Caller ID and Phonebook

- **Talking Caller ID:** The system announces the caller's name or number between rings. Ensure your service provider offers Caller ID service.
- **Phonebook:** Store up to 50 names and numbers in the shared phonebook. Access and manage entries through the handset menu. All handsets can access the shared phonebook.

Additional Features

- **Intercom:** Use the intercom feature to communicate between handsets. Each unit is numbered, allowing direct calls from one handset to another.
- **Night Mode:** Program specific handsets not to ring during designated periods (e.g., at night) while other handsets continue to ring. This feature can be set via the handset menu.
- **Talking Alarm Clock:** Set an alarm on the handset, which will announce the time when it activates.
- **Talking Battery Alert:** The system provides an audible alert, such as "please charge phone," when a handset's battery level is low.

MAINTENANCE

- **Cleaning:** Wipe the units with a soft, dry cloth. Avoid using liquid or aerosol cleaners, as they may damage the finish or internal components.
- **Battery Care:** To maintain optimal battery life, ensure handsets are placed on their charging cradles when not in use. If the phone will be unused for an extended period, remove the batteries.
- **Environmental Conditions:** Avoid exposing the phone system to excessive moisture, dust, or extreme temperatures.

TROUBLESHOOTING

If you encounter issues with your phone system, refer to the following common solutions:

Problem	Solution
No dial tone	Ensure the telephone line cord is securely connected to both the base unit and the wall jack. Check if the base unit's AC adapter is properly plugged in.
Poor reception or static	Move closer to the base unit. Avoid placing the base unit near other electronic devices (e.g., microwave ovens, Wi-Fi routers) that may cause interference. DECT 6.0 technology minimizes interference with other wireless devices.
Handset not charging	Ensure the handset is correctly seated in the charging cradle. Verify that the cradle's AC adapter is plugged into a working electrical outlet. Clean the charging contacts on both the handset and cradle.

Problem	Solution
Handset displays "Unregistered"	Refer to the detailed user manual for specific handset registration steps. This usually involves accessing a menu on the base unit and the handset simultaneously.
Answering machine not recording	Check if the answering machine is turned ON. Ensure there is sufficient memory available.
