and nuts are securely tightened, tires are properly inflated, and the steering and braking (if applicable) mechanisms are functioning correctly.
- **Footwear:** Ensure the child wears closed-toe shoes while riding.

3. ASSEMBLY INSTRUCTIONS

Assembly is required for the Schwinn Roadster Tricycle. Please follow these steps carefully. It is recommended that two adults perform the assembly.

1. **Unpack Components:** Carefully remove all parts from the packaging. Verify that all components listed in the parts diagram (not included in this manual, refer to original packaging) are present.
2. **Attach Front Fork and Handlebars:** Insert the front fork into the main frame. Secure the handlebars into the fork stem, ensuring they are aligned with the front wheel. Tighten all bolts firmly.
3. **Install Front Wheel:** Attach the front wheel to the fork, ensuring the axle nuts are securely fastened.
4. **Assemble Rear Axle and Wheels:** Slide the rear axle through the frame. Attach the rear wheels and fenders to the axle, securing them with the provided hardware.
5. **Mount Wooden Deck:** Position the wooden deck onto the rear frame and secure it with the designated screws. Ensure the Schwinn logo is facing upwards.
6. **Attach Seat:** Place the sculpted seat onto the frame. Adjust the seat position for the rider's comfort and reach to the pedals. Secure the seat using the adjustment knob located underneath.
7. **Install Pedals:** Thread the pedals into the crank arms. Note that pedals are typically marked 'L' for left and 'R' for right. Tighten securely.
8. **Add Accessories:** Attach the bell to the handlebar and insert the tassels into the handlebar grips.
9. **Final Inspection:** Double-check all connections, bolts, and nuts to ensure they are tight and secure before the first use.

- **Lubrication:** Periodically apply a small amount of bicycle-specific lubricant to the pedal axles and steering column to ensure smooth operation.
- **Tire Pressure:** Check tire pressure regularly. Maintain the recommended pressure as indicated on the tire sidewall.
- **Fastener Check:** Regularly inspect all nuts, bolts, and screws for tightness. Tighten any loose fasteners to prevent parts from detaching during use.
- **Storage:** Store the tricycle in a dry, covered area to protect it from weather elements, which can cause rust or material degradation.

6. TROUBLESHOOTING

Here are some common issues and their solutions:
