HOT SHOT HG-2040W

Hot Shot MaxAttrax Ant Bait User Manual

Model: HG-2040W

1. PRODUCT OVERVIEW

Hot Shot MaxAttrax Ant Bait is designed to provide effective relief from ant problems by targeting the queen and destroying the colony. These child-resistant bait stations are suitable for both indoor and outdoor use, offering long-lasting control.

Figure 1: Hot Shot MaxAttrax Ant Bait product packaging. This package contains four child-resistant bait stations designed to kill the queen and colony, with effects starting in hours and lasting up to 6 months indoors.

The bait stations are formulated to attract ants, which then carry the bait back to the colony, effectively eliminating the source of the infestation. This product is intended for use in and around homes where ants are a problem.

KILLS

Ants

KILLS SUGAR- & GREASE-FEEDING ANTS

Figure 2: The product is designed to kill ants, including sugar- and grease-feeding ants.

KILLS THE QUEEN & COLONY

Figure 3: Hot Shot MaxAttrax Ant Bait is formulated to eliminate the ant queen and the entire colony, providing comprehensive control.

2. SETUP AND PLACEMENT

Before using, read the entire product label for complete directions and precautions. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

2.1. Indoor Use

1. Open the pouch and carefully break the bait stations apart from each other.
2. Place one bait station along each ant trail or in out-of-the-way places near walls, in cabinets, and under sinks and refrigerators.
3. For heavily infested areas, two or more bait stations may be required for effective control.

PLACE WHERE ANTS HAVE BEEN SEEN

Place on flat surface.

Figure 4: Place bait stations on a flat surface where ants have been seen, such as inside cabinets.

2.2. Outdoor Use

1. Open the pouch and carefully break the bait stations apart before using.
2. Place one bait station along each ant trail around the outside of homes.
3. Place stations in areas inaccessible to children, pets, and other non-target animals.
4. Larger homes or homes with heavy infestations may require two or more bait stations to achieve control.

FOR INDOOR & OUTDOOR USE

Figure 5: The ant bait is suitable for both indoor and outdoor use, providing versatile pest control.

3. OPERATING INSTRUCTIONS

Hot Shot MaxAttrax Ant Bait starts killing ants in hours. The active ingredient, Indoxacarb (0.05%), is carried by foraging ants back to the colony, effectively eliminating the queen and the entire colony.

**STARTS KILLING
IN HOURS**

Figure 6: The bait stations begin to work within hours of placement.

4. MAINTENANCE

For continued indoor control, replace baits every six months or sooner if the infestation is heavy or the bait stations are empty.

For continued outdoor control, replace baits every three months or sooner if the infestation is heavy or the bait stations are empty.

**WORKS UP TO
6 MONTHS INDOORS**

Figure 7: The bait stations provide long-lasting control, working up to 6 months indoors.

5. TROUBLESHOOTING

If ants are still present after several days, consider placing additional bait stations in other areas where ant activity is observed. Ensure bait stations are placed directly along ant trails or in out-of-the-way places where ants are frequently seen.

If the infestation is particularly heavy, it may take longer to see complete elimination. Continue to monitor ant activity and replace baits as needed according to the maintenance schedule.

6. SPECIFICATIONS

Feature	Detail
Product Name	Hot Shot MaxAttrax Ant Bait
Model Number	HG-2040W
Active Ingredient	Indoxacarb (0.05%)
Other Ingredients	99.95%
