# Goobay 50796 Hi-Speed USB 2.0 Cable User Manual

Model: 50796

## INTRODUCTION

This manual provides essential information for the proper use and care of your Goobay 50796 Hi-Speed USB 2.0 Cable. This cable is designed for reliable data transfer and charging between compatible devices. The Goobay 50796 is a USB 2.0 Type A to Type A cable, featuring two male USB 2.0 Type A connectors. It supports data transfer speeds up to 480 Mbit/s.

## PRODUCT OVERVIEW

**Image 1:** The Goobay 50796 Hi-Speed USB 2.0 Cable. This image displays the gray cable with a USB 2.0 Type A male connector on each end, suitable for connecting two USB Type A compatible devices.

The Goobay 50796 cable is a standard USB 2.0 cable. It is gray in color and features two USB Type A male connectors. This design allows for direct connection between two devices that both have a female USB Type A port, such as connecting a computer to a USB hub, or certain peripherals that require a Type A to Type A connection.

## SETUP

Connecting your Goobay 50796 USB 2.0 cable is a straightforward process:

- 1. Identify Ports:** Locate the USB Type A female ports on the two devices you wish to connect. Ensure both devices are compatible with USB 2.0 standards.
- 2. Connect First Device:** Insert one end of the Goobay 50796 cable's USB Type A male connector into the corresponding USB Type A female port on your first device (e.g., a computer, USB hub, or external hard drive). Ensure the connector is fully inserted and oriented correctly.
- 3. Connect Second Device:** Insert the other end of the Goobay 50796 cable's USB Type A male connector into the USB Type A female port on your second device. Again, ensure it is fully inserted and correctly oriented.

4. **Verify Connection:** Once both ends are connected, your devices should recognize each other. For data transfer, check your operating system or device interface. For charging, verify the charging indicator on your device.

**Note:** This cable is designed for connecting two USB Type A ports. It is not intended for connecting a device to a power adapter if the adapter only has a Type A port and the device has a different port type (e.g., Micro-USB, USB-C).

## OPERATING INSTRUCTIONS

---

The Goobay 50796 USB 2.0 cable facilitates two primary functions:

- **Data Transfer:** When connected between two compatible devices (e.g., computer to external hard drive, or computer to a USB hub connected to peripherals), the cable enables high-speed data exchange up to 480 Mbit/s. Ensure both connected devices support USB 2.0 for optimal performance.
- **Charging:** The cable can also be used for charging devices that draw power through a USB Type A port, provided the source device (e.g., computer, powered USB hub) can supply sufficient power. Charging speed will depend on the power output of the source and the power requirements of the device being charged.

To ensure proper operation:

- Always connect the cable firmly into the ports.
- Avoid bending or twisting the cable excessively, especially near the connectors.
- Do not force the connectors into ports; they are designed to fit in only one orientation.

## MAINTENANCE

---

Proper maintenance extends the life of your Goobay USB cable:

- **Cleaning:** Use a soft, dry cloth to gently wipe the cable and connectors. Avoid using liquid cleaners or abrasive materials.
- **Storage:** When not in use, coil the cable loosely. Avoid tight coiling or sharp bends, which can damage the internal wires. Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Always grasp the connector housing when plugging or unplugging the cable, not the cable itself. This prevents strain on the cable-connector junction.
- **Inspection:** Periodically inspect the cable for any signs of wear, fraying, or damage to the connectors. Discontinue use if damage is observed.

## TROUBLESHOOTING

---

If you encounter issues with your Goobay 50796 USB 2.0 cable, consider the following:

- **Device Not Recognized:**
  - Ensure both ends of the cable are securely connected to their respective ports.
  - Try connecting the devices to different USB ports on your computer or hub.
  - Test the cable with other compatible devices to determine if the issue is with the cable or the devices.

- Restart the connected devices.
- **Slow Data Transfer:**
  - Verify that both connected devices and their ports support USB 2.0. If one device is USB 1.1, transfer speeds will be limited to the slower standard.
  - Ensure there are no other high-bandwidth USB devices connected to the same hub or controller that might be competing for bandwidth.

- **No Charging:**

- Confirm that the power source (e.g., computer, powered hub) is providing power.
- Check if the device being charged is designed to receive power via a USB Type A to Type A connection.
- Ensure the cable is not damaged.

If problems persist after following these steps, the cable may be faulty, or there might be an issue with the connected devices.

## SPECIFICATIONS

<b>Brand</b>	Goobay
<b>Model Number</b>	50796-GB
<b>Connector Type</b>	USB Type A Male to USB Type A Male
<b>Cable Type</b>	USB 2.0
<b>Special Feature</b>	High-Speed Data Transfer
<b>Data Transfer Rate</b>	Up to 480 Mbit/s
<b>Color</b>	Gray
<b>Length</b>	2 meters
<b>Product Dimensions (L x W x H)</b>	2.01 x 2.01 x 2.01 cm (packaging/coil dimensions); 61 grams
<b>Manufacturer</b>	Wentronic GmbH

## WARRANTY AND SUPPORT

Specific warranty information for the Goobay 50796 Hi-Speed USB 2.0 Cable is not provided within this manual. For details regarding warranty coverage, please refer to the documentation included with your purchase or contact your retailer.

For technical support or further inquiries, please visit the official Goobay website or contact their customer service department. Contact information can typically be found on the product packaging or the manufacturer's website.
