Cat Craft Modern cat tree 01

Cat Craft Three Tier Floor-to-Ceiling Cat Tree

Model: Modern cat tree 01 - Earth Tones

INTRODUCTION

This manual provides instructions for the assembly, operation, and maintenance of your Cat Craft Three Tier Floor-to-Ceiling Cat Tree. This product is designed to provide a multi-level climbing, scratching, and lounging area for your cat. Please read all instructions carefully before assembly and use.

SAFETY INFORMATION

- Ensure all parts are securely fastened before allowing your pet to use the cat tree.
- Regularly check the stability of the cat tree, especially the tension rod, to prevent tipping.
- This cat tree is designed for indoor use only.
- Do not install on vaulted or cathedral ceilings. It is suitable for ceilings up to 9 feet (2.74 meters) in height.
- Keep small children away from the cat tree during assembly and ensure they do not climb on it.

PACKAGE CONTENTS

Before beginning assembly, verify that all the following components are present:

- Base Plate
- Vertical Posts (multiple sections)
- Platforms/Tiers (3 units)
- Tension Rod Assembly (top pole with spring mechanism)
- Hardware (screws, washers, connectors)

SETUP AND ASSEMBLY

Assembly is straightforward and typically requires one person. No special tools are required beyond what may be included or common household items.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface. Ensure all components listed in the 'Package Contents' section are present.

2. **Attach Base:** Secure the first vertical post section to the base plate using the provided hardware. Ensure it is tightened firmly.
3. **Add Platforms and Posts:** Continue to attach the vertical post sections and platforms in the desired order, working your way upwards. Each platform should be securely fastened to the vertical posts. The design allows for staggered platforms to facilitate climbing.

This image provides a closer look at the four distinct levels of the cat tree, highlighting the carpeted platforms suitable for lounging and the vertical posts designed for scratching.

4. **Install Tension Rod:** Once all platforms and vertical posts are assembled, attach the tension rod assembly to the top of the uppermost vertical post.
5. **Position and Secure:** Stand the assembled cat tree upright in your desired location. Extend the tension rod until it firmly presses against the ceiling. Twist the rod to tighten the spring mechanism, securing the cat tree between the floor and ceiling. Ensure the tree is plumb and stable.

This image illustrates the adjustable tension rod located at the top of the cat tree, which is used to secure the unit firmly between the floor and ceiling, ensuring stability.

- Final Check:** Gently push and pull on the cat tree to confirm it is stable and does not wobble excessively. Adjust the tension rod if necessary.

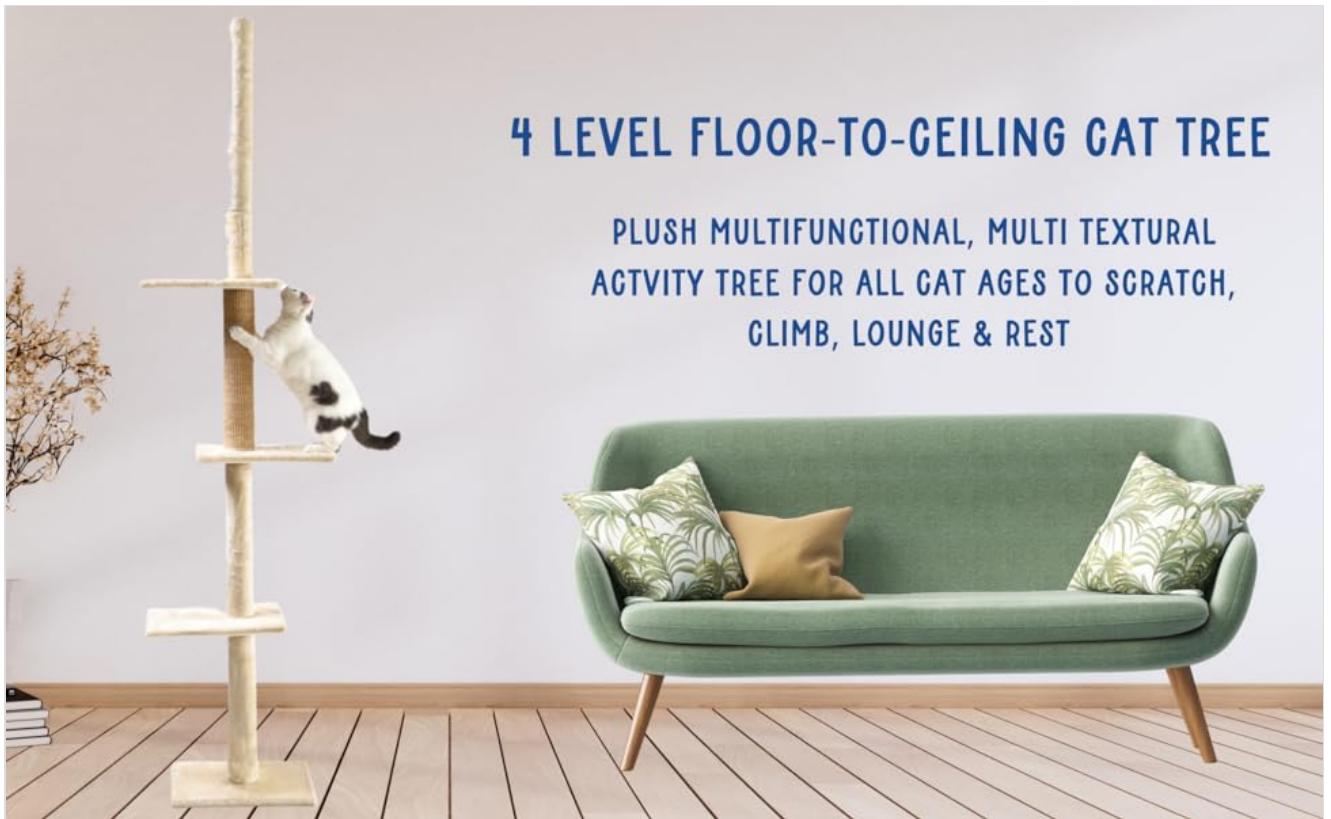

This image displays the complete Cat Craft Three Tier Floor-to-Ceiling Cat Tree, showcasing its multi-level design and neutral earth-tone carpeting. The tree extends vertically with multiple platforms and a tension rod at the top for ceiling stability.

OPERATING INSTRUCTIONS

The Cat Craft Floor-to-Ceiling Cat Tree is designed for your cat's enjoyment and activity. Once assembled and secured, your cat can use it for:

- **Climbing:** The multi-tiered design encourages natural climbing behavior.
- **Scratching:** The carpeted posts provide an appropriate surface for scratching, helping to maintain claw health and protect household furniture.
- **Lounging and Resting:** The elevated platforms offer comfortable spots for your cat to observe its surroundings or rest.

4 LEVEL FLOOR-TO-CEILING CAT TREE

PLUSH MULTIFUNCTIONAL, MULTI TEXTURAL
ACTIVITY TREE FOR ALL CAT AGES TO SCRATCH,
CLIMB, LOUNGE & REST

A cat is shown actively climbing on the Cat Craft Floor-to-Ceiling Cat Tree, demonstrating its use for feline exercise and exploration within a home environment.

MAINTENANCE

- **Cleaning:** Spot clean carpeted areas with a mild pet-safe cleaner and a damp cloth. Avoid saturating the material. Allow to air dry completely.
- **Stability Check:** Periodically check the tension rod and all connections to ensure the cat tree remains stable. Re-tighten if any looseness is detected.
- **Carpet Wear:** Over time, the carpeted surfaces may show wear from scratching. This is normal. Replacement posts may be available from the manufacturer.

TROUBLESHOOTING

Issue: Cat tree wobbles or feels unstable.

Solution: Ensure the tension rod at the top is fully extended and tightened against the ceiling. Check that all screws connecting the posts and platforms are secure. If the ceiling is uneven, try repositioning the tree slightly. This product is designed to be secured by tension, and some slight movement may occur during active use, but it should not feel unstable.

Issue: Carpet is fraying or showing significant wear.

Solution: This is a normal result of your cat using the tree for scratching. Continue to monitor the wear. If the integrity of the tree is compromised, consider replacing worn components or the entire unit. Replacement posts may be available.

Issue: Cat is not using the tree.

Solution: Encourage your cat by placing treats or toys on the platforms. You can also use catnip to attract them to the scratching posts. Ensure the tree is in a location your cat feels comfortable and safe.

SPECIFICATIONS

Feature	Detail
Model Number	Modern cat tree 01
Product Dimensions	60.96 x 35.56 x 44.45 cm (24 x 14 x 17.5 inches)
Weight	8.16 kg (18 lbs)
Material	Carpet
Mounting Type	Ceiling Mount (Tension Rod)
Ceiling Height Compatibility	Up to 9 feet (2.74 meters)
Color	Earth Tones
