**Wheelock WPBB-R**

# Wheelock WPBB-R Weather Resistant Back-Box User Manual

Model: WPBB-R

## Introduction

This manual provides essential information for the proper installation, operation, and maintenance of the Wheelock WPBB-R Weather Resistant Back-Box. The WPBB-R is designed for outdoor use and is weatherproof, specifically intended for mounting ASWP Horn Strobes. It includes a weep hole and plug for drainage.
Please read this manual thoroughly before installation and retain it for future reference.

## Safety Information

**WARNING:** Installation must be performed by qualified personnel in accordance with all local and national electrical codes and regulations. Failure to do so may result in property damage, serious injury, or death.

- Always disconnect power before installing or servicing the device.
- Ensure all connections are secure and properly insulated.
- Do not modify the product in any way. Use only genuine Wheelock accessories and parts.
- This back-box is designed for outdoor, weatherproof use. Ensure proper sealing during installation to maintain its weather resistance.

## Product Overview

The Wheelock WPBB-R is a durable, red-colored metal back-box specifically designed to house Wheelock ASWP Horn Strobes in outdoor environments. Its robust construction and weatherproof features ensure reliable performance in various weather conditions.

*Figure 1: Wheelock WPBB-R Weather Resistant Back-Box. This image shows the red metal back-box from an angled top-down perspective, revealing its square shape, internal mounting points, and the grey gasket around the opening.*

## Key Features:

- Designed for use with Mounting ASWP Horn Strobes.
- Suitable for Outdoor USE/Weatherproof applications.
- Includes a WEEP Hole and Plug for moisture drainage.
- Constructed from durable metal with a powder-coated finish.

## Setup and Installation

The WPBB-R back-box is designed for screw-in installation. Follow these general steps for proper setup:

1. **Site Selection:** Choose a suitable outdoor location that provides adequate support for the back-box and the ASWP Horn

Strobe. Ensure the surface is flat and stable.

2. **Mounting Preparation:** Mark the drilling points on the mounting surface using the back-box as a template. Ensure the weep hole, if used, is oriented downwards for proper drainage.
3. **Drilling:** Drill appropriate pilot holes for the mounting screws.
4. **Secure Back-Box:** Attach the WPBB-R back-box to the mounting surface using suitable screws (not included). Ensure it is securely fastened and level.
5. **Wiring:** Route the necessary wiring into the back-box through the designated entry points. Ensure all wiring complies with local electrical codes.
6. **Install ASWP Horn Strobe:** Mount the ASWP Horn Strobe onto the WPBB-R back-box, ensuring a tight and weatherproof seal. The back-box includes a gasket to aid in weather resistance.
7. **Weep Hole Management:** The back-box includes a weep hole and a plug. For outdoor installations where moisture drainage is desired, ensure the weep hole is clear and positioned at the lowest point. If not needed or if a sealed enclosure is required, insert the provided plug.
8. **Final Check:** Verify all connections are secure and the installation is robust.

## Operating

The Wheelock WPBB-R is a passive component designed to provide a weatherproof enclosure for ASWP Horn Strobes. It does not have active operational controls. Its function is to protect the mounted device from environmental elements.
Once properly installed, the back-box continuously performs its protective function. The operation of the ASWP Horn Strobe itself is independent of the back-box, beyond providing a secure and protected mounting point.

## Maintenance

The Wheelock WPBB-R back-box requires minimal maintenance. Regular inspections are recommended to ensure its continued integrity and performance, especially in harsh outdoor environments.

- **Visual Inspection:** Periodically inspect the back-box for any signs of physical damage, corrosion, or wear. Check the integrity of the powder-coated finish.
- **Seal Integrity:** Ensure the gasket and seal between the back-box and the mounted ASWP Horn Strobe remain intact and free from cracks or degradation. A compromised seal can lead to water ingress.
- **Weep Hole:** If the weep hole is utilized, ensure it remains clear of debris (e.g., dirt, leaves, insect nests) to allow for proper drainage.
- **Cleaning:** Clean the exterior of the back-box with a soft, damp cloth as needed to remove dirt or grime. Avoid abrasive cleaners or solvents that could damage the finish.
- **Mounting Security:** Verify that the back-box remains securely fastened to its mounting surface. Tighten any loose screws if necessary.

## Troubleshooting

As a passive enclosure, the WPBB-R back-box itself typically does not experience "malfunctions." Most issues would relate to its protective function or physical integrity.

| Problem | Possible Cause | Solution |
| --- | --- | --- |
| Water/Moisture inside the back-box | Compromised seal/gasket; improperly installed weep plug; weep hole blocked. | Inspect and replace damaged gasket. Ensure weep plug is properly seated or removed if drainage is desired. Clear any obstructions from the weep hole. Re-seal the ASWP Horn Strobe to the back-box. |

| Problem | Possible Cause | Solution |
|---|---|---|
| Back-box is loose on mounting surface | Loose mounting screws; inadequate mounting surface. | Tighten all mounting screws. If the surface is inadequate, consider reinforcing it or relocating the installation. |
| Visible corrosion or damage to back-box | Environmental exposure; physical impact. | Assess the extent of damage. Minor surface corrosion on the powder coat may be cleaned and touched up. Significant damage may require replacement of the back-box to ensure continued protection. |

## Specifications

| Attribute | Detail |
|---|---|
| **Model Number** | WPBB-R |
| **Brand** | Wheelock |
| **Material** | Metal |
| **Color** | Red |
| **Finish Type** | Powder Coated |
| **Installation Type** | Screw-In |
| **Product Dimensions** | 2 x 5 x 5 inches |
| **Item Weight** | 8 ounces |
| **Manufacturer** | EATON CORPORATION |
| **UPC** | 786697090141 |
| **Compatibility** | Designed for Wheelock ASWP Horn Strobes |
| **Environmental Rating** | Outdoor USE/Weatherproof |

## Warranty and Support

For warranty information and technical support regarding your Wheelock WPBB-R Weather Resistant Back-Box, please refer to the official Wheelock or Eaton Corporation website, or contact their customer service directly.
**Manufacturer:** EATON CORPORATION (Wheelock is a brand of Eaton)
Please have your model number (WPBB-R) and UPC (786697090141) available when contacting support.
You can often find support contact details and product documentation on the manufacturer's official website:

FREQUENTLY ASKED TECHNICAL QUESTIONS

FIRE NOTIFICATION APPLIANCE CIRCUITS (NAC)
SERVICE & MAINTENANCE

| NUMBER | QUESTION | ANSWER |
|---|---|---|
| 1 | **"I am synchronizing using a Wheelock Synchronization module (SM-12/24 and/or DSM-12/24) and using Series AS, NS and RSS appliances. My audible chirped once then shut down."** | Check the audible connections on the sync module for proper polarity. In addition check the audible connections for both forward polarity during alarm. Ensure that voltage is not a pulsed voltage such as a temporal pattern or march time. |
| 2 | **"I have 10 DSM Modules and they are not syncing together. How do I get them all to sync at the same time?"** | You need to connect each DSM module through the plus (+) and minus (-) interconnection terminals of each DSM module. |
| 3 | **" Why aren't the interconnection terminals on the DSM Module tighten?"** | Those terminals utilize a self-tapping screw. Apply pressure when you are tightening the screw. |
| 4 | **"On the PS-12/24-8 Power Booster, everything is working fine but I notice the LED on the logic board is blinking lightly"** | This is normal. |
| 5 | **" I would like to parallel two of the outputs on the PS-12/24-8 Power Booster to give me a 4 Amp output"** | You can parallel either outputs 1&2 or 3&4 to give you a 4 Amp output. |
| 6 | **"I wired the PS-12/24-8 for AC Fail and Battery Fail. It's been 2 minutes already and it hasn't given me a trouble."** | It takes approximately 5 minutes for the Power Booster to change state. |
| 7 | **"I want the PS-12/24-8 to report a ground fault. How do I wire the Power Booster to give me that?"** | Connect a single wire from the negative (-) side of the AUX terminal to the chassis ground located by the Transformer within the panel. |
| 8 | **"I have the Series NS and my hole in the wall is just a little bit too big. What do I do?"** | Use the NA/TP Trim Plate. |
| 9 | **"How do I connect multiple PS-12/24-8 Power Boosters with Class "B" wiring without the silence option?"** | Wire to Input 1, then take a jumper wire out of TS return to input 2, then from TS return to input 3, and so on. Then connect out of output 4 to the input 1 of the next booster, pulling the EOLR on the last booster and set the DIP switch according to the Instruction Manual. |
| 10 | **" I have one of your signals installed on a job. It's not working. What should I do?"** | Take the appliance out of the NAC Circuit. Use either a power supply or a 24 VDC battery and connect the appliance to the power source. If it does not function then most likely the appliance is defective. You need to replace the appliance. Try to test the each appliance after appliance before installing it into the Fire Alarm System. |

COOPER Wheelock

Weatherproof Appliances - Series AH Audibles, AS Audible Strobes, MT Multitone Strobes, RSS Strobes and ET70 Speaker Strobes and Weatherproof Mounting Accessories

**Description:**

Designed for life safety, performance and reliability, Cooper Wheelock's cost effective weatherproof notification appliances include:

| Weatherproof Appliances | Series |
|---|---|
| Strobes | RSSWP |
| Horn Strobes | ASWP |
| Horns | AH-24WP, AH-12WP |
| Multitone Horn Strobes | MTWP |
| Multitone Horns | MT |
| Speaker Strobes | ET70WP |
| Speakers | ET70WP |

All Series models are UL dual listed - meeting both UL1638 and UL1971 requirements. As dual listed appliances, these weatherproof strobes, horn strobes and speaker strobes are listed for outdoor applications under UL 1638 as well as under UL 1971, the Standard for Safety Signaling Devices for Hearing Impaired. With an extended temperature range of -31°F to 150°F (-35°C to 66°C), these appliances are suitable for use in harsh outdoor test requirements for rain, humidity and corrosion resistance while providing multiple strobe intensity options, including the highest strobe ratings available for area coverage per NFPA 72 strobe spacing tables (up to 185 candela for wall mounting and 177 candela for ceiling mounting).

To enable weatherproof mounting, Cooper-Wheelock provides the optional WP-KIT gasket kit for surface mounting and WP-KIT-FM for semi-flush installation. Models are available for surface mounting to Wheelock weatherproof backboxes on walls or ceilings. The optional WP-KIT allows the weatherproof backboxes (IOB, WPBB or WPSBB) to be mounted to a recessed electrical box for concealed conduit installation. For semi-flush installation, the WPA and WPFA kits allow a customer to mount the weatherproof appliances to a standard single-gang, flush mount box or to a weatherproof backbox. See the Backboxes, Plates and Gaskets Table on page three of this document for a summarization of these mounting options and the required accessories.

When used in conjunction with Wheelock PS-24-8MC Power Supplies or SMDSM Sync Modules, the Wheelock weatherproof appliances can be synchronized to meet NFPA 72 synchronization requirements. The horn output of horn strobes can be independently controlled on 2-wire circuits using the Wheelock patented sync protocol. MTWP horn strobe models are 4-wire appliances; the strobe can be synchronized while the audible can be connected to a coded fire alarm system or can be set to produce any of eight selectable tones.

**Features:**

- Approvals include: UL Standards 1971, 1638, 464 and 1480 California State Fire Marshal (CSFM) and New York City (MEA). Factory Mutual (FM) and Chicago (BFP). See agency approvals by model number on page two of this document.
- Compliant with the following requirements: NFPA, UFC, ANSI 117.1, OSHA Part 29, 1910.165, ADA.
- Weatherproof with extended temperature range of -31°F to 150°F (-35°C to 66°C).
- Dual Listed strobe models (UL 1638 and UL 1971)
- Industry's highest strobe candela options
- Synchronization capability using Series SM, DSM Synch Modules (MTWP and MT-12/24 audible is non-sync)
- Models with field selectable tone, dBA and candela settings
- Wall or ceiling mounting options
- Surface of semi-flush mounting
- IN/OUT wiring termination accepting two #12-18 AWG wires at each terminal

CSFM Listings
Instructions
To obtain a PDF of a required CSFM Listing:
Locate the product in the tables below to find its CSFM Listing number(s).
For example: The D7412GV4 has a CSFM Listing number of 7165-1615:0242.
Since some products are listed as components of a system, also look under the Control Panel system you are using.
Click this link to go to the CSFM Building Materials Listings Search page – Link to search page.
For Category, double click to highlight the ~ALL Listings~ and enter the first four numbers of the CSFM Listing number.
For our example, you would enter 7165.
For Company, double click to highlight the ~ALL Listings~ and enter the next four numbers of the CSFM Listing number.
For our example, you would enter 1615.
For Listing, use the pull down and click on the CSFM Listing number that you want.
Click Search to display the CSFM document information.
Double click on the listing numbers to open or save the PDF.
