Master Lock 7620EURD

Master Lock 7620EURD 20mm 3-Digit Combination Padlock Instruction Manual

Model: 7620EURD | Brand: Master Lock

1. PRODUCT OVERVIEW

The Master Lock 7620EURD is a 20mm aluminum resettable combination padlock designed for security applications such as securing suitcases, briefcases, and sport bags. It features a durable aluminum body with a brushed metal finish, offering resistance to corrosion. This padlock utilizes a 3-digit set-your-own combination system for convenient keyless security.

Key Features:

- Durable aluminum body with brushed metal finish.
- 3-digit resettable combination for personalized security.
- 20mm wide lock body with a 3mm diameter shackle, 21mm long.
- Security level 3.

2. SETTING YOUR COMBINATION

Your Master Lock 7620EURD padlock comes preset to open at **0-0-0**. Follow these steps to set your personal combination:

1. Open the padlock by setting the dials to **0-0-0** and pulling up the shackle.
2. Rotate the shackle 90 degrees clockwise (from the top view).
3. Press the shackle down firmly into the lock body. Ensure it is fully depressed; this position is critical for combination setting.
4. While holding the shackle down, set your desired 3-digit combination by rotating the dials. Choose a memorable combination.
5. Once your new combination is set, pull the shackle up.
6. Rotate the shackle back 90 degrees counter-clockwise to its original closed position.
7. Scramble the dials to lock the padlock. Test your new combination to ensure it opens correctly before securing any items.

3. OPERATING THE PADLOCK

To open the padlock:

1. Align the dials to your preset 3-digit combination.
2. Pull the shackle upwards to release the lock.

To close and secure the padlock:

1. Insert the shackle into the lock body.
2. Scramble the dials to a random combination to secure the padlock.

4. MAINTENANCE

The Master Lock 7620EURD padlock requires minimal maintenance to ensure optimal performance and longevity:

- **Cleaning:** Wipe the padlock periodically with a soft, dry cloth to remove dust and grime. Avoid harsh chemicals or abrasive cleaners.
- **Lubrication:** If the shackle or dials become stiff, apply a small amount of graphite lubricant or a silicone-based spray lubricant to the shackle opening and dial mechanisms. Do not use oil-based lubricants as they can attract dirt.
- **Storage:** Store the padlock in a dry environment when not in use to prevent moisture buildup.

5. TROUBLESHOOTING

If you encounter issues with your padlock, consider the following:

- **Padlock will not open with the correct combination:**

- Ensure each number is precisely aligned in the center of the viewing window.
- Verify that you are using the correct combination. If you recently changed it, try both the old and new combinations.
- Apply slight pressure to the shackle while entering the combination, then release pressure and pull up.

- **Dials are stiff or difficult to turn:**

- Apply a small amount of graphite lubricant or silicone spray to the dial mechanisms.
- Clean any visible dirt or debris from around the dials.

- **Forgot the combination:**

Unfortunately, for a 3-digit resettable combination padlock, there is no master key or override code. If the combination is forgotten, the only method to open it is to try all possible combinations (000 to 999). This process can be time-consuming but is feasible for a 3-digit lock.

6. SPECIFICATIONS

Feature	Detail
Model Number	7620EURD
Lock Type	3-Digit Resettable Combination Padlock
Body Material	Aluminum
Shackle Material	Alloy Steel
Body Width	20mm
