Gardeneer by Dalen Trellis Netting Instruction Manual

Model: 100055858

[Overview](#) [Setup](#) [Usage](#) [Maintenance](#) [Troubleshooting](#) [Specifications](#) [Warranty & Support](#)

1. PRODUCT OVERVIEW

The Dalen Trellis Netting is a heavy-duty, tangle-free nylon mesh designed to provide vertical support for various vining plants. It is ideal for growing vegetables, fruits, and flowers, allowing for efficient use of garden space and easier harvesting.

- **Heavy-Duty Nylon:** Constructed from durable, tangle-free nylon material.
- **7-Inch Mesh:** Features a large 7-inch reach-through mesh for convenient harvesting.
- **High Breaking Strength:** Capable of supporting heavy crop loads with a 60-pound breaking strength.
- **Plant Protection:** Soft, non-burning net protects tender vines, foliage, and fruits from damage.

2. SETUP AND INSTALLATION

Proper installation of the trellis netting ensures optimal support and longevity. The netting is designed for vertical gardening and can be attached to various support structures.

2.1 Preparing the Support Structure

Before installing the netting, ensure you have a sturdy support structure in place. This can include posts, stakes, frames, or existing fences. The structure should be able to withstand the weight of mature plants and potential wind loads. For a 5' x 15' netting, consider a frame that is at least 5 feet high and 15 feet wide.

2.2 Attaching the Netting

1. Unroll the netting carefully to avoid tangling.
2. Secure one end of the netting to your support structure using ties, clips, or staples. Ensure it is taut but not overly stretched.
3. Extend the netting along the length of your support structure, securing it at regular intervals (e.g., every 1-2 feet) to maintain tension and prevent sagging.
4. Ensure the netting is securely fastened at the top, bottom, and sides to provide stable support for growing plants.

Figure 2.2: Detail of the 7-inch reach-through mesh. This large mesh size allows for easy access to plants for harvesting and maintenance.

3. OPERATING AND USAGE

The Dalen Trellis Netting is designed to facilitate healthy vertical growth for a variety of vining plants. Its soft, non-burning material ensures the protection of delicate plant parts.

3.1 Guiding Plant Growth

As your plants grow, gently guide their tendrils or stems through the mesh openings. The plants will naturally begin to climb and intertwine with the netting, providing stable support. For best results, start guiding plants when they are young.

3.2 Harvesting

The 7-inch mesh openings allow for easy access to fruits and vegetables for harvesting. Simply reach through the mesh to pick your produce without damaging the plant or the netting.

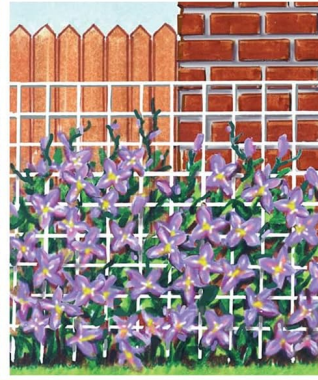

Harvest Fast and Easily

4. MAINTENANCE

To ensure the longevity and reusability of your Dalen Trellis Netting, follow these maintenance guidelines:

- **Cleaning:** After the growing season, remove any plant debris, leaves, or old vines from the netting. A gentle rinse with water can help clean off dirt.
- **Inspection:** Periodically inspect the netting for any signs of wear, tear, or damage. While durable, extreme conditions or heavy loads over time may cause stress.
- **Storage:** If you plan to store the netting for the off-season, ensure it is clean and dry. Fold or roll it neatly to prevent tangling and store it in a cool, dry place away from direct sunlight and pests.
- **Reusability:** The heavy-duty nylon is designed for multiple seasons of use if properly maintained and stored.

5. TROUBLESHOOTING

Here are some common issues and their potential solutions:

Problem	Possible Cause	Solution
Netting sags or loses tension.	Insufficient initial tension, inadequate support structure, or excessive plant weight.	Ensure the netting is pulled taut during installation. Add intermediate support points or strengthen the main support structure. Verify plant weight does not exceed the 60-pound breaking strength.
Plants are not climbing the netting.	Plants are too young, or not properly guided.	Gently guide young plant tendrils through the mesh. Some plants may need initial assistance to find the netting.

Problem	Possible Cause	Solution
Netting appears smaller than stated dimensions.	Measurement discrepancies or netting not fully extended.	The netting is designed to be 5 feet by 15 feet. Ensure it is fully stretched and properly secured to its maximum dimensions during installation. Note that the 7-inch mesh refers to the size of the individual openings.

6. PRODUCT SPECIFICATIONS

Feature	Detail
Brand	Dalen
Model Number	100055858
Product Dimensions	5 feet (Height) x 15 feet (Width) (180"W x 60"H)
Material	Nylon
Color	White
Mesh Size	7 inches
Breaking Strength	60 pounds (approximate)
Item Weight	16 ounces (1 pound)
Assembly Required	No (refers to the netting itself, not the support structure)
Manufacturer	Jensen Distributing - Lawn & Garden
UPC	009326723365, 016069000059

7. WARRANTY AND SUPPORT

Specific warranty information for the Dalen Trellis Netting is not provided in this manual. For details regarding product warranty, returns, or technical support, please refer to the product packaging or contact Dalen customer service directly.
