TROUBLESHOOTING

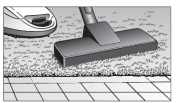

Reduced Suction or Difficulty Gliding

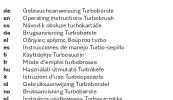

- **Check for Blockages:** Ensure there are no large debris items or clogs within the brush head's suction opening or the vacuum wand.
- **Clean Bristles:** Accumulated hair or lint on the bristles can impede smooth gliding and reduce effectiveness. Refer to the Maintenance section for cleaning instructions.
- **Verify Attachment:** Confirm the floor brush is securely attached to the vacuum wand. A loose connection can lead to air leaks and reduced suction.
