5. OPERATING INSTRUCTIONS

The CURT 16204 5th wheel hitch rails serve as the foundation for your 5th wheel hitch. Proper operation

primarily involves ensuring the hitch is correctly engaged with the trailer and that all connections are secure.

1. **Hitch Engagement:** Follow the specific operating instructions for your 5th wheel hitch to properly connect it to your trailer. This typically involves backing the truck under the trailer kingpin until the hitch jaws engage.
2. **Safety Checks:** Before each tow, perform a thorough safety check:
 - Verify the 5th wheel hitch is securely locked onto the kingpin.
 - Ensure all safety pins and clips are in place.
 - Check that the trailer's landing gear is fully retracted.
 - Confirm electrical and brake connections are properly made and functioning.
 - Inspect the hitch rails and mounting hardware for any visible damage or looseness.
3. **Towing:** Drive cautiously, adhering to all traffic laws and towing regulations. Be mindful of the increased length and weight of your vehicle combination.
4. **Disengagement:** Follow your 5th wheel hitch's instructions for safely disconnecting the trailer.

6. MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your CURT 5th wheel hitch rails.

- **Inspection:** Before each use, visually inspect the rails for any signs of damage, cracks, bends, or excessive wear. Check all bolts and fasteners for tightness.
- **Cleaning:** Keep the rails clean from dirt, debris, and road salt. Wash with mild soap and water, then rinse thoroughly.
- **Corrosion Protection:** The carbide black powder coat provides excellent corrosion resistance. However, if any scratches or chips occur, touch up the affected areas with a rust-inhibiting paint to prevent corrosion.
