

Arrow HM108-A

Arrow 10' x 8' Hamlet Storage Shed Instruction Manual

Model: HM108-A

IMPORTANT SAFETY INFORMATION

Read and understand all instructions before beginning assembly and use of the Arrow 10' x 8' Hamlet Storage Shed. Failure to follow these instructions may result in injury or property damage.

- **Site Preparation:** Ensure the chosen site for the shed is level and clear of debris. A solid foundation (concrete slab, wood platform, or ground with proper anchoring) is crucial for stability.
- **Two-Person Assembly:** Assembly typically requires two people and can take at least 6 hours. Do not attempt to assemble alone.
- **Anchoring:** It is highly recommended to purchase and install an anchoring kit (sold separately) to protect the shed from strong winds and wind damage.
- **Weather Conditions:** Avoid assembly during windy or stormy conditions. Once the base is constructed, significant wind could compromise the structure before full completion.
- **Sharp Edges:** Metal components may have sharp edges. Wear appropriate protective gloves and eyewear during assembly.
- **Tools:** Use appropriate tools as specified in the assembly instructions.
- **Children and Pets:** Keep children and pets away from the assembly area.
- **Ventilation:** Ensure adequate ventilation if storing items that emit fumes.

ASSEMBLY INSTRUCTIONS

The Arrow 10' x 8' Hamlet Storage Shed is designed for straightforward assembly with pre-cut and pre-drilled parts. Follow the detailed instruction manual provided with your product for step-by-step guidance. The following are general tips to ensure a smooth assembly process:

- **Preparation:** Before starting, unpack all components and verify that all parts are present against the parts list

in your manual. Sort parts by their labels.

- **Foundation:** Ensure your chosen base is square and level. This is critical for proper alignment of panels and doors.
- **Teamwork:** Assembling this shed is a two-person job. Having an extra set of hands will significantly ease the process and improve safety.
- **Step-by-Step:** Complete assembly one step at a time. Do not skip steps or attempt to rush the process. Pay close attention to the door assembly.
- **Panel Alignment:** Carefully align panels and pre-drilled holes before securing fasteners. Do not force components together.
- **Anchoring:** Once the shed structure is complete, properly anchor it to the ground or foundation using an appropriate anchoring kit.

OPERATING YOUR STORAGE SHED

The Hamlet Storage Shed is designed for convenient outdoor storage of various items. Its features facilitate easy access and secure storage.

- **Sliding Doors:** The shed features single sliding doors for easy entry and removal of items. Ensure the track is clear of obstructions for smooth operation.
- **Security:** The doors are pad-lockable to keep your stored items safe and secure. A padlock is not included and must be purchased separately.
- **Storage Capacity:** With 401 cubic feet of capacity and 5-foot walls, the shed is suitable for storing lawn equipment, pool accessories, sports equipment, and bicycles.

MAINTENANCE

Proper maintenance will extend the life and appearance of your Arrow Hamlet Storage Shed.

- **Cleaning:** Clean the exterior of the shed periodically with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Corrosion and Rust:** The shed is constructed of electro-galvanized steel and treated with baked-on enamel to resist corrosion and rust. Inspect regularly for any signs of damage or wear, and address them promptly to prevent further deterioration.
- **Roof Maintenance:** The sloped steel roof is designed to reduce pooling water. Periodically clear any accumulated leaves, snow, or debris from the roof to maintain its effectiveness.
- **Door Tracks:** Keep the sliding door tracks clean and free of dirt or debris to ensure smooth operation. Lubricate if necessary with a silicone-based spray.
- **Anchoring Check:** Periodically check the anchoring system to ensure it remains secure, especially after severe weather conditions.

TROUBLESHOOTING

This section addresses common issues you might encounter with your storage shed.

- **Difficulty with Assembly:** If parts do not align, re-check the previous steps in the instruction manual. Ensure the base is perfectly level and square. Sometimes, slight adjustments to fasteners can help align panels.
- **Shed Instability/Wind Damage:** This is often due to improper or insufficient anchoring. Ensure an anchoring kit is installed correctly and securely. If the shed was assembled in windy conditions, check for bent components and reinforce as needed.
- **Sticking Doors:** Clean the door tracks thoroughly to remove any dirt, leaves, or debris. Apply a dry lubricant (e.g., silicone spray) to the tracks if needed. Check for any bent door panels or misaligned rollers.
- **Water Leaks:** Inspect all seams and connections for proper sealing. Ensure all screws are tightened. If leaks persist, apply a weather-resistant sealant to the affected areas.

SPECIFICATIONS

Feature	Detail
Brand	Arrow
Model Number	HM108-A
Exterior Dimensions (W x D x H)	120" W x 72" D x 96" H (10 ft Wide x 6 ft Deep x 8 ft High)
Interior Dimensions (L x W x H)	7'6" L x 9'10.25" W x 5'9.6" H (90" L x 118.25" W x 69.6" H)
Storage Capacity	401 cubic feet
Wall Height	5 feet
Door Opening Height	58 inches
Material	Electro-galvanized steel with baked-on enamel finish

Color	Eggshell and Green
Item Weight	126 Pounds
Water Resistance Level	Water Resistant
Assembly Required	Yes
