Duravit Design Siphon 0050361092 Chrome User Manual

Model: 0050361092

Introduction

Thank you for choosing the Duravit Design Siphon 0050361092 Chrome. This product is a sophisticated bath accessory designed to complement modern bathroom aesthetics while ensuring efficient drainage. This manual provides essential information for the proper installation, operation, maintenance, and troubleshooting of your new siphon. Please read these instructions carefully before beginning installation or use.

Safety Information

- Always turn off the main water supply before beginning any installation or maintenance work.
- Wear appropriate personal protective equipment, such as safety glasses and gloves, during installation.
- Ensure all connections are secure and watertight to prevent leaks.
- If you are unsure about any step, consult a qualified plumber.
- Observe local plumbing codes and regulations during installation.
- When using this siphon, please observe the outlet height from the upper surface of the finished floor to the center of the outlet in accordance with the technical specification sheet.

Components Overview

Before installation, verify that all components are present and undamaged.

Figure 1: This image displays the individual components of the Duravit Design Siphon. It includes the primary T-shaped pipe, two shorter straight pipe segments, and two circular sealing washers. All parts are shown with a reflective chrome finish, indicating their material and aesthetic.

Included Parts:

- Main T-shaped siphon body (Chrome)
- Straight pipe sections (2)
- Sealing washers (2)
- Mounting hardware (screws, anchors - typically included with wall-mount fixtures, though not explicitly listed for siphon)

Note: *Faucets and drains are sold separately and are not included with this siphon.*

Setup and Installation

This siphon is designed for wall-mount installation. Professional installation is recommended.

Required Tools (Not Included):

- Adjustable wrench
- Screwdriver
- Measuring tape
- Level
- Drill (if wall anchors are required)
- Sealant/Plumber's putty (optional, for extra sealing)

Installation Steps:

1. **Prepare the Area:** Ensure the water supply is turned off. Clear the area under the sink where the siphon will be installed.
2. **Measure Outlet Height:** Carefully measure and mark the desired outlet height from the finished floor to the center of the outlet, adhering to the technical specification sheet for your specific basin and plumbing setup.
3. **Attach Siphon to Basin Drain:** Connect the top opening of the T-shaped siphon body to the basin's drain tailpiece. Use one of the sealing washers to ensure a watertight seal. Hand-tighten first, then use a wrench for a snug fit, being careful not to overtighten.
4. **Connect Horizontal Pipe:** Attach one of the straight pipe sections to the horizontal outlet of the T-shaped siphon body. This pipe will connect to the wall drain.

5. **Connect Vertical Pipe (if applicable):** If your setup requires a longer vertical drop, attach the second straight pipe section to the bottom of the T-shaped siphon body.
6. **Secure to Wall Drain:** Connect the horizontal pipe from the siphon to the wall drain pipe. Use the remaining sealing washer to create a tight seal. Ensure the siphon is level before tightening all connections.
7. **Test for Leaks:** Once all connections are secure, slowly turn on the water supply to the basin. Fill the basin and then drain it, carefully checking all siphon connections for any signs of leaks. Tighten any leaking connections as needed.

Operating Instructions

The Duravit Design Siphon operates passively as part of your basin's drainage system. No direct user interaction is required for its function.

- Ensure the basin stopper (if applicable) is functioning correctly to allow water to drain when open.
- Avoid pouring harsh chemicals or large debris down the drain, as this can damage the siphon or cause blockages.

Maintenance

Regular cleaning and inspection will ensure the longevity and optimal performance of your Duravit Design Siphon.

- **Cleaning:** Clean the exterior chrome finish regularly with a soft cloth and mild, non-abrasive cleaner. Avoid using harsh chemicals, abrasive pads, or acidic cleaners, as these can damage the chrome finish.
- **Inspection:** Periodically check all connections for any signs of leaks or corrosion. Tighten connections if necessary.
- **Blockage Removal:** If a blockage occurs, first try using a plunger. If the blockage persists, the siphon can be disassembled for cleaning. Turn off the water supply, place a bucket underneath, and carefully loosen the connections to remove any debris. Reassemble and test for leaks.

Troubleshooting

Problem	Possible Cause	Solution
Leaks at connections	Loose connections, damaged washers, improper sealing.	Tighten connections. Replace damaged washers. Ensure proper sealant application if used.
Slow drainage or blockage	Accumulation of hair, soap scum, or debris.	Use a plunger. Disassemble the siphon and manually remove the blockage. Avoid pouring grease or large particles down the drain.
Unpleasant odors from drain	Dry P-trap (siphon trap), bacterial buildup.	Run water regularly to ensure the trap is filled. Clean the siphon thoroughly.

Specifications

Attribute	Detail
Brand	Duravit
Model Name	50361092
Color	Chrome

Attribute	Detail
Material	Aluminum
Item Weight	3.3 pounds
Product Dimensions	2 x 6 x 12 inches
Mounting Type	Wall Mount
Installation Type	Single Hole
Recommended Uses	Bathroom

Warranty Information

The Duravit Design Siphon 0050361092 Chrome comes with a**1 Year Limited Warranty** from the date of purchase. This warranty covers defects in material and workmanship under normal use and service. It does not cover damage resulting from improper installation, misuse, abuse, accident, or normal wear and tear. Please retain your proof of purchase for warranty claims.

Customer Support

For technical assistance, replacement parts, or warranty inquiries, please contact Duravit customer service:
