3. Setup

3.1 Battery Installation

The remote control requires two (2) AAA batteries (not included) for operation. Follow these steps to install the batteries:

1. Locate the battery compartment cover on the back of the remote control.
2. Press down on the tab and slide the cover off.
3. Insert two AAA batteries, ensuring the positive (+) and negative (-) terminals align correctly with the markings inside the compartment.
4. Slide the battery compartment cover back into place until it clicks securely.

Note: *Always use new batteries and replace both batteries at the same time. Do not mix old and new batteries or different types of batteries. Remove batteries if the remote will not be used for an extended period.*

3.2 Initial Use

This replacement remote control is pre-programmed for Tensai TCT-524BK televisions. No additional programming is typically required. Simply insert the batteries and point the remote towards your television to begin operation.

4. Operating Instructions

5. Maintenance

5.1 Cleaning

To clean your remote control, use a soft, dry cloth. For stubborn dirt, slightly dampen the cloth with water or a mild, non-abrasive cleaner. Do not use harsh chemicals or abrasive materials, as these can damage the remote's surface or internal components.

5.2 Battery Replacement

When the remote control's performance degrades or it stops responding, it is likely time to replace the batteries. Refer to Section 3.1 for battery installation instructions. Always replace both batteries simultaneously.

5.3 Storage

If the remote control will not be used for an extended period, remove the batteries to prevent leakage, which can damage the device. Store the remote in a cool, dry place away from direct sunlight and extreme temperatures.

6. Troubleshooting

If you experience issues with your remote control, please refer to the following common solutions:

Problem	Possible Cause	Solution
Remote control is not working.	Dead or incorrectly installed batteries.	Check battery polarity. Replace with new AAA batteries.
Remote control has limited range or intermittent response.	Weak batteries, obstruction between remote and TV, or remote too far from TV.	Replace batteries. Ensure a clear line of sight to the TV's IR receiver. Move closer to the TV.
Certain buttons do not function.	Button stuck, or specific function not supported by your TV model.	Gently press the button multiple times to dislodge any debris. Confirm the function is available on your TV.
Remote control is physically damaged.	Impact or liquid exposure.	Physical damage is typically not repairable. Consider replacing the remote.
