  - Check if the power switch is in the 'ON' position.
  - Verify that the bulb is screwed in securely into the socket.
  - Check the circuit breaker or fuse for the fixture; reset if tripped or replace if blown.

- Test the bulb in another working fixture to confirm if the bulb itself is faulty.
- Ensure the fixture is receiving power.
- **Bulb Flickers:**
  - Ensure the bulb is screwed in tightly. A loose connection can cause flickering.
  - Check for loose wiring in the fixture or switch (consult a qualified electrician if unsure).
