Troubleshooting

Problem	Possible Cause	Solution
Light leakage around the nose or sides.	Improper positioning or loose fit.	Adjust the mask's position to ensure it sits snugly on your face, particularly around the nose bridge. Gently pull the elastic strap for a tighter, yet comfortable, fit.
Mask feels uncomfortable or too tight.	Strap is too tight or mask is misaligned.	Loosen the elastic strap slightly. Reposition the mask to ensure it is centered over your eyes and not pressing on sensitive areas.
Elastic strap becomes loose over time.	Normal wear and tear.	If the strap becomes too loose, a small knot can be tied in the elastic to shorten it, if necessary.
