4. MAINTENANCE AND CARE

Proper care ensures the longevity and hygienic use of your BergHOFF Orion set.

- **Cleaning:** All utensils are easy to clean. Hand washing with warm soapy water is recommended to preserve the polished surface and prevent rust, especially for the tin opener. Rinse thoroughly and dry immediately after washing.
- **Stand Care:** Wipe the synthetic fiber stand with a damp cloth to remove dust or spills. Do not immerse the stand in water.
- **Storage:** Always store the tools in their designated slots on the stand to keep them organized and protected.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners, steel wool, or harsh chemicals, as these can damage the polished finish.

5. TROUBLESHOOTING

If you encounter issues with your BergHOFF Orion set, consider the following common solutions:

- **Tin Opener Not Cutting Smoothly:**
 - Ensure the cutting wheel is properly aligned with the can's rim.
 - Check for any debris or food particles obstructing the gears. Clean thoroughly.
 - If the cutting wheel appears dull or damaged, contact customer support for assistance.
- **Stand Instability:**
 - Ensure the stand is placed on a completely flat and stable surface.
 - Verify that the base and upper tool holder are securely assembled.
- **Tools Sticking/Stiff:**
 - After washing, ensure tools are completely dry before storage to prevent mineral buildup or rust.
 - For moving parts (e.g., corkscrew mechanism), a small amount of food-grade mineral oil can be applied if stiffness persists.
