## SAFETY INFORMATION

---

- **Keep out of reach of children and pets.**
- Do not ingest. In case of ingestion, seek medical advice immediately.
- Avoid contact with eyes and skin. In case of contact, rinse thoroughly with water.
- Store in a cool, dry place, away from direct sunlight.
- Use only as directed for coffee machine cleaning.

## SETUP

---

Before beginning the cleaning process, ensure your coffee machine is turned off and cooled down. Refer to your specific Miele coffee machine's user manual for any model-specific instructions regarding the cleaning cycle. Ensure the water tank is filled with fresh water and the drip tray is empty.

## OPERATING INSTRUCTIONS

---

Follow these general steps for using Miele cleaning tablets. Always consult your coffee machine's specific manual for precise instructions, as procedures may vary by model.

- 1. Prepare the Machine:** Ensure the coffee machine is ready for a cleaning cycle. This typically involves emptying the grounds container and drip tray.
- 2. Initiate Cleaning Program:** Access the cleaning program on your Miele coffee machine's display. The exact menu navigation will be detailed in your appliance's manual.
- 3. Insert Tablet:** When prompted by the machine, place one Miele cleaning tablet into the designated compartment. This is usually the ground coffee chute or a specific cleaning tablet slot.
- 4. Start Cycle:** Confirm the insertion and start the cleaning cycle as instructed by the machine. The machine will then perform a series of rinses and cleaning actions.
- 5. Complete Cycle:** Allow the cleaning program to run to completion. This may take several minutes. Do not interrupt the cycle.
- 6. Final Rinse:** After the cleaning cycle, the machine may prompt for additional rinses. Follow all on-screen instructions to ensure all cleaning solution is flushed out.
- 7. Ready for Use:** Once the cycle is complete and any rinse cycles are finished, your coffee machine is ready for normal operation.

## MAINTENANCE

---

For optimal performance and hygiene, it is recommended to clean your Miele coffee machine regularly with these tablets. The frequency depends on usage and water hardness, but typically, the machine will prompt you when cleaning is required. Adhere to these prompts to prevent buildup of coffee oils and residues.

## TROUBLESHOOTING

---

- Cleaning Cycle Not Starting:** Ensure the machine is properly prepared (water tank full, drip tray empty, grounds container empty) and that you have followed the machine's prompts precisely.
- Residue After Cleaning:** If you notice any residue, run an additional rinse cycle with fresh water. Ensure the tablet fully dissolved during the cleaning process.
- Error Message During Cleaning:** Refer to your Miele coffee machine's user manual for specific error codes and their solutions.
- Machine Still Appears Dirty:** For stubborn buildup, a second cleaning cycle might be necessary, or manual cleaning of removable parts as per your machine's manual.
