DELTA FAUCET RP34355

DELTA FAUCET RP34355 Shower Head Instruction Manual

Model: RP34355 | Brand: DELTA FAUCET

1. Introduction

The DELTA FAUCET RP34355 shower head is designed to enhance your bathing experience with its advanced features and durable construction. This product offers multiple spray settings, including a powerful full body spray, invigorating massaging jets, and a soft drenching spray, catering to various preferences. Its Touch-Clean spray holes ensure effortless maintenance, preventing mineral buildup. This manual provides essential information for proper installation, operation, and care to ensure optimal performance and longevity of your shower head.

2. Setup and Installation

Installing the DELTA FAUCET RP34355 shower head is a straightforward process that typically requires no special tools. Follow these steps for a secure and leak-free installation:

1. **Preparation:** Ensure the water supply to your shower is turned off. Remove your old shower head by unscrewing it counter-clockwise. Clean any old thread sealant or debris from the shower arm threads.
2. **Apply Thread Seal Tape:** Wrap 2-3 layers of PTFE (Teflon) thread seal tape clockwise around the threads of the shower arm. This helps create a watertight seal and prevents leaks.
3. **Attach New Shower Head:** Screw the DELTA FAUCET RP34355 shower head onto the shower arm by hand, turning it clockwise until it is finger-tight.

4. **Final Tightening:** Use an adjustable wrench to gently tighten the shower head an additional 1/4 to 1/2 turn past finger-tight. Avoid over-tightening, as this can damage the threads or the shower head.
5. **Test for Leaks:** Turn on the water supply and check for any leaks around the connection point. If leaks occur, tighten slightly more or reapply thread seal tape.

Figure 2: Close-up view of the shower head connection point, illustrating the ease of installation.

3. Operating Instructions

The DELTA FAUCET RP34355 shower head offers three distinct spray settings to customize your showering experience. The shower head is designed to swivel easily, allowing you to direct the water flow as needed.

- **Full Body Spray:** Provides a steady, intensely powerful stream of water, ideal for a thorough rinse and invigorating shower.
- **Massaging Spray:** Features focused, invigorating jets designed to relieve sore and tired muscles.
- **Soft Drenching Spray:** Delivers a gentle, wide coverage spray for a relaxing and soothing experience.

To switch between spray settings, rotate the outer ring of the shower head. The internal mechanism will click into place for each setting. Adjust the shower head's angle by gently tilting it on its ball joint.

4. Maintenance

Maintaining your DELTA FAUCET RP34355 shower head is simple, thanks to its innovative Touch-Clean spray holes. Regular cleaning will ensure consistent water flow and prolong the life of your product.

- **Cleaning Spray Holes:** To remove calcium and lime buildup, simply wipe the rubber spray holes with your finger or a soft cloth. This dislodges mineral deposits without the need for harsh chemical cleaners or soaking.
- **General Cleaning:** For the exterior finish, use a soft, damp cloth and mild soap. Avoid abrasive cleaners, scouring pads, or chemicals that could damage the finish.
- **Regular Inspection:** Periodically check the connection for any signs of wear or leaks. Address any issues promptly to prevent further damage.

Figure 4: The shower head's design facilitates easy cleaning of spray holes, as shown with water droplets.

5. Troubleshooting

If you encounter any issues with your DELTA FAUCET RP34355 shower head, refer to the common troubleshooting tips below:

- **Reduced Water Flow:** If water flow decreases, first check the spray holes for mineral buildup and clean them using the Touch-Clean feature. Ensure the main water supply valve is fully open.
- **Leaking at Connection:** If water leaks from where the shower head connects to the shower arm, ensure the connection is tight. You may need to reapply PTFE thread seal tape and tighten the connection slightly more with a wrench, being careful not to overtighten.
- **Erratic Spray Pattern:** If individual sprayers appear to be misdirected, gently push or adjust the specific rubber sprayers with your finger. These are designed to be flexible for cleaning and can sometimes shift.
- **No Spray from Certain Holes:** This is almost always due to mineral buildup. Use the Touch-Clean feature to dislodge any blockages from the affected spray holes.

For persistent issues not resolved by these steps, please contact Delta Faucet customer support.

6. Specifications

Feature	Detail
Brand	DELTA FAUCET
Model Number	RP34355

Feature	Detail
Color	Chrome
Material	Brass
Finish Type	Chrome
Style	Universal Showering Components
Shape	Round
Installation Type	Wall Mounted
Number of Settings	3
Flow Rate	2.5 Gallons Per Minute
Product Dimensions	5.7"L x 5.7"W
Item Weight	1 pounds

7. Warranty Information

The DELTA FAUCET RP34355 shower head is backed by Delta Faucet's Lifetime Limited Warranty. This warranty provides peace of mind, ensuring the product is free from defects in material and workmanship for as long as the original consumer purchaser owns the home in which the faucet is first installed.
