PILOT G2 Retractable Premium Gel Ink Roller Ball Pens Instruction Manual

Model: 31056

INTRODUCTION

Welcome to the instruction manual for your PILOT G2 Retractable Premium Gel Ink Roller Ball Pens. This manual provides essential information for the proper use, maintenance, and care of your pens to ensure optimal performance and longevity.

The PILOT G2 is America's #1 selling Gel Ink Pen, known for its smooth-writing, smear-proof dynamic gel ink formula, and comfortable contoured rubber grip. These pens are retractable and refillable, offering excellent value.

G2[®]
PREMIUM GEL ROLLER

**AMERICA'S GO-2 GEL INK PEN,
DESIGNED FOR EVERYDAY OVERACHIEVERS**

Get exceptional value from the G2 Premium Gel Roller
- proven to be the longest writing gel ink pen

G2[®]
Overachievers Grant

At Pilot we want to give Overachievers who go above and beyond their 9-to-5 role the recognition they deserve.

For the last 8 years, G2 has been rewarding those who make a difference in the lives of others. The \$100,000 G2 Overachievers Grant recognizes those who make their communities and our world a better place.

SETUP

Your PILOT G2 pens are designed for immediate use. No complex assembly is required.

1. **Unpackaging:** Carefully remove the pens from their packaging.
2. **Protective Tip (if present):** Some pens may have a small wax or plastic bead on the tip to prevent drying during storage. Gently remove this protective tip before first use.
3. **Retract Mechanism:** Press the top button to extend the pen tip for writing. Press again to retract the tip when not in use to prevent accidental marks and ink drying.

OPERATING INSTRUCTIONS

The PILOT G2 pens are designed for smooth and comfortable writing across various applications.

- **Writing:** Extend the pen tip and apply light to moderate pressure to write. The gel ink flows smoothly, providing a consistent line.
- **Comfort Grip:** Utilize the contoured rubber grip for extended writing sessions to reduce hand fatigue.
- **Ink Drying:** The gel ink is formulated to be smear-proof. Allow a few seconds for the ink to dry on the paper, especially on glossy surfaces, to prevent smudging.
- **Storage:** Always retract the pen tip when not in use to prevent the ink from drying out and to protect the tip from damage. Store pens horizontally or tip-down for optimal ink flow.

Ideal Applications for PILOT G2 Pens:

- Everyday Writing
- Note-Taking
- Journaling
- Sketching
- Doodling
- Cardmaking
- Scrapbooking

MAINTENANCE

Proper maintenance ensures the longevity and consistent performance of your PILOT G2 pens.

Refilling the Ink

PILOT G2 pens are refillable, extending their lifespan and reducing waste. Use only genuine PILOT G2 refills for best results.

1. **Disassemble:** Unscrew the barrel of the pen, usually by twisting the grip section counter-clockwise.
2. **Remove Old Refill:** Carefully pull out the empty ink refill. Note the orientation of the spring, if present, as it will need to be placed on the new refill.
3. **Insert New Refill:** Place the spring onto the tip of the new PILOT G2 refill (if applicable). Insert the new refill into the pen barrel.
4. **Reassemble:** Screw the barrel back together clockwise until secure.

Cleaning

- **Exterior:** Wipe the exterior of the pen with a soft, damp cloth to remove any dust or ink smudges. Avoid harsh chemicals.
- **Tip:** If the tip appears clogged or has dried ink, gently wipe it with a damp cloth. Do not attempt to force objects into the tip.

TROUBLESHOOTING

Common Issues and Solutions

Problem	Possible Cause	Solution
Pen not writing / Ink skipping	<ul style="list-style-type: none">• Dried ink on tip• Air bubble in refill• Empty refill• Protective tip not removed	<ul style="list-style-type: none">• Gently wipe tip with a damp cloth.• Scribble on a scrap piece of paper to encourage ink flow.• Replace the ink refill.• Ensure any protective wax/plastic bead is removed from the tip.
Ink smudging	<ul style="list-style-type: none">• Ink not fully dry• Excessive pressure	<ul style="list-style-type: none">• Allow more time for ink to dry, especially on non-absorbent surfaces.• Use lighter pressure; G2 pens require minimal force for smooth writing.
Retract mechanism stuck	<ul style="list-style-type: none">• Debris in mechanism• Misaligned components	<ul style="list-style-type: none">• Gently tap the pen.• Disassemble and reassemble the pen to ensure all parts are correctly aligned.
