

## Moulinex MT000501

# Moulinex MT000501 Vacuum Cleaner Bags and Microfilter Instruction Manual

Model: MT000501

## INTRODUCTION

---

This instruction manual provides essential information for the proper use and maintenance of your Moulinex MT000501 vacuum cleaner bags and microfilter. This product is designed to ensure optimal performance and filtration for compatible Moulinex Compacteo vacuum cleaner models.

The package includes six high-quality paper vacuum cleaner bags and one microfilter, essential components for effective dust collection and air purification during vacuuming.

## SAFETY INFORMATION

---

- Always ensure the vacuum cleaner is unplugged from the power outlet before attempting to change the dust bag or filter.
- Do not reuse disposable paper bags. Reusing bags can reduce suction efficiency and filtration, potentially damaging the vacuum cleaner.
- Dispose of used bags and filters responsibly according to local waste disposal regulations.
- Keep packaging materials away from children to prevent suffocation hazards.

## PACKAGE CONTENTS

---

Verify that all items are present in the package:

- 6 x Moulinex Paper Vacuum Cleaner Bags
- 1 x Moulinex Microfilter

This image displays the packaging for the Moulinex MT000501 product, which includes six paper vacuum cleaner bags and one microfilter. The packaging also indicates compatibility with Compacteo and Accessimo vacuum cleaner models.

## SETUP AND INSTALLATION

---

Follow these steps to correctly install the vacuum cleaner bag and microfilter:

1. **Unplug the Vacuum Cleaner:** Before opening any compartments, ensure your Moulinex Compacteo vacuum cleaner is unplugged from the electrical outlet to prevent accidental startup.
2. **Locate the Bag Compartment:** Refer to your vacuum cleaner's user manual to identify and open the dust bag compartment. This is typically located on the main body of the vacuum.
3. **Remove Old Bag and Filter:** Carefully remove the full dust bag and the old microfilter. Dispose of them properly.
4. **Install the New Microfilter:** Place the new microfilter into its designated slot. Ensure it sits flat and covers the filter area completely. The microfilter helps to trap fine dust particles and protect the motor.
5. **Insert a New Dust Bag:** Take one new paper bag from the package. Align the bag's cardboard collar with the bag holder inside the compartment. Push firmly until the bag is securely seated and sealed around the inlet opening. Ensure there are no gaps where dust could escape.
6. **Close the Compartment:** Close the dust bag compartment cover until it clicks securely into place. Do not force it if there is resistance; recheck the bag and filter placement.

## OPERATING INSTRUCTIONS

---

Once the new bag and microfilter are installed, your vacuum cleaner is ready for use:

- Plug the vacuum cleaner back into the electrical outlet.
- Operate your Moulinex Compacteo vacuum cleaner as described in its primary user manual.
- Monitor the dust bag full indicator on your vacuum cleaner (if available). This indicator will signal when the bag needs to be replaced.

## MAINTENANCE

---

Regular replacement of the dust bag and microfilter is crucial for maintaining your vacuum cleaner's performance and extending its lifespan.

- **Dust Bag Replacement:** Replace the dust bag when it is full, when suction power noticeably decreases, or when the dust bag full indicator activates. Do not wait until the bag is overflowing, as this can strain the motor and reduce cleaning effectiveness.
- **Microfilter Replacement:** The microfilter should be replaced periodically, typically with every set of 6 dust bags, or as recommended in your vacuum cleaner's specific manual. A clogged microfilter can restrict airflow and reduce suction.
- **Disposal:** Always dispose of used dust bags and microfilters in a sealed waste bin to contain dust and allergens.

## TROUBLESHOOTING

---

If you experience issues related to dust collection or suction, consider the following:

- **Reduced Suction Power:**
  - Check if the dust bag is full and needs replacement.
  - Inspect the microfilter for excessive dirt or clogging; replace if necessary.
  - Ensure the dust bag is correctly installed and sealed within its compartment.
  - Check for blockages in the vacuum cleaner hose or attachments (refer to your vacuum cleaner's manual).
- **Dust Leakage:**
  - Verify that the dust bag is properly seated and sealed around the inlet.
  - Ensure the dust bag compartment cover is fully closed and latched.
  - Check the microfilter for proper installation.

## SPECIFICATIONS

---

<b>Brand</b>	Moulinex
<b>Model Number</b>	MT000501
<b>Product Type</b>	Vacuum Cleaner Bags + Microfilter
<b>Material</b>	Paper
<b>Color</b>	White
<b>Quantity</b>	6 Dust Bags, 1 Microfilter
<b>Compatibility</b>	Moulinex Compacteo series (e.g., MO1517, MO1527, MO1533, MO1511014Q, MO1514014Q, MO151701, MO1517014Q, MO1519014Q, MO1521014Q, MO1523014Q, MO1533, MO153301, MO155501)
