### OPERATING INSTRUCTIONS

The potting bench provides a convenient workspace for various gardening tasks.

- **Working Surface:** Use the main tabletop surface for mixing soil, potting plants, or arranging gardening tools.
- **Soil Reservoir:** The integrated soil reservoir is designed to hold potting mix, keeping it contained and easily accessible during planting.
- **Tool Hooks:** Utilize the four hooks located on the upper frame to hang small gardening tools, gloves, or other accessories for easy access.
- **Lower Shelf:** The bottom shelf provides additional storage for larger bags of soil, empty pots, or other gardening supplies.

## CARE AND MAINTENANCE

Regular care will help maintain the appearance and functionality of your potting bench.

- **Cleaning:** Wipe down metal surfaces with a damp cloth to remove dirt and debris. For stubborn stains, a mild soap solution can be used, followed by rinsing and drying.
- **Rust Prevention:** While the bench features a powder-coated finish for durability, inspect for any scratches or chips that could expose bare metal to moisture, potentially leading to rust. Touch up any damaged areas with appropriate outdoor metal paint if necessary.
- **Storage:** During off-season or periods of prolonged harsh weather, it is recommended to store the potting bench in a covered area or use a protective cover to extend its lifespan. The foldable design allows for easier storage.
- **Soil Reservoir:** Empty and clean the soil reservoir bag periodically to prevent mold or mildew growth. Allow it to dry completely before storing or refilling.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Bench feels unstable or wobbly.	Not fully unfolded; placed on uneven ground; loose connections.	Ensure the frame is fully extended and locked. Move to a level surface. Check all connections for tightness.
Soil reservoir bag does not fit correctly.	Incorrect orientation; not fully expanded.	Verify the bag's orientation and ensure it is fully expanded and hooked onto all designated points.
Rust spots appearing on metal.	Scratches in powder coating; prolonged moisture exposure.	Clean and dry the area. Apply rust-inhibiting primer and outdoor metal paint to affected spots. Consider covering the bench during wet weather.
