## Sterling 901R

# Sterling 901R SafeCan Key Rock User Manual

Model: 901R

## PRODUCT OVERVIEW

The Sterling 901R SafeCan Key Rock is a discreet and secure solution for hiding spare keys outdoors. Designed to blend seamlessly into natural environments such as rockeries or dry stone walls, this authentic-looking replica rock features a hidden compartment for key storage. Its weather-resistant construction ensures durability and protection for your keys.

## FEATURES

- **Authentic Appearance:** Designed to look like a natural stone, allowing it to blend into outdoor landscapes.
- **Hidden Compartment:** Features a secure internal space suitable for most standard house and padlock keys.
- **Weather Resistant:** Constructed to withstand various outdoor weather conditions, protecting contents from elements. *Note: This product is weather resistant, not fully water resistant or submersible.*
- **Versatile Placement:** Can be hidden amongst bushes, rockeries, or even partially buried for enhanced concealment.

## FEATURES:

 **Sterling**

### Hide your keys in plain sight:

Don't place your keys under a door mat, hide it where they'll never look - inside a rock!

Replica rock with  
hidden compartment

Weather resistant -  
Ideal for outdoor use

Realistic look

## SafeCan Rock

Image: A close-up view of the SafeCan Rock, highlighting its realistic texture and appearance designed to mimic a natural stone.

### SETUP AND PLACEMENT

1. **Prepare the Key:** Ensure the key you intend to store fits within the internal compartment. The compartment dimensions are approximately 24mm (height) x 32mm (depth) x 75mm (width).
2. **Insert Key:** Carefully place the key into the white plastic compartment.
3. **Secure Compartment:** Insert the loaded white plastic compartment firmly into the rock casing until it is securely seated.
4. **Choose Location:** Select an outdoor location that naturally contains similar rocks or landscaping elements. Ideal spots include rockeries, garden beds, or areas near dry stone walls.
5. **Concealment:** Place the SafeCan Key Rock among existing stones or foliage to maximize its camouflage. For better concealment, it can be partially buried.

### OPERATING INSTRUCTIONS

The Sterling 901R SafeCan Key Rock operates as a simple, non-locking hidden storage unit. Accessing your key involves retrieving the rock and removing its hidden compartment.

- 1. Locate the Rock:** Identify the specific location where the SafeCan Key Rock was placed.
- 2. Retrieve the Rock:** Carefully pick up the rock from its concealed position.
- 3. Access Compartment:** Turn the rock over to expose the base. Gently pull or slide out the white plastic compartment to access the stored key.
- 4. Replace Compartment:** After retrieving or returning the key, firmly reinsert the white plastic compartment into the rock casing.
- 5. Return to Concealed Spot:** Place the SafeCan Key Rock back into its original concealed location to maintain its effectiveness.

## MAINTENANCE

- Regular Inspection:** Periodically check the SafeCan Key Rock for any signs of wear, damage, or displacement, especially after severe weather conditions.
- Cleaning:** If the exterior becomes dirty, wipe it with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish or material.
- Compartment Check:** Ensure the white plastic compartment remains securely fitted within the rock. If it becomes loose, it may compromise the security of the stored key.
- Drainage:** Ensure the placement area allows for proper water drainage to prevent prolonged submersion, as the product is not fully water resistant.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Key does not fit in compartment.	Key is too large for the internal dimensions.	Use a smaller key or consider a different storage solution if the key cannot be accommodated. The compartment is 24mm H x 32mm D x 75mm W.
Compartment feels loose.	The plastic compartment may not be fully seated or could be worn.	Ensure the compartment is pushed in firmly. If wear is evident, consider replacing the unit for optimal security.
Rock is easily discovered.	Poor concealment or placement in an unnatural setting.	Relocate the rock to an area with more natural rocks or dense foliage. Partially bury it to enhance camouflage.
Water inside compartment.	Product is not fully water-resistant or placed in an area prone to standing water.	Ensure the compartment is fully closed. Relocate the rock to a well-drained area. Note that the product is weather-resistant but not fully water-resistant.

## SPECIFICATIONS

Brand	Sterling
Model Number	901R
Product Dimensions	2.76"D x 3.94"W x 5"H (approx. 70mm D x 100mm W x 127mm H)
