1. Locate the battery compartment cover on the back of the alarm clock.

2. Slide or lift the cover to open the compartment.

3. Insert two new AAA batteries, ensuring the positive (+) and negative (-) terminals are aligned correctly according to the diagrams inside the compartment.

4. Replace the battery compartment cover securely.

Note: Always use fresh batteries and replace both batteries at the same time. Do not mix old and new batteries or different types of batteries.

3. OPERATION

3.1. Setting the Time

To set the current time:

1. Locate the **Time Setting Knob** on the back of the alarm clock.

2. Rotate the knob in either direction until the hour and minute hands display the correct current time.

1. Locate the **Alarm Setting Knob** on the back of the alarm clock.

2. Rotate the knob until the alarm hand points to your desired wake-up time.

3. Locate the **Alarm ON/OFF Switch** (usually a small slide switch) on the side or back of the clock. Slide it to the 'ON' position to activate the alarm.

When the alarm time is reached, the clock will emit a loud alarm sound. The alarm sound is designed to be effective for heavy sleepers.

3.3. Snooze Function

To use the snooze function:

1. When the alarm sounds, press the large **Snooze/Light Button** located on the top of the alarm clock.

2. The alarm will temporarily stop and will sound again after a few minutes (typically 5-10 minutes, depending on the model).

3. To fully turn off the alarm, slide the **Alarm ON/OFF Switch** to the 'OFF' position.

4. MAINTENANCE

4.1. Cleaning

To clean your alarm clock:

- Wipe the clock's exterior with a soft, dry cloth.
