

On-Q EN4250

ON-Q 42" Enclosure Hinged Cover-Lock User Manual

Model: EN4250

Brand: On-Q

1. INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of the On-Q 42-inch Enclosure Hinged Cover-Lock (Model EN4250). This enclosure is designed to house and organize structured wiring components for residential and light commercial applications, providing a centralized and secure location for your network, voice, and video distribution systems.

The On-Q enclosure features a durable 20 Gauge CRS (Cold Rolled Steel) construction with a protective powder coat finish, ensuring longevity and reliability. Its versatile design allows for both flush and surface mounting, adapting to various installation requirements. The hinged, locking door provides secure access to internal components while maintaining a clean aesthetic.

2. PRODUCT OVERVIEW

The On-Q 42-inch Enclosure is engineered for efficient cable management and component organization. Key features include:

- **Hinged, Locking Door:** Provides secure access and conceals wiring.
- **Universal Mounting Holes:** Compatible with all On-Q bay-style modules.
- **Large Top Openings:** Facilitate easier wire pulling.
- **Additional Knockouts:** For flexible cable entry and electrical outlets.
- **Side Lances and Tabs:** Offer versatile mounting options for internal components.
- **Drywall Depth Indicators:** Aid in correct flush-mount positioning.

- **Self-Adhesive Cable Identification Table:** For organized wiring.

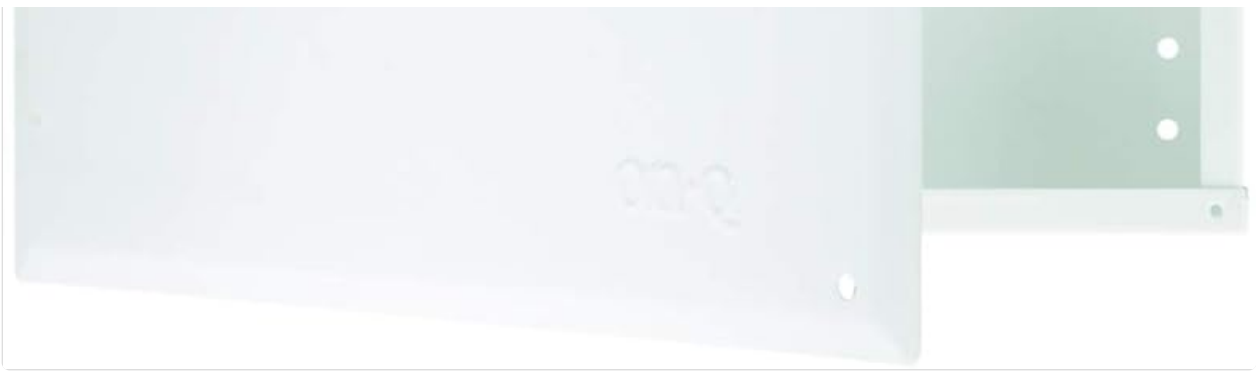

Figure 2.1: The On-Q 42-inch Enclosure with its hinged door open, showcasing the internal mounting points and cable management features.

EN4250 DIMENSIONS

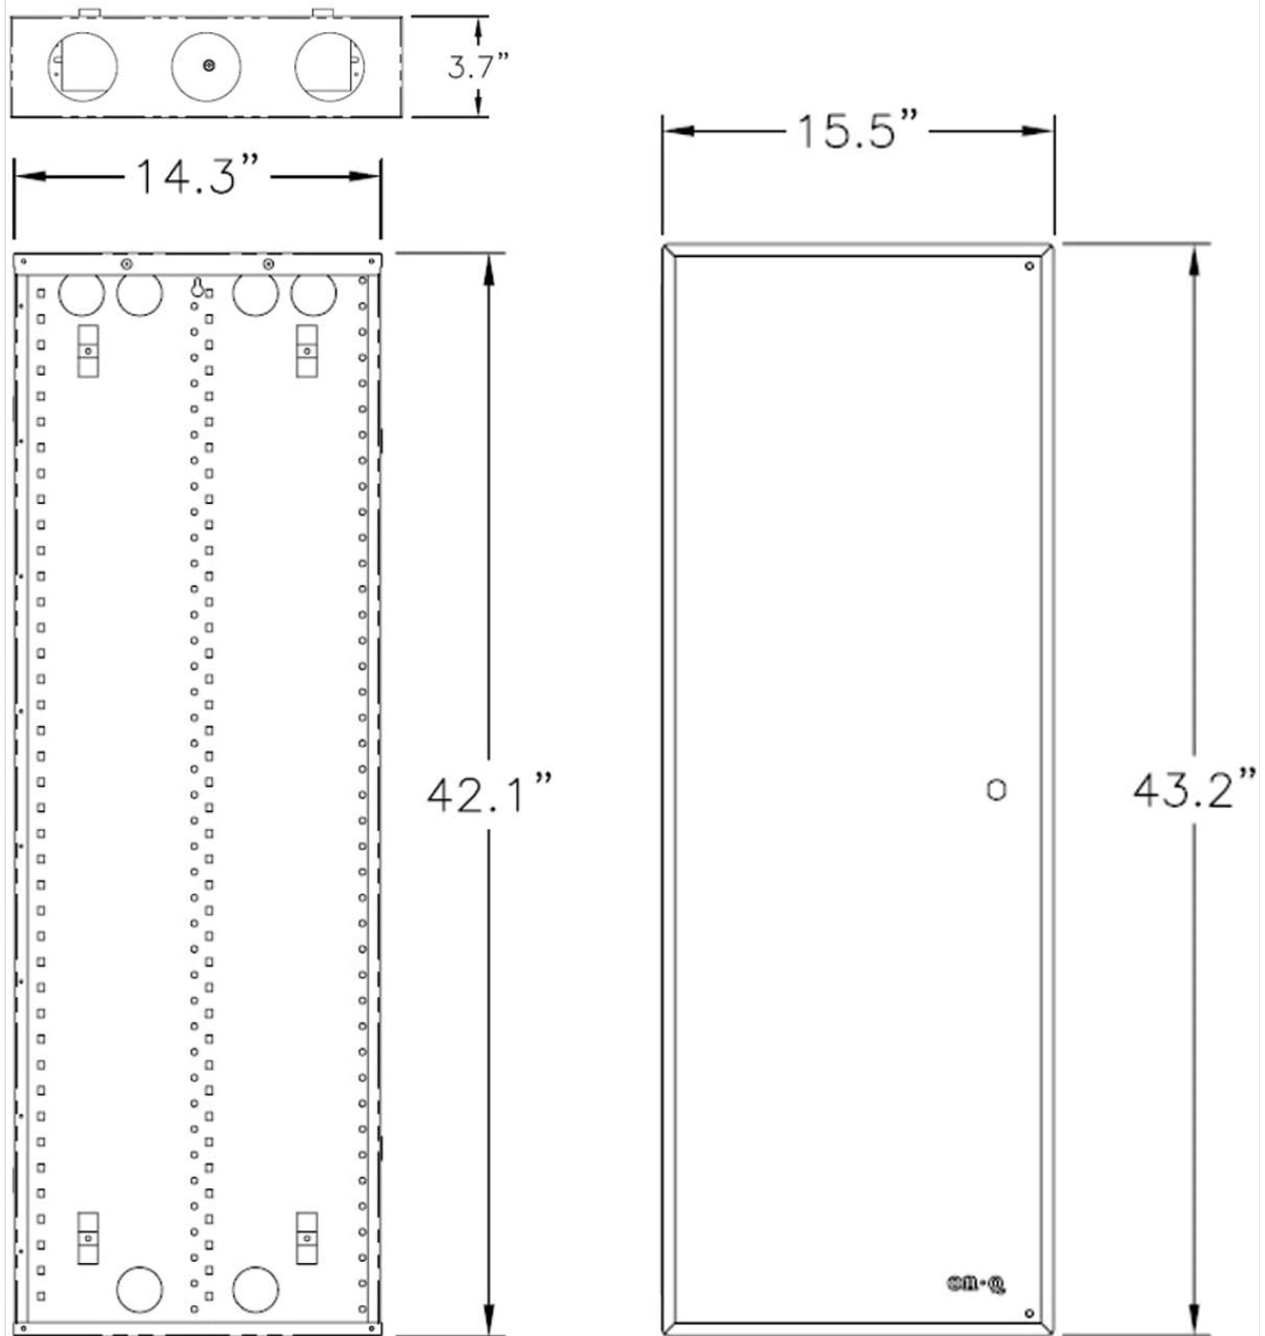

Figure 2.2: Detailed dimensions of the EN4250 enclosure, including depth, width, and height measurements for both the enclosure body and the hinged door.

Figure 2.3: The keyed lock mechanism on the enclosure door, providing security for the housed components.

3. INSTALLATION

The On-Q EN4250 enclosure can be installed using either recessed (in-wall) or surface mounting methods. Ensure all local electrical and building codes are followed during installation.

3.1 Tools and Materials Required

- Drill/Driver
- Level
- Utility Knife or Hammer (for knockouts)
- Screwdriver (Phillips head recommended)
- Measuring Tape
- Pencil
- Safety Glasses

3.2 Mounting the Enclosure

1. **Select Location:** Choose a suitable location, typically between wall studs, that allows for easy access and cable routing. Ensure there is sufficient space for the enclosure's dimensions (approximately 14.3" W x 42.1" H x 3.7" D).
2. **Mark Keyhole Location:** Hold the enclosure against the wall studs in the desired position. Mark the location of the top keyhole slot on the wall.
3. **Install Top Screw:** Drive a screw into the marked keyhole location, leaving it slightly proud to allow the enclosure to hang.
4. **Hang and Level:** Hang the enclosure on the top screw. Use a level to ensure the enclosure is plumb.
5. **Secure Remaining Tabs:** Once level, drive screws into the remaining mounting tabs to secure the enclosure firmly to the wall studs.

EASY INSTALLATION CHOOSE FROM TWO MOUNTING OPTIONS: RECESSED OR SURFACE

Figure 3.1: Securing the enclosure to wall studs during installation. The enclosure can be recessed or surface mounted.

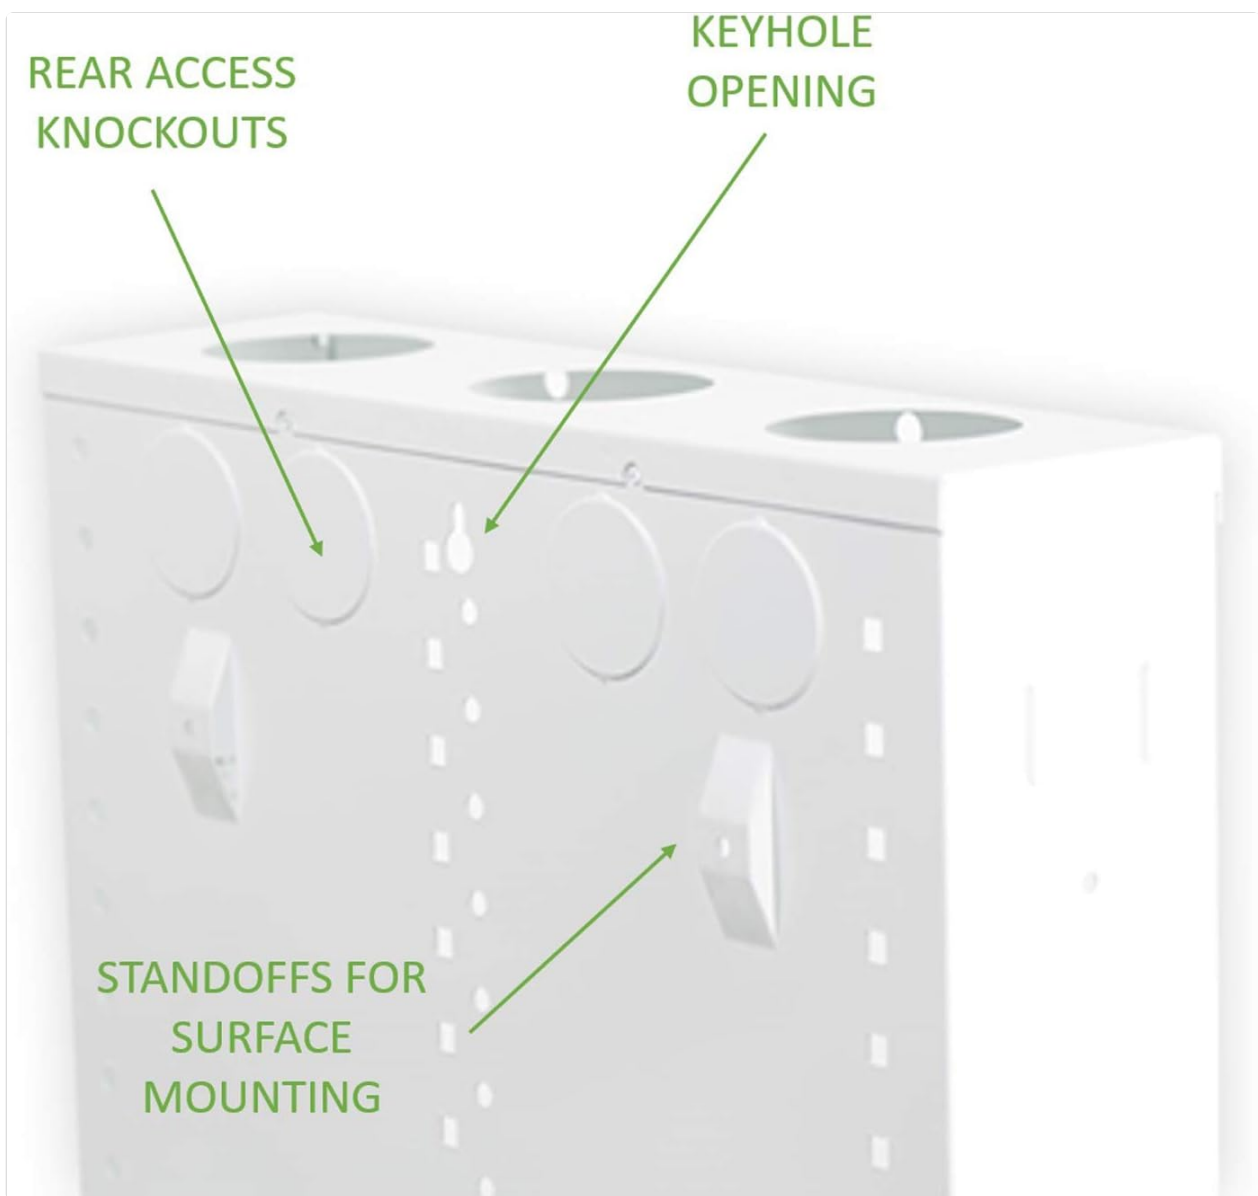

Figure 3.2: Details of the enclosure's rear access knockouts, keyhole opening for initial hanging, and standoffs for surface mounting.

3.3 Cable Entry and Power Installation

1. **Remove Knockouts:** Use a utility knife or hammer to remove the desired cable entry knockouts at the top or bottom of the enclosure. The top openings are larger (2.5 inches) for easier wire pulling.
2. **Install Grommets (Optional):** For protected cable entry, install On-Q rubber grommets (AC1034, sold separately) into the removed knockouts.
3. **Route Cables:** Pull all necessary low-voltage cables (network, voice, video) through the chosen entry points into the enclosure.
4. **Install Electrical Outlets:** If power is required inside the enclosure, remove the appropriate electrical knockouts at the bottom. Install On-Q Tamper Resistant Outlet Power Kit (F7526) or Surge Protected Power Outlet Kit (364569-02-V1) (sold separately) using the provided screws to affix the box to the enclosure. Terminate AC cabling to the receptacle and secure with a cover plate.

2.5 INCH TOP OPENINGS MAKE PULLING WIRE THROUGH EASIER

Figure 3.3: The large 2.5-inch top openings facilitate easy routing of multiple cables into the enclosure.

Figure 3.4: The two bottom knockouts are designed for installing standard electrical outlets, such as the On-Q F7526 or 364569-02-V1 (sold separately).

3.4 Drywall and Trim Installation

1. **Protect with Cable Guard:** During drywall installation, use the provided cardboard cable guard to protect internal cables and keep them tidy.
2. **Install Trim Ring:** Once drywall is complete, mount the top trim piece first, then snap in additional perimeter pieces around the enclosure. Use a level and screw into additional mounting holes as needed.
3. **Attach Hinged Door:** Snap the hinged door into the trim ring. The door can be reversed to open from either the left or right side.

3.5 Installation Video Guide

For a visual guide on the installation process, please refer to the official installation video below:

Your browser does not support the video tag.

Video 3.1: Official installation guide for the On-Q Enclosure. This video demonstrates the steps for mounting the enclosure, managing cables, installing power outlets, and attaching the trim and hinged door.

4. OPERATION

The On-Q 42-inch Enclosure is primarily a passive housing unit designed to organize and protect your structured wiring components. Its operation involves managing the installed modules and cables.

- **Accessing Components:** Use the provided key to unlock and open the hinged door. This allows full access to all installed modules, patch panels, and cables.
- **Cable Management:** Utilize the built-in lance points and cable management clips (AC1035-20, sold separately) to neatly route and secure cables within the enclosure, preventing tangles and improving airflow.
- **Module Installation:** On-Q bay-style modules (e.g., video, voice, network distribution, Gigabit switches like DA1008) can be easily snapped into the universal mounting holes. Ensure modules are securely fastened.
- **Power Outlets:** If installed, the internal power outlets provide electricity to active components such as routers, switches, or media converters.

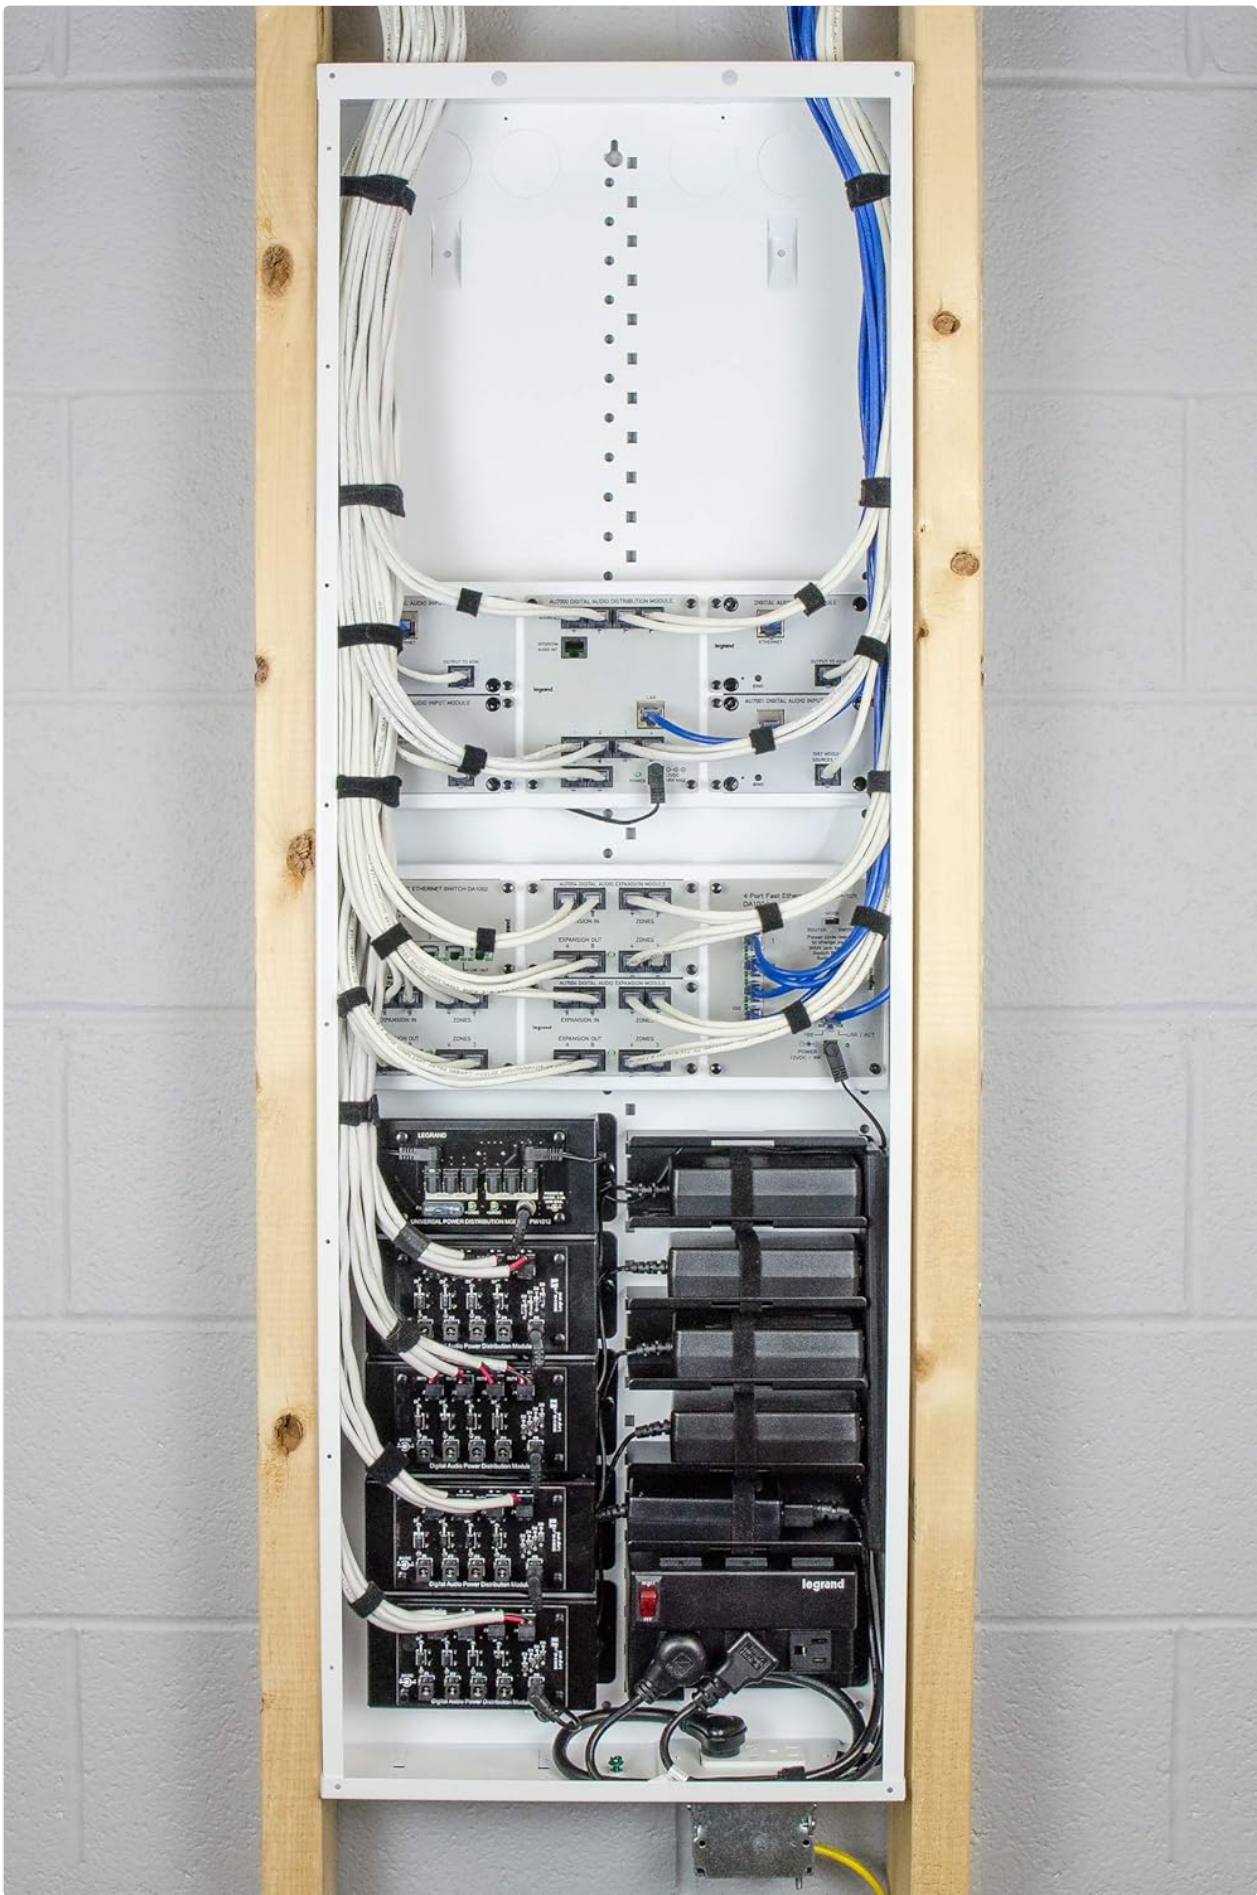

Figure 4.1: An example of a fully populated On-Q enclosure, demonstrating organized cabling and various installed modules for a structured wiring system.

EASILY ORGANIZE ALL HOME SYSTEMS COMPONENTS IN ONE CENTRALIZED LOCATION

Figure 4.2: Components such as Ethernet switches and network interface modules neatly organized within the enclosure, with cables managed for optimal performance.

**BUILT IN LANCE POINTS
FOR CABLE
MANAGEMENT**

DRYWALL DEPTH INDICATOR

FLEXIBLE MOUNTING TABS

Figure 4.3: Internal features like lance points for cable ties, drywall depth indicators, and flexible mounting tabs that enhance the enclosure's versatility and ease of use.

5. MAINTENANCE

The On-Q 42-inch Enclosure requires minimal maintenance to ensure its continued performance and the protection of your structured wiring system.

- **Regular Inspection:** Periodically open the enclosure and inspect all connections and components for any signs of wear, damage, or loose connections.
- **Dust Removal:** Use a soft, dry cloth or compressed air to remove any accumulated dust from inside the enclosure and from the components. Excessive dust can lead to overheating of active devices.
- **Cable Organization:** Ensure cables remain neatly organized and secured to the lance points. Re-tie or adjust cable ties as needed to maintain proper airflow and prevent strain on connections.
- **Door and Lock:** Check the hinged door and lock mechanism for smooth operation. Lubricate the lock if it becomes stiff.
- **Environmental Conditions:** Ensure the environment around the enclosure remains within specified

humidity and temperature ranges to prevent damage to electronic components.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your On-Q 42-inch Enclosure.

Problem	Possible Cause	Solution
Door does not close or latch properly.	Misalignment of door or trim ring; obstruction; damaged hinge/latch.	Check for obstructions. Ensure trim ring is properly seated. Inspect hinges and latch for damage and adjust if possible.
Difficulty pulling cables through knockouts.	Knockout not fully removed; sharp edges; too many cables.	Ensure knockouts are completely removed. Use rubber grommets (AC1034) for smoother entry. Reduce cable bundle size or use additional knockouts.
Internal components overheating.	Poor airflow; excessive dust; too many active devices.	Ensure cables are neatly managed to allow airflow. Clean dust regularly. Consider adding a small ventilation fan if multiple heat-generating devices are installed.
Enclosure feels loose on the wall.	Mounting screws are loose or not fully engaged.	Tighten all mounting screws. If necessary, remove the enclosure, re-drill pilot holes, and re-mount securely.

7. SPECIFICATIONS

Attribute	Detail
Model Number	EN4250
Dimensions (H x W x D)	42.1" x 14.3" x 3.7" (Enclosure Body) 43.2" x 15.5" (Hinged Door)
Material	20 Gauge CRS (Cold Rolled Steel)
Finish	Protective Powder Coat (Glossy White)
Installation Type	Flush-Mount, Surface-Mount
Weight	19.76 pounds
Humidity	Max 93% non-condensing
Compliance	RoHS Compliant

Attribute	Detail
Included Components	(1) 42" Metal Enclosure with Hinged Door
UPC	804428023180

8. WARRANTY AND SUPPORT

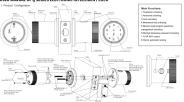

The On-Q 42-inch Enclosure Hinged Cover-Lock (Model EN4250) comes with a **1-year warranty** from the date of purchase.

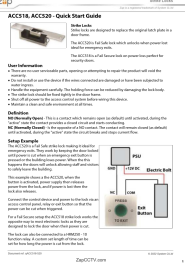

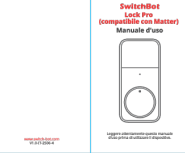

For technical support, warranty claims, or additional information, please contact On-Q customer service or visit their official website. Refer to the product packaging or the On-Q brand store on Amazon for the most current contact details.

Additional resources, including the full installation manual in PDF format, may be available online:

	GUSE SPECIFICATIONS
On-CP Residential Multisystem Installation	
<i>This section elaborates in written accordance to the Construction Specifications Institute (CSI) format, "MasterFormat," which is used by the construction industry as a standard classification system.</i>	
<i>Carefully review each add section to meet the requirements of the project and local building code. Coordinate each section with the specifications and drawings.</i>	
Briefly of "Specify Notes" when doing setting this section:	
SECTION 27 11 16	
COMMUNICATIONS CABINETS, RACKS, FRAMES, AND ENCLOSURES	
PART 1 - GENERAL	
A. CONDITIONS AND REQUIREMENTS	
1. A. General Conditions, Supplementary Conditions, and Division 01 – General Requirements apply.	
B. SECTION INCLUDES	
Specifier Note: Delete items below that are not included in the section.	
A. Residential multisystem panels.	
B. [Insert item here]	
RELATED SECTIONS	
1. Section 27- In this article, specify work specified in other sections that is related to work of this division.	
2. Section 26- Electrical, Electrical systems and components.	
3. Division 27 – Communications, Communications and audio-visual systems and components.	
4. Section 28- Electronic Safety and Security, Security systems and components.	
Specifier Note: The following paragraph is a sample that may be used in this article. Add or delete as needed to better fit the project's needs.	
D. Section xxx.viii – [Section Title] – Include brief description of work specified in other sections that is related to the work of this section.)	
SUBMITTALS	
Specifier Note: In this article, specify various types of test to be furnished by the contractor before installation or after construction. Specify included in the article are: product data, shop drawings, samples, design data, test reports, certificates, manufacturer's instructions, material safety sheets, warranties, quality assurance statements, and clearance statements.	
A. Submit under provisions of Section 01 33 00 _____ 3.	
B. Submit Data. Submit for residential multisystem panels and components.	
C. Shop Drawings. For the following electrical systems and components. Include plans, elevations, sections, details, and attachments to other work.	
Residential multisystem panel.
