uni PC1M12C

uni Posca PC-1M Acrylic Paint Markers Instruction Manual

Model: PC-1M12C - Set of 12 Extra Fine Point Assorted Colors

INTRODUCTION

The uni Posca PC-1M Acrylic Paint Markers are versatile, water-based paint pens designed for a wide range of creative projects. Featuring an extra-fine 0.7mm bullet tip, these markers are suitable for detailed work, outlining, coloring, and adding precise markings on over 50 different surfaces. The non-toxic, water-based pigment formula is alcohol-free, waterproof, and lightfast, ensuring vibrant and lasting results.

SETUP

- Shake Well:** Before each use, ensure the cap is securely on and shake the marker vigorously. This mixes the paint pigment for consistent color flow.
- Prime the Tip:** Press the tip down several times on a scrap piece of paper until the paint begins to flow. This saturates the tip with ink.
- Reversible Tip:** The PC-1M markers feature a reversible tip. If the tip becomes worn or dry, you can pull it out and flip it to use the other side.

OPERATING

Posca PC-1M markers are designed for precision and versatility. Their extra-fine tip allows for detailed work, while the opaque, water-based paint provides excellent coverage.

- **Surface Compatibility:** These markers work on a wide variety of surfaces including wood, metal, paper, rocks, plastic, canvas, ceramic, glass, and fabric.
- **Application:** The 0.7mm bullet tip is ideal for drawing fine lines, outlining, and filling in small areas. You can achieve graphic calligraphy effects or color wide areas with precision.
- **Layering and Blending:** Posca paint is layerable. For best results when layering colors, allow each layer to dry completely before applying the next to prevent blending. The water-based ink can also be diluted with water for blending effects before it dries.
- **Drying Time:** The paint dries quickly. On porous surfaces, it becomes permanent. On most smooth, non-porous materials, it can be erased.

MARKS ON 50+ SURFACES

Wood ▪ Metal ▪ Paper ▪ Rocks
Plastic ▪ Canvas ▪ Ceramic
Glass ▪ Fabric ▪ So Much More

Video: A time-lapse demonstration of creating a hand-drawn calendar using Posca markers, highlighting their precision for grid lines and text.

MAINTENANCE

- **Cap Securely:** Always replace the cap tightly after use to prevent the tip from drying out and to preserve the ink.
- **Clean Tips:** If the tip becomes clogged or dirty, it can be removed and rinsed with water. Ensure it is completely dry before reinserting.
- **Storage:** Store markers horizontally to ensure even ink distribution to the tip.

TROUBLESHOOTING

- **No Ink Flow:** If the marker is new or has not been used for a while, shake it well and re-prime the tip by pressing it down on scrap paper until the paint flows.
- **Uneven Color:** Ensure the marker is thoroughly shaken before use to mix the pigment evenly.
- **Worn Tip:** The PC-1M tip is reversible. If one side is worn, remove and flip the tip to use the fresh side.

SPECIFICATIONS

- **Model:** PC-1M12C
- **Tip Type:** Extra Fine Bullet Tip (0.7mm)
- **Ink Type:** Water-based pigment ink (non-toxic, alcohol-free, waterproof, lightfast)
