3. SETUP AND INSTALLATION

Image 1: The Vanguard QS-39 Quick Release Plate, featuring a 1/4-inch camera mounting screw and a textured black surface for secure camera attachment.

3.1 Attaching the Quick Release Plate to Your Camera

1. Locate the 1/4"-20 camera mounting screw on the QS-39 plate.
2. Align the screw with the tripod socket on the bottom of your camera.
3. Insert the screw into the camera's tripod socket and turn it clockwise to tighten. Ensure the plate is securely fastened to the camera to prevent rotation or accidental detachment. A coin or flat-head screwdriver may be used to fully tighten the screw if it does not have a flip-up handle.

3.2 Attaching the Camera (with Plate) to the Tripod Head

1. Ensure your Vanguard tripod head's quick release clamp is open.
2. Slide the QS-39 plate, with the camera attached, into the quick release clamp on your tripod head.

3. Engage any secondary safety locks if present on your tripod head.
4. Tighten the locking knob on your tripod head's quick release clamp until the plate and camera are firmly secured. Verify that the camera is stable and cannot move or detach unexpectedly.

4. OPERATING INSTRUCTIONS

Once the QS-39 Quick Release Plate is securely attached to your camera and mounted on a compatible Vanguard tripod head, your camera is ready for use. To remove the camera from the tripod head, loosen the quick release clamp's locking knob and disengage any safety locks, then slide the plate and camera out. 7. TROUBLESHOOTING

Issue: Plate does not stay tight on the camera or tripod head.

- **Check Screw Tightness:** Ensure the 1/4"-20 screw is fully tightened into your camera's tripod socket. Use a coin or flat-head screwdriver for maximum torque.
- **Verify Clamp Engagement:** Confirm that the quick release clamp on your tripod head is fully closed and its locking knob is securely tightened.
- **Compatibility Check:** Double-check that your tripod head is listed as compatible with the QS-39
