Premier King Size Cigarette Tubes Instruction Manual

Model: C741P

1. INTRODUCTION

This instruction manual provides essential information for the proper handling and use of Premier King Size Cigarette Tubes. These tubes are designed for use with compatible cigarette filling machines to create custom-filled cigarettes. Please read this manual thoroughly before use to ensure optimal results and product longevity.

2. PRODUCT OVERVIEW

Premier King Size Cigarette Tubes are high-quality filtered tubes, designed to provide a consistent experience when used with a suitable cigarette filling machine. Each pack contains 200 filtered tubes, and this product is typically sold in multi-packs, such as a 5-pack containing a total of 1000 tubes.

This image displays a white and blue box of Premier Supermatic 200 Filtered Cigarette Tubes, King Size. Below the box, several white, empty cigarette tubes and a few filled, finished cigarettes are shown, illustrating the product and its intended use.

3. SETUP AND PREPARATION

- 1. Unpack Carefully:** Gently remove the cigarette tubes from their packaging. Handle them with care to avoid crushing or bending.
- 2. Inspect Tubes:** Before loading, visually inspect each tube for any damage, such as creases or tears. Damaged tubes may not fill correctly.
- 3. Prepare Filling Machine:** Ensure your cigarette filling machine is clean and ready for use according to its own instruction manual. Verify that it is compatible with King Size cigarette tubes.

4. OPERATING INSTRUCTIONS

These tubes are designed to be used with a mechanical or electric cigarette filling machine. The general steps for filling are as follows:

- 1. Load Tobacco:** Place your preferred tobacco into the tobacco chamber of your filling machine. Ensure the tobacco is properly shredded and has an appropriate moisture content for optimal filling.

2. **Insert Tube:** Carefully slide a Premier King Size Cigarette Tube onto the nozzle or injector of the filling machine. Ensure the tube is fully seated without being forced or bent.
3. **Initiate Filling:** Operate your filling machine according to its specific instructions. This typically involves pulling a lever or pressing a button to inject the tobacco into the tube.
4. **Remove Filled Cigarette:** Once filled, gently remove the completed cigarette from the machine.
5. **Repeat:** Continue the process for additional tubes.

Note: For best results, refer to the specific operating instructions provided with your cigarette filling machine.

5. MAINTENANCE AND STORAGE

- **Storage:** Store unused cigarette tubes in their original packaging in a cool, dry place, away from direct sunlight and excessive humidity. This helps prevent damage and preserves their integrity.
- **Handling:** Always handle tubes gently to avoid crushing, which can make them unusable.

6. TROUBLESHOOTING

- **Tubes Crushing During Filling:**
 - Ensure the tube is properly seated on the machine's nozzle.
 - Check if the tobacco is too tightly packed or too moist, which can create resistance.
 - Inspect the machine's nozzle for any obstructions or damage.
- **Difficulty Inserting Tubes:**
 - Verify that you are using King Size tubes, compatible with your machine.
 - Ensure the tube opening is not bent or damaged.
- **Inconsistent Filling:**
 - Check the consistency and moisture of your tobacco.
 - Clean your filling machine thoroughly, as tobacco residue can affect performance.

7. SPECIFICATIONS

Feature	Detail
Brand	Premier
Model Number	C741P
Tube Size	King Size
Quantity per Pack	200 Filtered Cigarette Tubes
Material Feature	Plant Based
Product Dimensions (approx.)	3.5 x 8.5 x 2.5 inches (per 200-count box)
Item Weight (approx.)	10.8 ounces (for a 5-pack of 1000 tubes)

Feature	Detail
UPC / GTIN	066619001326
