

Graco 262805

Graco Magnum 262805 X7 Cart Airless Paint Sprayer Instruction Manual

Model: 262805

1. INTRODUCTION

This manual provides essential instructions for the safe and efficient operation, setup, maintenance, and troubleshooting of your Graco Magnum 262805 X7 Cart Airless Paint Sprayer. Please read this manual thoroughly before using the equipment to ensure proper usage and longevity of the product.

2. SAFETY INFORMATION

WARNING: Failure to follow these safety instructions could result in serious injury, property damage, or electric shock. Always prioritize safety when operating power tools.

- Always wear appropriate safety gear, including gloves, eye protection, and a respirator, when using this paint sprayer.
- Never point the spray gun at people or animals. High-pressure spray can cause severe injury.
- Keep the sprayer away from heat sources, open flames, and flammable materials.
- Always unplug the sprayer from the power source before cleaning, performing maintenance, or when not in use.
- Never operate the sprayer if the paint hose is damaged, kinked, or shows signs of wear. Replace damaged components immediately.
- Always store the sprayer in a cool, dry place, away from direct sunlight and extreme temperatures.
- Dispose of paint, cleaning materials, and waste according to local environmental regulations.
- Always follow the manufacturer's instructions for proper usage, maintenance, and disposal of all components.
- Use only genuine Graco parts and accessories to ensure optimal performance and safety.

3. COMPONENTS INCLUDED

Your Graco Magnum X7 Airless Paint Sprayer package includes the following items:

- SG2 Metal Spray Gun
- RAC IV 515 SwitchTip
- 25 ft. Duraflex paint hose

- Pump Armor storage fluid
- PowerFlush adapter
- Quick Start-Up Guide
- Operation Manual (this document)

Figure 1: The Graco Magnum X7 Airless Paint Sprayer, showcasing the main unit on its cart, the blue paint hose, and the spray gun.

4. SETUP INSTRUCTIONS

Follow these steps for initial setup of your paint sprayer:

1. **Unpacking and Inspection:** Carefully remove all components from the packaging. Inspect each part for any signs of damage. Do not use the sprayer if any components are damaged.
2. **Assemble Cart:** If not already assembled, securely attach the sprayer unit to the wheeled cart. Ensure all fasteners are tightened according to the Quick Start-Up Guide.
3. **Connect Hose:** Securely attach the 25 ft. Duraflex paint hose to the sprayer unit's outlet and then to the SG2 Metal Spray Gun. Hand-tighten connections, then use a wrench for a final snug fit to prevent leaks.
4. **Install Spray Tip:** Insert the RAC IV 515 SwitchTip into the spray gun guard, ensuring it is properly seated and locked into place.
5. **Prepare Paint:** Place the flexible suction tube directly into a 1 or 5-gallon paint bucket. Ensure the paint is thoroughly mixed and free of any debris that could clog the system.
6. **Power Connection:** Connect the sprayer to a grounded 110-volt AC power outlet. Ensure the power switch is in the 'OFF' position before plugging in.
7. **Priming the Pump:** Refer to the Quick Start-Up Guide for detailed instructions on priming the pump. This process removes air from the system, ensuring a smooth and consistent spray. The PushPrime feature assists in fast and reliable startup.

LESS OVERSPRAY AND UNMATCHED CONTROL

WITH TRUEAIRLESS® SPRAY TIPS

Figure 2: The flexible suction tube allows for direct spraying from a 1 or 5-gallon paint bucket, simplifying paint supply.

5. OPERATING INSTRUCTIONS

Once the sprayer is set up and primed, follow these guidelines for effective operation:

1. **Adjust Pressure:** Use the fully adjustable pressure control knob to set the appropriate paint flow for your material and surface. Higher pressure is generally used for thicker coatings and faster application, while lower pressure is suitable for thinner materials and finer finishes.
2. **Spraying Technique:** Maintain a consistent distance (typically 10-12 inches) and angle (perpendicular) from the surface. Move the spray gun in smooth, even passes, overlapping each pass by approximately 50% to ensure uniform coverage and avoid streaks.
3. **Spraying Unthinned Paint:** The robust stainless steel piston pump is designed to spray most unthinned paints and stains at high pressure, eliminating the need for material thinning in many applications.
4. **Clog Management:** If the spray tip becomes clogged during operation, simply reverse the RAC IV SwitchTip 180 degrees to clear the obstruction. This allows for quick resumption of spraying without significant downtime.

5. **Extended Reach:** The sprayer is capable of supporting up to 100 ft of paint hose, providing ample reach for spraying multi-story homes, large exterior walls, or extensive fencing projects.

HOMEOWNER / REMODELER PROJECTS

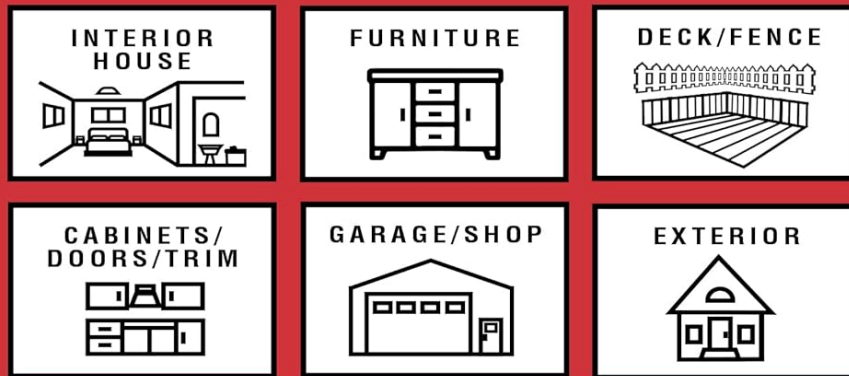

Figure 3: An individual applying paint to a house exterior, demonstrating the sprayer's capability for large-scale projects.

Figure 4: A close-up view of the RAC IV SwitchTip, highlighting its design for easy clog reversal and consistent spray patterns.

CONNECT TO A HOSE FOR FAST AND EASY CLEAN-UP

WITH POWERFLUSH®

Figure 5: The TrueAirless Spray Tip Selection Guide provides recommendations for various materials and desired spray widths, aiding in optimal tip choice.

6. CLEANING AND MAINTENANCE

Proper cleaning and maintenance are crucial for extending the life of your sprayer and ensuring optimal performance:

1. **PowerFlush Cleaning:** Immediately after each use, connect the PowerFlush Adapter to a standard garden hose. This feature allows for fast and easy cleaning of the sprayer's internal system, flushing out paint residue.
2. **Spray Gun Cleaning:** Disassemble the spray gun components (tip, guard, filter) and clean them thoroughly with the appropriate cleaning solution for the type of paint used (e.g., water for latex, mineral spirits for oil-based).
3. **Tip and Filter Cleaning:** Ensure the RAC IV SwitchTip and the gun filter are free of any dried paint or debris. A soft brush can be used for stubborn residue.
4. **Pump Armor Storage:** For extended storage periods or in freezing temperatures, always use Pump Armor storage fluid. This protects the pump from corrosion, freezing, and premature wear.
5. **Regular Inspection:** Periodically inspect the paint hose, spray gun, and the main sprayer unit for any signs of wear,

cracks, or damage. Replace any worn or damaged parts immediately with genuine Graco replacement components to maintain safety and performance.

LONGEST LASTING POWER AND PERFORMANCE

WITH STAINLESS STEEL PISTON PUMP

Figure 6: Demonstrating the connection of a garden hose to the PowerFlush adapter for quick and efficient cleaning of the sprayer system.

7. TROUBLESHOOTING

This section addresses common issues you might encounter during operation. For more detailed troubleshooting steps, refer to the comprehensive operation manual provided with your unit or contact Graco customer support.

- **No Spray or Weak Spray:**

- Check paint supply: Ensure the flexible suction tube is fully submerged in paint.
- Verify pressure setting: Adjust the pressure control to an adequate level for the paint type.
- Inspect for clogs: The spray tip or gun filter may be clogged. Reverse the RAC IV SwitchTip to clear the tip. Clean the filter if necessary.
- Air in system: Re-prime the pump to remove any trapped air.

- Hose connections: Ensure all hose connections are tight and free of leaks.
- **Inconsistent Spray Pattern:**
 - Clean or replace spray tip: A worn or dirty tip can cause an uneven pattern.
 - Adjust pressure: Fine-tune the pressure setting for optimal atomization.
 - Paint consistency: Ensure paint is properly mixed and free of lumps or debris.
- **Leaking:**
 - Tighten connections: Ensure all hose and gun connections are securely tightened.
 - Inspect components: Check hoses, seals, and O-rings for damage or wear. Replace any faulty parts.
- **Sprayer Not Starting:**
 - Power supply: Verify the sprayer is properly plugged into a functional 110-volt outlet.
 - Circuit breaker: Check for tripped circuit breakers at the power source.
 - Priming: Ensure the unit has been correctly primed according to the setup instructions.

8. SPECIFICATIONS

Detailed technical specifications for the Graco Magnum 262805 X7 Cart Airless Paint Sprayer:

Feature	Specification
Brand	Graco
Model Name	X7
Part Number	262805
Power Source	Corded Electric
Voltage	110 Volts
Maximum Pressure	3000 PSI (Pound per Square Inch)
Hose Length (Included)	25 ft. (Supports up to 100 ft. maximum)
Paint Supply Method	Flexible suction tube for 1 or 5 Gallon buckets
Annual Use Recommendation	Up to 125 gallons per year
Item Weight	26 Pounds
Material (Piston Pump)	Stainless Steel
Product Dimensions	19"W x 37"H

Included Components	SG2 Metal Spray Gun, RAC IV 515 SwitchTip, 25 ft. Duraflex paint hose, Pump Armor storage fluid, PowerFlush adapter, Quick Start-Up Guide, Operation Manual
---------------------	---

9. WARRANTY AND SUPPORT

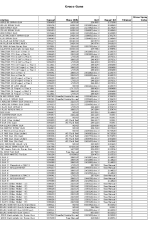

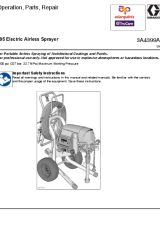

Warranty Information: The Graco Magnum 262805 X7 Cart Airless Paint Sprayer is covered by a one-year warranty against manufacturer defects. Please retain your proof of purchase for warranty claims.

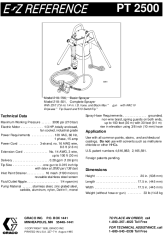

Customer Support: For technical assistance, replacement parts, or service inquiries, please contact Graco customer support. You can find the most current contact information on the official Graco website.

Online Resources: Additional resources, including frequently asked questions, product registration, and video tutorials, may be available on the [Graco Store](#) or the main Graco website.
