Safety Information

- Ensure the mounting surface is sturdy enough to support the clock's weight (approximately 14.1 pounds).
- Keep batteries out of reach of children. Dispose of used batteries responsibly.
- Do not expose the clock to extreme temperatures or direct, prolonged sunlight, which may affect the thermometer's accuracy or clock's finish.

Package Contents

Verify that all components are present:

- Howard Miller Luis Double-Sided Wall Clock (Model 625358)
- Mounting Bracket
- Instruction Manual (this document)

Note: 2 AA batteries are required and not included.

Setup and Installation

1. **Choose a Location:** Select a suitable indoor or outdoor location. The clock is weather-resistant, but for prolonged outdoor use, a covered area is recommended to protect against extreme weather.
2. **Mounting the Bracket:** Secure the mounting bracket firmly to a wall stud or use appropriate wall anchors for drywall/masonry. Ensure the bracket is level before tightening.
3. **Install Batteries:** Open the battery compartment on one of the clock faces. Insert two (2) AA batteries, observing the correct polarity (+/-).
4. **Set the Time:** Use the small setting knob located on the back of the clock mechanism to adjust the time on both faces. Ensure both faces display the same time.
5. **Hang the Clock:** Carefully hang the clock onto the mounted bracket. The clock is designed to swivel on the decorative wall bracket.

Operation

Timekeeping

The clock features a quartz, battery-operated movement for accurate timekeeping. Once batteries are installed and the time is set, the clock will operate continuously.

Thermometer Function

The integrated thermometer is located above the 6 o'clock position on both clock faces. It provides ambient temperature readings. Allow some time for the thermometer to adjust to the environment after installation or significant temperature changes.

Image: Detailed view of the clock face, clearly showing the analog time display and the integrated thermometer.

Maintenance

- **Cleaning:** Wipe the clock and bracket with a soft, dry cloth. Do not use abrasive cleaners or solvents, as these may damage the finish or glass.
- **Battery Replacement:** Replace batteries annually or when the clock begins to lose time. Always replace both batteries simultaneously.
- **Weather Resistance:** The iron-finished frame with powder coating and zinc plating is designed to resist rust and moisture. However, regular inspection for any signs of wear, especially in outdoor environments, is recommended.

Troubleshooting

Problem	Solution

Problem	Solution
Clock is not running or losing time.	Check battery polarity. Replace both AA batteries with new ones.
Thermometer reading appears inaccurate.	Ensure the clock has been in its location for at least 30 minutes to acclimate to the ambient temperature. Avoid direct sunlight or heat sources.
Clock faces are not aligned.	Gently adjust the clock on its swivel bracket to achieve desired alignment.

Specifications

- **Model:** 625358
- **Brand:** Howard Miller
- **Display Type:** Analog
- **Special Features:** Double-Sided Display, Integrated Thermometer
- **Power Source:** Battery Powered (2 AA batteries, not included)
- **Movement:** Quartz
