# KFI Products 100545 Winch Mount Instruction Manual

For Honda Foreman 400/450 4x4 (1995-2004)

## 1. INTRODUCTION

This manual provides detailed instructions for the proper installation, operation, and maintenance of your KFI Products 100545 Winch Mount. Please read this manual thoroughly before installation and use to ensure safe and effective performance. Retain this manual for future reference.

## 2. PRODUCT OVERVIEW

The KFI Products 100545 Winch Mount is a robust accessory designed to securely attach a winch to the front frame of your Honda Foreman ATV. It features a durable powder-coated finish for enhanced longevity and resistance to environmental elements.

**Figure 1:** KFI Products 100545 Winch Mount. This image displays the black, powder-coated metal winch mount from an angled perspective, highlighting the various pre-drilled holes for winch and fairlead attachment, as well as the U-bolt mounting points for securing it to the ATV frame.

### 3. COMPATIBILITY

---

This winch mount is specifically designed for the following ATV models:

- Honda Foreman 400 (1995-2004)
- Honda Foreman 450 (1995-2004)

It is compatible with most winches featuring a 2-hole mounting pattern of 3.100 inches and a 4-hole mounting pattern of 3.00 inches x 4.875 inches. A roller fairlead or hawse with a 4.875-inch bolt-up pattern is required for proper installation.

### 4. PACKAGE CONTENTS

---

Verify that all components are present before beginning installation:

- KFI Products 10-0545 Winch Mount (1 unit)
- Installation Hardware (U-bolts, nuts, washers - *specific quantities may vary, refer to packaging*)

### 5. SAFETY INFORMATION

---

Always prioritize safety during installation and use. Failure to follow safety guidelines may result in injury or damage to equipment.

- Wear appropriate personal protective equipment (PPE), including safety glasses and gloves, during installation.

- Ensure the ATV is parked on a level, stable surface with the parking brake engaged and the engine turned off before beginning any work.
- Disconnect the ATV's battery to prevent accidental electrical shorts during installation.
- Refer to your ATV's service manual for specific frame components, torque specifications, and additional safety precautions.
- **Proposition 65 Warning:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

## 6. SETUP AND INSTALLATION

---

**Tools Required:** Basic hand tools, torque wrench, socket set.

1. **Preparation:** Park the ATV on a level surface, engage the parking brake, and turn off the engine. Disconnect the negative terminal of the battery to prevent accidental electrical shorts.
2. **Winch Pre-Mounting:** It is recommended to mount your winch to the KFI Products 100545 Winch Mount *before* attaching the mount to the ATV frame. Align the winch with the appropriate mounting holes on the winch mount (2-hole 3.100" or 4-hole 3.00"x4.875"). Secure the winch using its provided hardware, ensuring all bolts are tightened to the winch manufacturer's specifications.
3. **Fairlead Installation:** Attach the roller fairlead or hawse to the winch mount using bolts with a 4.875-inch bolt-up pattern. Ensure the fairlead is securely fastened and aligned.
4. **Positioning the Mount:** Carefully position the assembled winch mount and winch onto the front frame of your Honda Foreman. You may need to temporarily move or adjust existing components, such as headlight connections or wiring, for proper access and fitment.
5. **Securing to Frame:** Use the provided U-bolts to secure the winch mount to the ATV frame. Place the U-bolts around the frame and through the designated holes on the winch mount. Install washers and nuts, then tighten the U-bolts evenly and snugly. Avoid over-tightening, as this can damage the U-bolts or the ATV frame.
6. **Final Checks:** Reconnect the negative battery terminal. Verify that the winch mount and winch are securely fastened and do not interfere with any steering, suspension, or other critical ATV components. Test the winch operation according to its manufacturer's instructions.

## 7. OPERATION

---

The KFI Products 100545 Winch Mount serves as a stable and secure platform for your winch. Once installed, the operation of the winch itself should follow the specific instructions provided with your winch unit. Always ensure the winch cable is properly spooled and the fairlead is clear of obstructions before and during winch operation. Do not exceed the rated capacity of your winch or the ATV.

## 8. MAINTENANCE

---

Regular inspection of the winch mount is crucial for safety and longevity.

- Periodically check all mounting bolts and U-bolts for tightness. Re-torque as necessary, especially after initial use.
- Inspect the winch mount for any signs of corrosion, cracks, or structural damage. Address any issues promptly.
- Clean the mount as needed to remove dirt, mud, or debris that could accumulate and cause corrosion.
- Ensure the powder-coated finish remains intact to protect against rust. Touch up any chips or scratches.

with appropriate rust-inhibiting paint.

## 9. TROUBLESHOOTING

This section addresses common issues related to the winch mount installation.

- **Issue: Winch mount does not align correctly with ATV frame.**

**Solution:** Double-check the ATV model and year against the compatibility list (Honda Foreman 400/450, 1995-2004). Ensure no existing ATV components or modifications are obstructing the mount's proper placement.

- **Issue: Fairlead mounting holes on the mount do not match the fairlead.**

**Solution:** Verify the fairlead's bolt pattern. The KFI 100545 mount requires a 4.875-inch bolt-up pattern. If your fairlead has a slightly different pattern, minor adjustments or modifications to the fairlead itself may be necessary.

- **Issue: U-bolts break or strip during tightening.**

**Solution:** U-bolts should be tightened evenly and snugly, not excessively. Over-tightening can cause damage. Replace any damaged U-bolts with appropriate strength hardware.

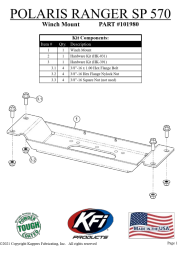

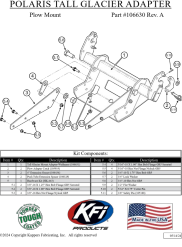

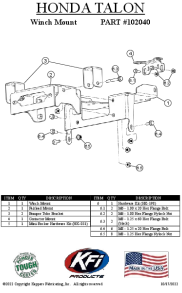

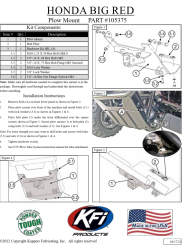

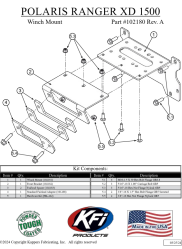

## 10. SPECIFICATIONS

Property	Value
Model	KFI Products 10-0545
Item Weight	5.5 pounds
Product Dimensions	12 x 9.5 x 6 inches
Material	Steel
Finish	Powder-coated
Winch Mounting Patterns	2-Hole: 3.100", 4-Hole: 3.00"x4.875"
Fairlead Bolt Pattern	4.875"
Compatible ATV Models	Honda Foreman 400/450 (1995-2004)

## 11. WARRANTY AND SUPPORT

For specific warranty information or technical support regarding your KFI Products 100545 Winch Mount, please contact KFI Products directly. Refer to their official website or product packaging for current contact details and warranty terms.
