HOT TOOLS HTBW44

HOT TOOLS Pro Artist Nano Ceramic Curling Iron/Wand User Manual

Model: HTBW44 | Brand: HOT TOOLS

1. PRODUCT OVERVIEW

The HOT TOOLS Pro Artist Nano Ceramic Curling Iron/Wand is designed to create sleek, glossy curls, coils, and waves while reducing frizz. Its advanced Nano Ceramic technology ensures smooth hair glide and consistent heat for optimal styling results.

Figure 1: HOT TOOLS Pro Artist Nano Ceramic Curling Iron/Wand (1 Inch Barrel)

Key Features:

- **Nano Ceramic Technology:** Helps create sleek, glossy shine, and reduce frizz. Hair glides effortlessly along the wand.
- **Versatile Styling:** Can be used as a traditional curling iron or by wrapping hair around the barrel as a wand.
- **Wide Temperature Range:** Heats up to 450°F, suitable for all hair types from thin to coarse.
- **Pulse Technology:** Ensures the iron gets hot and stays hot, restoring correct temperature immediately in case of fluctuations.
- **User-Friendly Design:** Features an extra-long Cool Tip for safe handling, a foldaway safety stand for easy storage, and an 8ft professional swivel cord for free movement.

2. SAFETY INFORMATION

Please read all instructions before using this appliance. When using electrical appliances, especially when children are present, basic safety precautions should always be followed, including the following:

- **DANGER:** Keep out of reach of children.
- **WARNING:** Be careful not to touch the hot surface.
- Always unplug the appliance immediately after using.
- Do not use while bathing or in a shower.
- Do not place or store appliance where it can fall or be pulled into a tub or sink.
- Do not place in or drop into water or other liquid.
- If an appliance falls into water, unplug it immediately. Do not reach into the water.
- This appliance is for household use only.

3. SETUP

1. Unpack the curling iron and all accessories, including the heat-resistant glove.
2. Ensure the curling iron is clean and free from any debris.
3. Place the curling iron on a heat-resistant surface using its foldaway safety stand.
4. Plug the 110V curling iron into a suitable electrical outlet.
5. Put on the heat-resistant glove for added protection during styling.

4. OPERATING INSTRUCTIONS

Follow these steps for optimal curling results:

1. **Power On:** Turn the power switch to the "ON" position. The indicator light will illuminate.

2. **Set Temperature:** Rotate the temperature dial to your desired heat setting (up to 450°F). Allow a few moments for the iron to heat up.
3. **Prepare Hair:** Ensure your hair is clean, dry, and detangled. Section your hair into manageable portions.
4. **Curl Hair:**
 - Open the clamp and place a section of hair between the clamp and the barrel, starting from the ends.
 - Close the clamp and slowly roll the iron upwards towards the roots, ensuring the hair is evenly wrapped around the barrel.
 - Hold for a few seconds (duration depends on hair type and desired curl tightness).
 - Release the clamp and gently slide the iron out, allowing the curl to form.
5. **Cool Down:** For best results, allow curls to cool completely before touching or brushing them. This helps to set the curl.
6. **Power Off:** After use, turn the power switch to the "OFF" position and unplug the appliance.

PROFESSIONAL RESULTS ON ALL HAIR TYPES

Figure 3: Professional results on various hair types can be achieved with this curling iron.

5. MAINTENANCE

- **Cleaning:** Ensure the curling iron is unplugged and completely cool before cleaning. Wipe the barrel and handle with a soft, damp cloth. Do not use abrasive cleaners or immerse the appliance in water.
- **Storage:** Store the curling iron in a cool, dry place. Use the foldaway safety stand to protect surfaces. Do not wrap the cord around the appliance as this can damage the cord.
- **Cord Care:** Regularly inspect the power cord for any signs of damage. If the cord is damaged, do not use the appliance and contact customer support.

6. TROUBLESHOOTING

If you encounter any issues with your curling iron, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Curling iron does not heat up.	Not plugged in, power switch off, or faulty outlet.	Ensure appliance is securely plugged in. Check if the power switch is ON. Test the outlet with another appliance.
Hair is not curling effectively.	Temperature too low, hair not clean/dry, or section too large.	Increase temperature setting. Ensure hair is completely dry. Use smaller hair sections.
Hair is getting caught or sticking.	Hair tangles, product buildup on barrel.	Ensure hair is detangled before curling. Clean the Nano Ceramic barrel as per maintenance instructions.

If the problem persists after trying these solutions, please contact customer support.
