

Master Lock 614DAT

Master Lock 614DAT Self-Coiling Cable and Solid Brass Padlock Instruction Manual

1. INTRODUCTION

Thank you for choosing the Master Lock 614DAT Self-Coiling Cable and Solid Brass Padlock. This product is designed to provide reliable security for various applications, particularly for securing tires and other equipment. The cable features a self-coiling design for convenient storage, and the padlock is constructed from solid brass for enhanced corrosion resistance and durability. Please read this manual carefully to ensure proper setup, operation, and maintenance of your lock.

2. PRODUCT COMPONENTS

The Master Lock 614DAT package includes the following components:

- One (1) 6-foot Self-Coiling Steel Cable
- One (1) Solid Brass Padlock
- Two (2) Keys for the Padlock

This image displays the Master Lock 614DAT product, including the black self-coiling cable, the solid brass padlock with a black body, and two silver keys.

3. SETUP AND INSTALLATION

Follow these steps to set up and install your Master Lock 614DAT:

1. **Uncoil the Cable:** Gently uncoil the 6-foot self-coiling cable. The cable is designed to retain its coiled shape for compact storage but can be extended for use.
2. **Position the Cable:** Route the cable around the item(s) you wish to secure. For tire security, pass the cable through the wheel spokes or around the tire and frame. Ensure the cable is taut to minimize slack.
3. **Form a Loop:** Bring both ends of the cable together. One end of the cable has a pre-formed loop, and the other end has a bare cable tip. Pass the bare cable tip through the pre-formed loop to create a secure connection point.
4. **Attach the Padlock:** Insert the shackle of the solid brass padlock through the looped ends of the cable. Ensure the cable ends are fully contained within the padlock's shackle.
5. **Lock the Padlock:** Insert one of the provided keys into the padlock's keyway. Turn the key clockwise to close the shackle and lock the padlock. Remove the key and store it in a safe place.

Always double-check that the padlock is securely locked and the cable cannot be easily removed from the secured item.

4. OPERATING INSTRUCTIONS

Operating your Master Lock 614DAT is straightforward:

- **To Lock:** After routing the cable and forming a loop, insert the padlock shackle through the cable loops. Push the shackle firmly into the padlock body until it clicks, indicating it is locked. For added security, turn the key clockwise to ensure the shackle is fully engaged and then remove the key.
- **To Unlock:** Insert the correct key into the padlock's keyway. Turn the key counter-clockwise to release the shackle. Pull the shackle open, then remove the cable loops.

Always keep your spare key in a secure, accessible location separate from the primary key.

5. MAINTENANCE

Proper maintenance will extend the life and functionality of your Master Lock 614DAT:

- **Cleaning:** Wipe the padlock and cable with a damp cloth to remove dirt and grime. Avoid harsh chemicals that may damage the finish or materials.
- **Lubrication:** Periodically apply a small amount of graphite lubricant or a silicone-based spray to the padlock's keyway and shackle mechanism. This helps ensure smooth operation and protects against corrosion, especially in harsh weather conditions.
- **Storage:** When not in use, store the lock and cable in a dry environment to prevent moisture buildup and potential corrosion. The self-coiling design makes storage compact.
- **Inspection:** Regularly inspect the cable for any signs of fraying, cuts, or damage. Check the padlock for any signs of wear or malfunction. If significant damage is observed, consider replacing the unit for optimal security.

6. TROUBLESHOOTING

If you encounter issues with your Master Lock 614DAT, consider the following:

- **Key Not Turning:** Ensure the key is fully inserted into the keyway. If it's stiff, apply a small amount of

lubricant to the keyway and try again. Do not force the key, as this may cause it to break.

- **Shackle Not Locking/Unlocking:** Check for any obstructions in the shackle mechanism or keyway. Lubricate the mechanism if it feels stiff. Ensure the key is turned completely when locking or unlocking.
- **Cable Damage:** If the cable shows significant signs of wear, fraying, or cuts, its security integrity may be compromised. It is recommended to replace the cable and padlock unit.
- **Lost Keys:** Master Lock does not provide replacement keys for specific padlocks. If all keys are lost, the lock will need to be removed by a professional or by cutting the cable.

7. SPECIFICATIONS

Brand	Master Lock
Model Number	614DAT
Lock Type	Key Lock
Cable Length	6 feet (approx. 1.8 meters)
Cable Diameter	6mm
Padlock Material	Solid Brass
Special Feature	Scratch Resistant, Weather Tough Material
Color	Black (cable and padlock body)
Item Dimensions (L x W x H)	10.8 x 6.8 x 2.4 inches (packaging/overall)
Item Weight	12.8 ounces
UPC	071649037078

8. WARRANTY AND SUPPORT

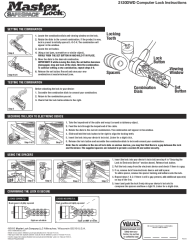

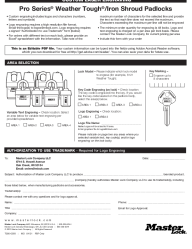

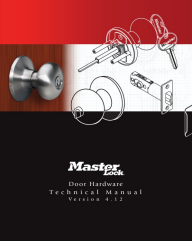

For information regarding product warranty, please refer to the official Master Lock website or contact their customer support directly. Master Lock is committed to providing quality security products.

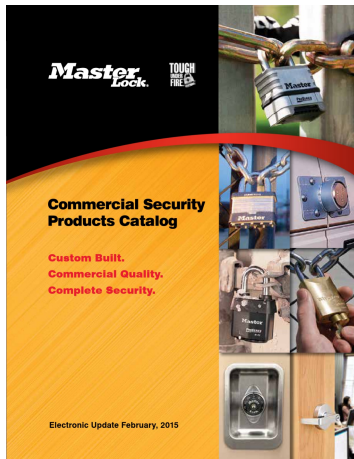

For further assistance, technical support, or to inquire about other Master Lock products, please visit the [Master Lock official website](#) or contact their customer service department.

The official Master Lock brand logo, featuring the word 'Master' in large, bold letters above 'Lock' in smaller, stylized text.
