## Zenna Home 648SS

# Zenna Home 648SS Adjustable Permanent Wall-Mounted Shower Rod User Manual

Model: 648SS

## INTRODUCTION

Thank you for choosing the Zenna Home Adjustable Permanent Wall-Mounted Shower Rod. This manual provides essential information for the safe and proper installation, operation, and maintenance of your new shower rod.

Please read these instructions carefully before beginning installation and retain them for future reference.

This sturdy steel shower rod features an adjustable two-piece design, expanding to fit standard shower enclosures from 44 to 72 inches. Its permanent-mount design ensures stability, and the attractive chrome finish resists rust, complementing various bathroom decors.

## SAFETY INFORMATION

- Always ensure the mounting surface is structurally sound and capable of supporting the rod and any attached shower curtains/liners.
- Use appropriate tools and safety gear during installation, including eye protection.
- Do not overtighten screws, as this may damage the mounting surface or the product.
- Keep small parts and hardware out of reach of children.
- Verify that the rod is securely fastened before hanging shower curtains or applying weight.

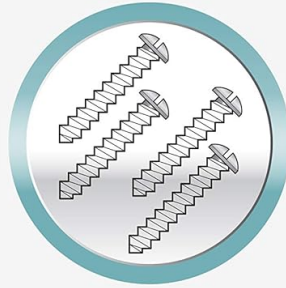

## PACKAGE CONTENTS

Verify that all components are present before beginning installation:

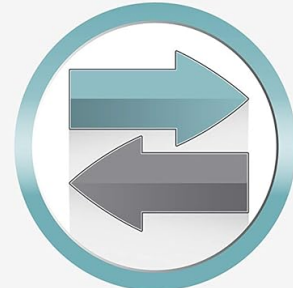

- Adjustable Shower Rod (2 sections)
- Mounting Plates (2)
- Decorative Plastic End Caps (2)
- Mounting Hardware (screws and wall anchors)

Easy  
Assembly

Hardware  
Included

Adjustable

## SETUP AND INSTALLATION

This shower rod is designed for permanent wall-mounted installation, providing superior stability compared to tension rods. Follow these steps for a secure setup:

- 1. Measure and Mark:** Determine the desired height and position for your shower rod. Ensure it is level. Mark the screw hole locations for the first mounting plate on the wall. The rod adjusts from 44 to 72 inches (111.8 - 182.9 cm) to fit standard bathtub enclosures.
- 2. Drill Pilot Holes:** Using an appropriate drill bit for your wall type (e.g., tile, drywall), drill pilot holes at the marked locations. If installing into drywall, insert the provided wall anchors.
- 3. Attach Mounting Plates:** Secure the first mounting plate to the wall using the provided screws. Repeat the process for the second mounting plate on the opposite wall, ensuring the distance between the two plates accommodates the adjustable rod. The mounting hardware is designed to fit most existing screw holes, potentially avoiding re-drilling.
- 4. Assemble and Mount Rod:** Extend the two sections of the shower rod to the desired length. Slide the decorative plastic end caps over the rod ends. Align the rod ends with the mounting plates and secure them. The end caps will slide over the mounting plates to conceal the hardware, providing a seamless appearance.
- 5. Final Check:** Gently tug on the rod to ensure it is firmly attached and stable before hanging any shower

## OPERATING INSTRUCTIONS

Once installed, the Zenna Home Shower Rod is ready for use. Simply hang your preferred shower curtain and liner using standard shower curtain hooks or rings. The rod is designed to hold any shower curtains and/or liners securely.

## MAINTENANCE

To ensure the longevity and appearance of your Zenna Home Shower Rod:

- **Cleaning:** Wipe the chrome finish regularly with a soft, damp cloth and mild soap. Avoid abrasive cleaners

or harsh chemicals, as these can damage the finish.

- **Rust Resistance:** The attractive chrome finish is designed to resist rust. Promptly wipe away any standing water to further prevent mineral buildup and maintain its shine.
- **Inspection:** Periodically check the mounting screws and connections to ensure they remain tight and secure.

## TROUBLESHOOTING

If you encounter any issues with your shower rod, consider the following:

- **Rod feels loose:** Re-check the mounting screws on both ends of the rod. Ensure they are tightened securely into the wall anchors or studs. If the wall anchors are damaged, they may need to be replaced.
- **Difficulty adjusting length:** Ensure the rod sections are clean and free of debris. Gently twist and pull/push to adjust the length. Do not force it.
- **End caps do not fit flush:** Verify that the mounting plates are correctly installed and flush against the wall. The decorative end caps are designed to snap over the mounting plates.

## SPECIFICATIONS

Feature	Detail
