ASSEMBLY AND SETUP

1. **Unboxing:** Carefully remove the Punisher action figure and all accessories from the packaging. Retain packaging for future reference or storage.
2. **Attaching Accessories:** The figure comes with various accessories. Gently insert weapons into the figure's hands or attach interchangeable hands as desired. Ensure a snug fit without forcing.
3. **Build-A-Figure Part:** The included Nemesis Left Arm is one piece of a larger Build-A-Figure. Collect other figures in the Nemesis series to complete the full Nemesis figure. Instructions for assembling the complete Build-A-Figure are typically found with the final piece or on the packaging of the Build-A-Figure series.

POSING AND DISPLAY

The Punisher action figure features multiple points of articulation for dynamic posing. To pose your figure:

- **Joint Movement:** Gently manipulate the joints (neck, shoulders, elbows, wrists, torso, hips, knees, ankles) to achieve desired poses.
- **Initial Stiffness:** Some joints may be stiff initially. Apply gentle, consistent pressure to loosen them. Avoid excessive force to prevent breakage.
- **Stability:** For standing poses, ensure the figure's feet are flat on a stable surface. Adjust leg and foot articulation for balance.

CARE AND STORAGE

- **Cleaning:** Wipe the figure with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid harsh chemicals or abrasive cleaners.
- **Avoid Extreme Conditions:** Do not expose the figure to direct sunlight for prolonged periods, high temperatures, or excessive moisture, as this can cause discoloration or damage.
- **Storage:** Store the figure in a cool, dry place, away from dust. Original packaging can be used for protection during storage.

TROUBLESHOOTING

If you encounter any issues with your figure, consider the following:

- **Stiff Joints:** If a joint is too stiff, carefully apply a small amount of heat (e.g., from a hairdryer on a low setting, held at a safe distance) to the joint area for a few seconds. This can soften the plastic and allow for easier movement. Test movement gently after heating.
- **Loose Joints:** For excessively loose joints, a small drop of clear nail polish or a specialized joint-tightening fluid can be applied to the joint and allowed to dry. This creates friction and tightens the joint.
- **Accessories Not Fitting:** Ensure you are using the correct accessory for the intended slot. Do not force accessories, as this may cause damage.
