Key Features:

- **1-Cup Capacity:** Designed for brewing a single serving.
- **Cone Design:** Accommodates standard cone-shaped coffee filters.
- **Durable Plastic:** Constructed from sturdy, BPA-free plastic.
- **Mug Compatibility:** Base fits securely on most coffee mugs.

3. Setup

Before using your Melitta Pour-Over Coffee Brewer for the first time, follow these steps:

1. **Unpack:** Carefully remove the brewer from its packaging.
2. **Wash:** Wash the pour-over cone thoroughly with warm, soapy water. Rinse completely and dry.
3. **Gather Supplies:** Ensure you have cone-shaped coffee filters (e.g., Melitta #2 or #4 cone filters),

your preferred ground coffee, and hot water (just off the boil, ideally between 195-205°F or 90-96°C).

4. Operating Instructions

Follow these steps to brew a single cup of coffee using your Melitta Pour-Over Coffee Brewer:

1. **Place Brewer on Mug:** Position the pour-over cone securely on top of your coffee mug. Ensure it is stable.
2. **Insert Filter:** Place a cone-shaped paper filter into the brewer. For best results, lightly rinse the filter with hot water to remove any paper taste and pre-heat the brewer and mug. Discard the rinse water.
3. **Add Coffee Grounds:** Add your desired amount of medium-fine ground coffee into the filter. A common ratio is 1-2 tablespoons of coffee per 6 ounces (180ml) of water, adjusted to personal preference.
4. **Bloom (Optional but Recommended):** Slowly pour a small amount of hot water (just enough to saturate the grounds) over the coffee. Wait for 30 seconds. This allows the coffee to 'bloom' and release gases, leading to better flavor extraction.
5. **Pour Water:** Continue pouring hot water slowly and steadily over the coffee grounds in a circular motion, starting from the center and moving outwards, then back to the center. Avoid pouring directly onto the filter paper. Maintain a consistent water level over the grounds.
6. **Brew:** Allow the coffee to drip through the filter into your mug. The brewing process typically takes 2-4 minutes. Adjust pouring speed to achieve desired brew time and strength.
7. **Remove Brewer:** Once all the water has passed through, carefully remove the pour-over cone from your mug.
8. **Enjoy:** Your fresh cup of pour-over coffee is ready to be enjoyed.

5. Maintenance and Cleaning

Regular cleaning will ensure the longevity and optimal performance of your Melitta Pour-Over Coffee Brewer.

- **After Each Use:**
    a. Carefully remove the used coffee filter with grounds and discard.
    b. Rinse the pour-over cone thoroughly under warm running water.
    c. For a more thorough clean, wash with warm, soapy water and a soft sponge.
    d. Rinse completely to remove all soap residue and allow to air dry.
- **Dishwasher Safe:** The Melitta Pour-Over Coffee Brewer is top-rack dishwasher safe.
- **Avoid Abrasives:** Do not use abrasive cleaners or scouring pads, as these can scratch the plastic surface.

6. Troubleshooting

If you encounter issues with your pour-over brewer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Coffee tastes weak or watery.	Too little coffee; water too cool; coffee ground too coarse; water poured too quickly.	Increase coffee amount; use hotter water (195-205°F); use finer grind; pour water more slowly.
Coffee tastes bitter or over-extracted.	Coffee ground too fine; water too hot; water poured too slowly (over-extraction).	Use coarser grind; use slightly cooler water; pour water slightly faster to reduce brew time.

Problem	Possible Cause	Solution
Water drains too slowly.	Coffee ground too fine; filter clogged.	Use coarser grind; ensure filter is properly seated and not collapsing.
Water drains too quickly.	Coffee ground too coarse; insufficient coffee.	Use finer grind; increase coffee amount.
