1. INTRODUCTION

The Amprobe LAN-1 LAN Cable Tester is a diagnostic tool designed to identify and trace data cables and connectors. It helps detect common wiring issues such as shorts, miswirings, and open circuits in various cable types. This manual provides detailed instructions for the proper use, setup, and maintenance of your LAN-1 tester.

The LAN-1 evaluates most common cable types, including 10/100 base-T, 10 base-2, RJ45 modular, AT&T 258A, EIA/TIA 568A/568B, and Token Ring cables, as well as RJ45 and BNC connectors. It can test cables up to 300 meters long and uses LED indicators and an audible buzzer to signal cable status and errors.

2. SAFETY INFORMATION

Please read and understand all safety instructions before operating the Amprobe LAN-1 LAN Cable Tester. Failure to follow these instructions may result in injury or damage to the device.

- Do not use the device if it appears damaged or is not operating correctly.
- Ensure the correct battery type and polarity are used during installation.
- Avoid exposing the device to extreme temperatures, moisture, or direct sunlight.
- Do not attempt to repair or modify the device yourself. Refer all servicing to qualified personnel.
- Always disconnect the cable tester from any active network or power source before performing maintenance or battery replacement.

3. PACKAGE CONTENTS

Verify that all items listed below are present in your package:

- LAN-1 LAN Cable Tester
- (1) Remote terminator
- (1) RJ45 to female BNC cable

- (1) RJ45 to male BNC cable
- (1) RJ45 to RJ45 cable
- (1) Female BNC to female BNC cable
- (1) 9V battery (installed)
- Instructions (this manual)

4. PRODUCT OVERVIEW

The Amprobe LAN-1 features a compact design with intuitive controls and clear LED indicators for efficient cable testing.

4.1 Key Features

- **Cable Testing:** Locates and traces data cables and connectors to identify shorts, miswiring, and opens.
- **Versatile Compatibility:** Evaluates 10/100 base-T, 10 base-2, RJ45 modular, AT&T 258A, EIA/TIA 568A/568B, and Token Ring cables, along with RJ45 and BNC connectors.
- **Error Indication:** An audible buzzer indicates an error condition in the cable.
- **Extended Range:** Tests cables up to 300 meters long.
- **Clear Display:** Eighteen red and green LEDs indicate the source or test results.
- **Test Modes:** Supports Loopback Test and Remote Test functions.
- **Safety Compliance:** CE - EMC certified.

4.2 Component Identification

Figure 1: Front view of the Amprobe LAN-1 LAN Cable Tester. This image displays the main unit with its LED pin-out indicator, battery status light, and control buttons including AUTO, MAN, HOLD, TEST, BATT, and the power button.

Figure 2: Amprobe LAN-1 LAN Cable Tester showing the main unit and the remote terminator module. This view highlights how the remote unit connects to the main tester for comprehensive cable testing.

1. **PIN-OUT INDICATOR LEDs:** Displays the wiring status for each pin (1-8) and ground (G).
2. **BATT LED:** Indicates battery status.
3. **AUTO Button:** Initiates automatic scanning of cable pins.
4. **MAN Button:** Allows manual step-through of cable pins.
5. **HOLD Button:** Pauses the current test result display.
6. **TEST Button:** Starts a test cycle.
7. **POWER Button (Yellow):** Turns the device on and off.
8. **RJ45 Port:** For connecting RJ45 cables.
9. **BNC Port:** For connecting BNC cables.
10. **Remote Terminator:** A separate module used for testing installed cables or long runs.

5. SETUP

5.1 Battery Installation

The LAN-1 tester is powered by one 9V battery, which is typically pre-installed. If replacement is needed:

1. Ensure the device is turned off.
2. Locate the battery compartment cover on the back of the main unit.
3. Remove the screw(s) securing the cover and carefully open it.
4. Remove the old 9V battery and disconnect it from the terminals.
5. Connect a new 9V battery, ensuring correct polarity (+ to + and - to -).
6. Place the battery into the compartment and replace the cover, securing it with the screw(s).

The battery provides power for up to 20 hours of testing.

5.2 Connecting Cables for Testing

Before testing, ensure the cable is disconnected from any active network equipment.

- **For patch cables (short cables not installed in walls):** Connect one end of the cable to the RJ45 or BNC port on the main unit and the other end to the corresponding port on the remote terminator.
- **For installed cables (e.g., wall plates, patch panels):** Connect one end of the cable to the RJ45 or

BNC port on the main unit. Connect the remote terminator to the other end of the installed cable (e.g., at the wall plate in another room).

6. OPERATING INSTRUCTIONS

6.1 Powering On/Off

Press the yellow **POWER** button to turn the device on. Press it again to turn the device off.

6.2 Performing a Test

Once the cable is connected, you can perform a test:

1. Press the **TEST** button to initiate a cable test.
2. **Automatic Scan (AUTO mode):** Press the **AUTO** button. The tester will automatically scan through each pin (1-8 and G) and display the results sequentially. This is suitable for quick checks.
3. **Manual Scan (MAN mode):** Press the **MAN** button. Each press of the **MAN** button will advance the test to the next pin, allowing for a detailed examination of each connection.
4. **Hold Function:** Press the **HOLD** button to pause the current display of the pin-out indicator. Press it again to resume scanning.

6.3 Interpreting LED Indicators

The 18 red and green LEDs on the PIN-OUT INDICATOR provide visual feedback on the cable's status:

- **Green LED:** Indicates a correct connection for the corresponding pin.
- **Red LED:** Indicates an error for the corresponding pin (e.g., open circuit, short circuit, miswiring).
- **No LED:** May indicate an open circuit or a broken wire for that pin.
- **Buzzer:** An audible buzzer will sound when an error condition is detected, providing an additional alert.

The LEDs on the remote module will mirror the main unit's display for the corresponding pins, allowing for verification of end-to-end continuity.

6.4 Battery Status Check

Press the **BATT** button to check the battery level. The BATT LED will illuminate if the battery has sufficient power. If the BATT LED does not light up or is dim, replace the 9V battery.

7. MAINTENANCE

7.1 Cleaning

To ensure the longevity and proper functioning of your LAN-1 tester, keep it clean and free from dust and debris.

- Wipe the exterior of the device with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Ensure no moisture enters the ports or battery compartment.

7.2 Battery Replacement

Replace the 9V battery when the BATT LED indicates low power or if the device fails to power on. Refer to Section 5.1 for detailed battery installation instructions.

Always dispose of used batteries according to local regulations.

8. TROUBLESHOOTING

If you encounter issues with your Amprobe LAN-1 LAN Cable Tester, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device does not power on.	Low or dead battery; incorrect battery installation.	Replace the 9V battery, ensuring correct polarity.
No LED activity during test.	Cable not properly connected; faulty cable; remote terminator not connected.	Ensure cables are securely connected to both the main unit and remote terminator. Test with a known good cable.
Buzzer sounds continuously or unexpectedly.	Short circuit or severe miswiring detected.	Examine the cable for physical damage or incorrect wiring. Check connectors for bent pins.
Inconsistent test results.	Loose connections; intermittent cable fault; low battery.	Ensure all connections are tight. Replace battery. Try wiggling the cable during test to identify intermittent faults.

9. SPECIFICATIONS

Model	LAN-1
Power Supply	(1) 9V battery
Battery Life	Up to 20 hours of tests
Cable Types Tested	10/100 base-T, 10 base-2, RJ45 modular, AT&T 258A, EIA/TIA 568A/568B, Token Ring cables
Cable Connector Types	RJ45 and BNC
Maximum Line Length	300m
Weight	0.6 lb. / 0.27 kg (approx. 9.5 ounces)
Dimensions (H x W x D)	5.1 x 2.2 x 1.5 in. / 130 x 56 x 38mm
Display	18 LEDs (9 Red and 9 Green), 9 LEDs on Remote module
Safety Compliance	CE - EMC

10. WARRANTY INFORMATION

The Amprobe LAN-1 LAN Cable Tester comes with a**One Year Limited Warranty**. This warranty covers defects in materials and workmanship under normal use. It does not cover damage resulting from misuse, accident, modification, neglect, or unauthorized repair.

For specific warranty terms and conditions, please refer to the warranty card included with your product or contact Amprobe customer support.

11. CUSTOMER SUPPORT

If you have any questions, require technical assistance, or need to report a problem with your Amprobe LAN-1 LAN Cable Tester, please contact Amprobe customer support. Please visit the official Amprobe website for the most up-to-date contact information and support resources.
