Nilfisk 81620000 Classic Vacuum Bag Instruction Manual for GS/GM 80P

Model: 81620000

1. INTRODUCTION

This instruction manual provides essential information for the proper use, installation, and maintenance of the Nilfisk 81620000 Classic Vacuum Bags. These bags are designed for compatibility with Nilfisk GS/GM 80P series vacuum cleaners. Please read this manual thoroughly before installing or replacing the vacuum bag to ensure optimal performance and safety.

2. PRODUCT OVERVIEW

The Nilfisk 81620000 Classic Vacuum Bag is a disposable dust bag specifically engineered for Nilfisk professional vacuum systems. It features a durable construction to effectively capture dust and debris, maintaining the efficiency of your vacuum cleaner. The bag is designed for easy installation and removal.

This image displays a package of Nilfisk 81620000 Classic vacuum bags. The bags are made of a durable paper-like material, featuring a blue plastic collar for secure fitting into the vacuum cleaner. Several bags are visible, indicating a multi-pack.

3. SETUP AND INSTALLATION

Follow these steps to properly install a new Nilfisk 81620000 vacuum bag into your compatible Nilfisk GS/GM 80P vacuum cleaner:

1. **Power Off:** Ensure the vacuum cleaner is unplugged from the power outlet before proceeding with installation or replacement.
2. **Open Vacuum:** Unlatch and remove the top cover or access panel of your Nilfisk GS/GM 80P vacuum cleaner according to its specific design.
3. **Remove Old Bag (if applicable):** Carefully detach the full dust bag from its connection point. Dispose of the full bag responsibly.
4. **Insert New Bag:** Take a new Nilfisk 81620000 Classic vacuum bag. Align the blue plastic collar of the bag with the inlet port inside the vacuum cleaner's dust compartment. Push firmly until the bag is securely seated. Ensure the bag is fully unfolded inside the compartment without obstructing the lid closure.
5. **Close Vacuum:** Replace the top cover or access panel and secure the latches. Ensure the vacuum cleaner is properly sealed before use.

4. OPERATING INSTRUCTIONS

Once the vacuum bag is correctly installed, the vacuum cleaner is ready for operation. The vacuum bag functions automatically to collect dust and debris during cleaning tasks. There are no specific operating controls for the bag itself.

5. MAINTENANCE

Regular maintenance of the vacuum bag involves timely replacement:

- **Check Bag Fullness:** Periodically check the dust bag fullness indicator on your vacuum cleaner (if available)

or visually inspect the bag.

- **Replace When Full:** Replace the vacuum bag when it is full or when you notice a decrease in suction power. A full bag can reduce cleaning efficiency and potentially strain the vacuum motor.
- **Proper Disposal:** Always dispose of used vacuum bags in accordance with local waste disposal regulations.

6. TROUBLESHOOTING

If you experience reduced suction or poor cleaning performance:

- **Check Bag Fullness:** The most common cause of reduced suction is a full dust bag. Replace the Nilfisk 81620000 vacuum bag if it is full.
- **Bag Installation:** Ensure the vacuum bag is correctly installed and securely seated in the vacuum cleaner's compartment. A loose or improperly installed bag can lead to air leaks and reduced suction.
- **Obstructions:** Check the vacuum hose, nozzles, and filters for any blockages.

If issues persist after checking these points, refer to your Nilfisk GS/GM 80P vacuum cleaner's main instruction manual or contact Nilfisk customer support.

7. SPECIFICATIONS

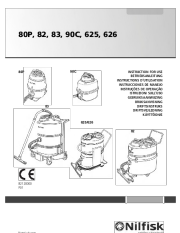

Attribute	Detail
Brand	Nilfisk
Model Number	81620000
Compatible Devices	Nilfisk GS/GM 80P
Item Weight	6.7 ounces
Product Dimensions	9.8 x 13 x 0.8 inches
Style	CLASSIC
Special Features	Disposable
Color	Brown (bag material)
Package Size	1 pack
Number of Bags per Pack	5

8. WARRANTY AND SUPPORT
