## 1. INTRODUCTION

---

The BRIO World 33696 Lumber Loading Wagon is a 4-piece toy train accessory designed to enhance imaginative play for children aged 3 and up. This set includes a durable wagon and three wooden logs, all crafted from FSC-certified wood, ensuring sustainable sourcing. It is fully compatible with all other BRIO railway toys, allowing for seamless integration into existing train sets. This toy promotes fine motor skills, cognitive abilities, and an understanding of the environment through engaging play.

## 2. SETUP

The Lumber Loading Wagon set consists of four primary pieces: one green wagon and three wooden logs. No assembly is required for the wagon itself.

### 2.1 Unpacking the Components

Carefully remove all components from the packaging. Ensure all four pieces are present: one wagon and three wooden logs.

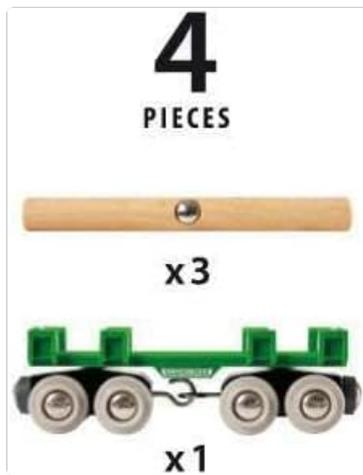

Figure 2.1: The four components included in the set: three wooden logs and one wagon.

## 2.2 Loading the Logs

Place the three wooden logs onto the wagon. The logs feature small embedded magnets that help them stay securely in place on the wagon during movement. Align the magnets on the logs with the corresponding magnetic points on the wagon for optimal stability.

## 3. OPERATION

The Lumber Loading Wagon is designed for interactive play within the BRIO World railway system.

### 3.1 Connecting to Other Trains

The wagon features magnetic couplers at both ends, allowing it to be easily connected to other BRIO trains and wagons. Simply bring the magnetic ends of the wagon and another train piece close together, and they will snap into place. Ensure the magnets are properly aligned for a secure connection.

### 3.2 Transporting Logs

Once the logs are loaded onto the wagon and the wagon is connected to a train, it can be pulled along any BRIO railway track. The wagon's design, including its 8 wheels and flexible connection points, allows it to navigate curves and turns smoothly.

## 4. MAINTENANCE

Proper care will ensure the longevity of your BRIO World Lumber Loading Wagon.

## 4.1 Cleaning

To clean the wooden and plastic components, wipe them gently with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the materials and finishes. Do not submerge the toy in water.

## 4.2 Storage

Store the toy in a dry place away from direct sunlight and extreme temperatures to prevent warping or fading of the wood and plastic. Keep all pieces together to avoid loss.

## 5. TROUBLESHOOTING

---

If you encounter any issues with your Lumber Loading Wagon, refer to the following common solutions:

- **Logs not staying on the wagon:** Ensure the logs are correctly positioned on the wagon, allowing the embedded magnets to align with the magnetic points on the wagon's base.
- **Wagon not connecting to other train pieces:** Check that the magnetic couplers on both the wagon and the connecting train piece are clean and free of debris. Ensure they are brought close enough for the magnets to engage.
- **Wagon not rolling smoothly:** Inspect the wheels and axles for any trapped debris, hair, or lint that might impede movement. Clean as necessary.

## 6. SPECIFICATIONS

---

**Model Number:** 33696

**Product Dimensions:** 4.72 x 1.57 x 1.97 inches (12 x 4 x 5 cm)

**Item Weight:** 3.73 ounces (105.7 grams)

**Manufacturer Recommended Age:** 36 months - 10 years

**Materials:** Wood (FSC-certified), Plastic, Metal
