## Broan-NuTone C350GN

# Broan-NuTone C350GN Grille for NuTone 695 and 696N Ventilation Fan

Model: C350GN | Brand: Broan-NuTone

## INTRODUCTION

This instruction manual provides detailed guidance for the installation, operation, and maintenance of your Broan-NuTone C350GN replacement grille. This grille is specifically designed for compatibility with NuTone ventilation fan models 695 and 696N. Proper installation and care will ensure optimal performance and longevity of your ventilation system.

## PRODUCT FEATURES

- **High-Quality Replacement:** Durable construction designed for long-lasting use.
- **Attractive Design:** Features a white finish for a clean and elegant appearance that complements various decors.
- **Easy Installation:** Engineered for straightforward replacement, minimizing installation effort.

## COMPATIBILITY

The Broan-NuTone C350GN grille is compatible with the following NuTone ventilation fan models:

- NuTone 695
- NuTone 696N

This grille is designed for fan housings measuring approximately 7.25 inches by 7.5 inches. The grille itself measures 8.75 inches by 9.125 inches.

## WHAT'S IN THE BOX

Your package should contain the following item:

- 1 x Broan-NuTone C350GN Replacement Grille

## SETUP AND INSTALLATION

Follow these steps to install your new Broan-NuTone C350GN replacement grille. Ensure power to the fan is turned off at the circuit breaker before beginning installation.

1. **Remove Old Grille:** Carefully pull down the existing grille from the fan housing. Most grilles are held in place by spring clips. Gently squeeze the spring clips together to release them from the housing slots and remove the old grille.
2. **Identify Model Number (if needed):** If you are unsure of your fan model, look inside the metal housing for a label that indicates the model number (e.g., 695 or 696N). This ensures you have the correct replacement grille.
3. **Unplug Motor (if applicable):** If your fan has a light or other electrical components connected to the grille, carefully unplug the motor or light assembly from the pass-through plug inside the housing. For grilles without lights, this step is not necessary.
4. **Attach New Grille Springs:** The new grille comes with spring clips. Attach one side of the spring clip to the designated slot on the new grille.

5. **Connect Electrical (if applicable):** If your new grille includes a light or other electrical components, plug the motor/light assembly into the pass-through plug inside the fan housing.
6. **Install New Grille:** Squeeze the spring clips on the new grille and insert them into the slots in the fan housing. Push the grille firmly upwards until it sits flush against the ceiling.

Video: Watch this official Broan-NuTone video for a visual guide on how to freshen up your bathroom with a new bath fan cover, demonstrating the installation process.

## OPERATING INSTRUCTIONS

The Broan-NuTone C350GN grille is a passive component of your ventilation system. Once installed, its operation is directly tied to the ventilation fan it covers. Simply turn on your ventilation fan as you normally would to activate airflow through the grille.

## MAINTENANCE

Regular cleaning of your grille is recommended to maintain optimal airflow and appearance.

1. **Turn Off Power:** Always ensure the power to the ventilation fan is turned off at the circuit breaker before performing any maintenance.
2. **Remove Grille:** Gently pull down the grille and squeeze the spring clips to detach it from the fan housing.
3. **Clean Grille:** Wash the grille with mild soap and water. For stubborn dirt or dust, a soft brush can be used. Avoid abrasive cleaners that may damage the finish.
4. **Dry Thoroughly:** Ensure the grille is completely dry before re-installing.
5. **Re-install Grille:** Align the spring clips with the housing slots and push the grille back into place until it is flush with the ceiling.

## TROUBLESHOOTING

If you encounter issues with your Broan-NuTone C350GN grille, consider the following:

- **Grille Does Not Fit:** Double-check the model number of your existing fan and the dimensions of its housing. Ensure it matches the compatible models (NuTone 695 or 696N) and housing dimensions (7.25" x 7.5").
- **Grille Falls Down:** Ensure the spring clips are properly engaged in the housing slots. The clips may need to be bent slightly outwards to create a tighter fit if they have become loose over time.
- **Reduced Airflow:** This is typically related to the fan motor or ductwork, not the grille itself. However, a dirty grille can restrict airflow. Ensure the grille is clean and free of dust and debris.

## SPECIFICATIONS

Feature	Specification
Model Number	C350GN
Brand	Broan-NuTone
Product Dimensions (L x W x H)	8.75" x 3.12" x 9.13"
Grille Size (Approximate)	8.75" x 9.125"
Compatible Fan Housing Size	7.25" x 7.5"
Material	Plastic
Color	White
Item Weight	3.84 ounces
UPC	026715178858
