## Blast Zone INF-MAGICCASTLE

# Blast Zone Magic Castle Inflatable Bounce House User Manual

Model: INF-MAGICCASTLE

## INTRODUCTION

This manual provides essential instructions for the safe setup, operation, and maintenance of your Blast Zone Magic Castle Inflatable Bounce House. Please read all instructions carefully before use to ensure a safe and enjoyable experience.

Image: The Blast Zone Magic Castle inflatable bounce house, featuring red, blue, and yellow colors, set up on a green lawn under a clear sky.

## SAFETY INFORMATION

Adherence to these safety guidelines is crucial to prevent injury and ensure the longevity of your inflatable bounce house.

- **Adult Supervision Required:** Always supervise children while the bounce house is in use.
- **Weight and Capacity Limits:** The maximum weight recommendation is 300 pounds. Designed for up to 3 players simultaneously.
- **Clearance:** Ensure adequate clearance around the bounce house (minimum 6 feet on all sides and above).
- **Surface:** Set up on a soft, level surface such as grass. Avoid hard surfaces like concrete or asphalt.
- **Anchoring:** Always use the provided stakes to securely anchor the bounce house to the ground.
- **Weather Conditions:** Do not use in windy conditions (above 15 mph), rain, or lightning.
- **No Sharp Objects:** Remove shoes, jewelry, and any sharp objects before entering.

- **No Food or Drink:** Keep food, drinks, and pets out of the bounce house.
- **Enclosed Design:** The Magic Castle features fully-enclosed safety netting to prevent falls.

Image: Two children are visible through the safety netting of the Blast Zone Magic Castle, highlighting its fully-enclosed design for user safety.

## SETUP INSTRUCTIONS

Setting up your Blast Zone Magic Castle is a quick and straightforward process. It inflates in seconds.

1. **Unroll:** Lay the deflated bounce house flat on a clean, level surface. Ensure the air intake tube is extended and free of obstructions.
2. **Connect Blower:** Attach the air intake tube securely to the included electric blower. Ensure all other air outlets on the bounce house are closed or tied off as instructed.
3. **Position Blower:** Place the blower on a stable surface, away from water and foot traffic. The blower comes with a 25-foot cord.
4. **Inflate:** Plug in the blower and turn it on. The bounce house will inflate rapidly.
5. **Anchor:** Once fully inflated, use the provided stakes to secure the bounce house to the ground at all designated anchor points.

# EASY SETUP

## INFLATES IN SECONDS!

The bouncer rolls up to the size of a sleeping bag for convenient storage.

- **Plug in the blower**
- **Stake down the inflatable**
- **Turn it on**

### OPERATING INSTRUCTIONS

Once set up and inflated, the Magic Castle is ready for use. Ensure all safety precautions are followed during operation.

- **Entry and Exit:** Users should enter and exit through the designated opening.
- **Bouncing:** Encourage users to bounce in the center of the unit and avoid bouncing near the walls or netting.
- **Number of Users:** Adhere strictly to the maximum capacity of 3 players to prevent overcrowding and collisions.
- **Continuous Airflow:** The blower must remain on continuously while the bounce house is in use to maintain inflation.

## MAINTENANCE

### Cleaning

- Clean the bounce house with a mild soap and water solution.
- Rinse thoroughly and allow to air dry completely before storage to prevent mildew.
- Do not use harsh chemicals or abrasive cleaners.

### Storage

- Ensure the bounce house is completely dry before deflating and folding.
- Deflate by turning off the blower and untying any exhaust valves.
- Fold or roll the bounce house neatly to prevent damage and facilitate storage.
- Store in a cool, dry place, away from direct sunlight and pests.

## TROUBLESHOOTING

| Problem                          | Possible Cause                                                                                         | Solution                                                                                                                |
|----------------------------------|--------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Bounce house not inflating fully | Blower not plugged in, air intake tube not securely attached, exhaust valve open, small tear/puncture. | Check power connection, re-secure air intake tube, close all exhaust valves, inspect for damage and patch if necessary. |
| Blower stops working             | Power outage, tripped circuit breaker, blower malfunction.                                             | Check power supply, reset circuit breaker, contact customer support if blower is faulty.                                |
| Excessive air leakage            | Unsecured air intake tube, open exhaust valve, large tear/puncture.                                    | Ensure all connections are tight and valves are closed. For large tears, contact customer support.                      |

## SPECIFICATIONS

**Product Dimensions:** 132"L x 102"W x 96"H (8.5' x 11' x 7.4')
