# Ferplast Tubes Instruction Manual

Model: 8010690057163

## INTRODUCTION

The Ferplast Tubes are designed to extend and enhance small animal habitats, such as those for hamsters and mice. These accessories allow for the creation of additional pathways and play areas, promoting activity and preventing boredom for your pet. This manual provides instructions for the proper setup, use, and maintenance of your Ferplast Tubes.

## PRODUCT COMPONENTS

The Ferplast Tubes system includes various tunnel types and connectors to customize your pet's habitat. Components may include:

- Various tunnel sections for horizontal or vertical pathways.
- Connectors to join tunnel sections and attach them to existing habitats.
- End caps (FPI 4820) to close off unused openings.

*Image: A clear plastic Ferplast tube connector piece with a blue ring, designed to link habitat sections. This component facilitates the expansion of small animal cages.*

## SETUP INSTRUCTIONS

1. **Inspect Components:** Before assembly, carefully inspect all tube sections and connectors for any cracks, sharp edges, or damage. Do not use damaged components.
2. **Plan Your Layout:** Determine the desired configuration for your extended habitat. Consider your pet's movement patterns and ensure easy access for cleaning.
3. **Connect Tubes:** Align the connector pieces with the openings on your existing habitat or other tube sections. Gently push and twist until the components are securely interlocked. Ensure a snug fit to prevent escape or injury.
4. **Secure End Caps:** If any openings are not used for further expansion, attach the FPI 4820 End Caps to prevent your pet from exiting the habitat or getting stuck.
5. **Stability Check:** Once assembled, gently test the stability of the entire structure. Ensure all connections are firm and the tubes do not wobble.

## OPERATING GUIDELINES

Ferplast Tubes are designed for continuous use within your pet's habitat. Ensure the tubes are always accessible to your pet for exploration and activity. Regularly observe your pet's interaction with the tubes to ensure they are comfortable and safe. This product is intended for all-day use as part of an enriched environment.

## Maintenance and Care

To ensure a hygienic environment for your pet, regular cleaning of the Ferplast Tubes is essential.

- **Cleaning Frequency:** Clean the tubes regularly, ideally during your routine habitat cleaning.
- **Cleaning Method:** The tubes should be cleaned by hand washing only. Use warm water and a mild, pet-safe soap. Avoid harsh chemicals or abrasive cleaners.
- **Rinsing:** Rinse all components thoroughly to remove any soap residue.
- **Drying:** Allow all parts to air dry completely before reassembling them into the habitat. Ensure no moisture remains, as this can lead to mold or mildew.

## Troubleshooting

If you encounter issues with your Ferplast Tubes, consider the following:

- **Loose Connections:** If tubes become disconnected, ensure they are pushed and twisted firmly into place. Check for any obstructions preventing a secure fit.
- **Cracks or Damage:** If any component arrives damaged or develops cracks during use, discontinue use immediately and replace the affected part. Damaged plastic can have sharp edges that may injure your pet.
- **Compatibility:** Ensure the tubes and connectors are compatible with your specific Ferplast habitat model. While designed for Ferplast habitats, variations may exist.

## Specifications

Brand	Ferplast
Model Name	Ferplast Tubes
Model Number	8010690057163
ASIN	B001N03RRY
Material	Plastic
Color	Clear
Item Dimensions (LxWxH)	3.15 x 3.15 x 1.18 inches
Item Weight	1.06 ounces (0.03 Kilograms)
Care Instructions	Hand Wash Only
Target Audience	Hamsters, Small Breeds

## Warranty Information

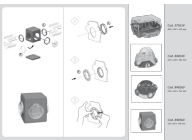

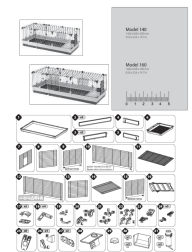

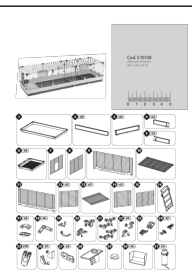

This product is sold without an explicit warranty. Please inspect the product upon receipt for any manufacturing defects or damage. For issues with new products, contact your retailer or point of purchase immediately.

## SUPPORT AND CONTACT
