

## **Bird-X SBXP-PRO-2**

# **Bird-X Super BirdXPeller PRO Version 2 Instruction Manual**

Model: SBXP-PRO-2

## **INTRODUCTION**

---

The Bird-X Super BirdXPeller PRO Version 2 is a sophisticated sonic bird repeller designed to humanely deter pest birds from large areas. This device broadcasts a variety of naturally recorded bird distress sounds and predator calls to disorient, confuse, and scare birds, encouraging them to find calmer, untreated spaces. It is effective against crows, blackbirds, grackles, cormorants, and ravens, covering up to 6 acres.

This manual provides essential information for the proper setup, operation, maintenance, and troubleshooting of your Super BirdXPeller PRO Version 2 to ensure optimal performance and longevity.

## **WHAT'S IN THE Box**

---

- Generating unit (control unit)
- 4 x Speakers
- Power Adaptor
- 100 feet of wire per speaker

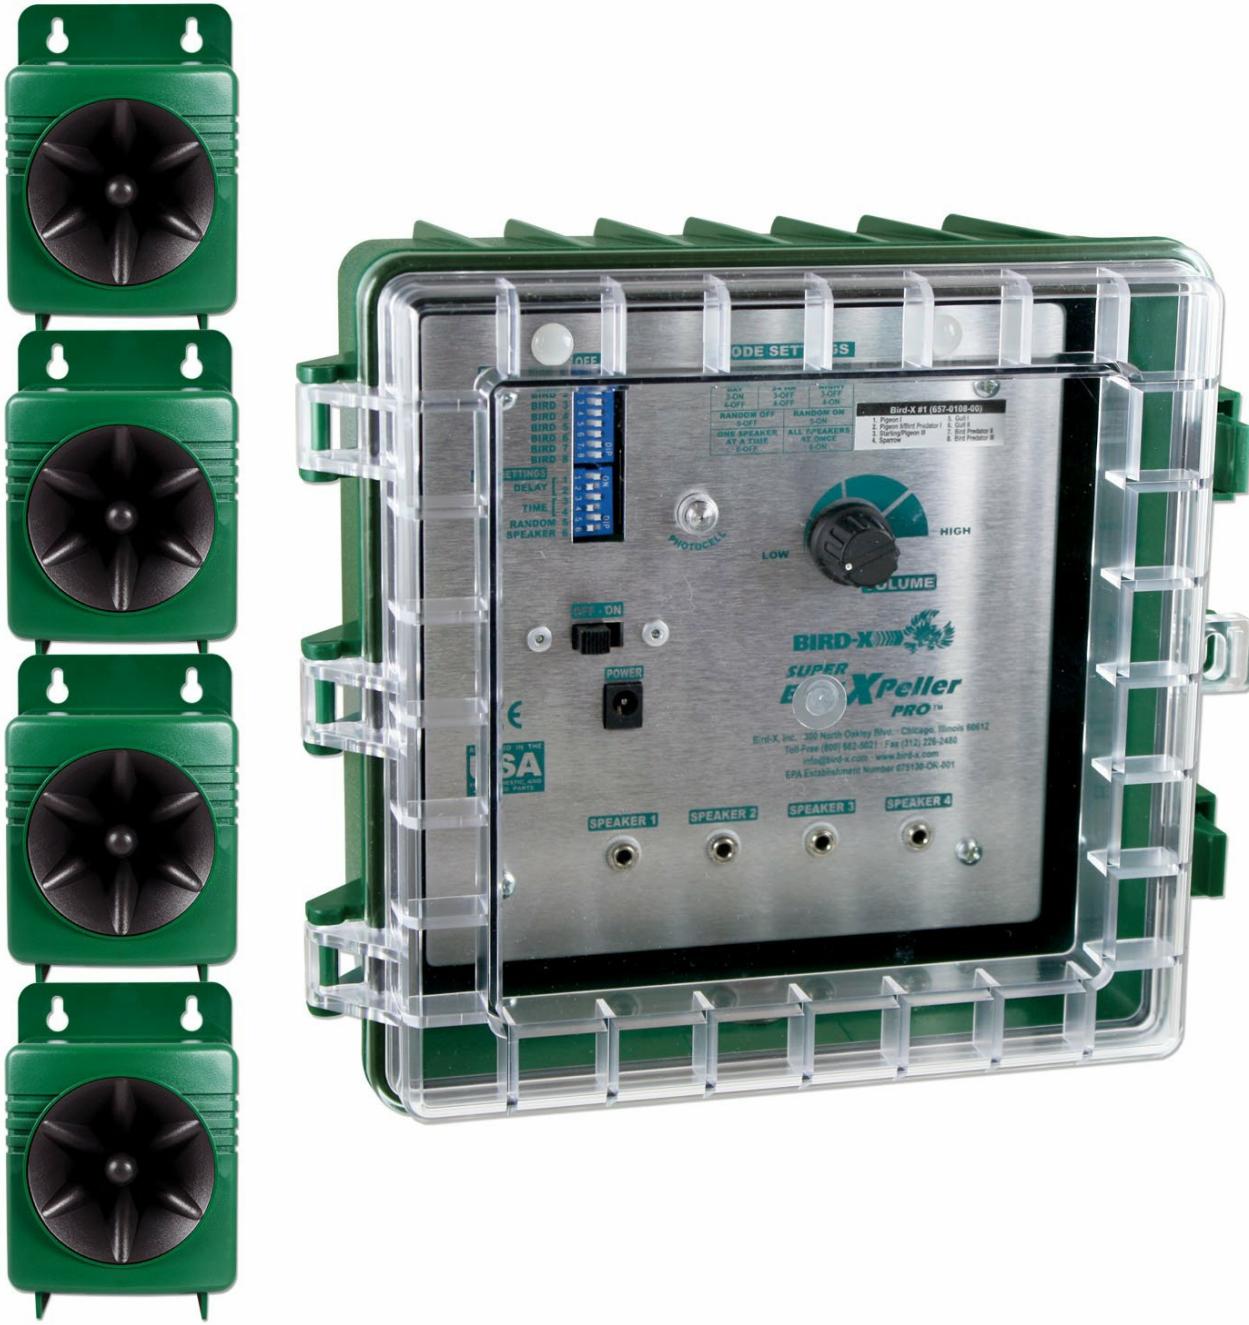

Image: The Super BirdXPeller PRO system, showing the main control unit and four green speakers.

## SETUP AND INSTALLATION

Proper installation is crucial for the effectiveness of the Super BirdXPeller PRO. The system consists of a central control unit and four satellite speakers.

## 1. Control Unit Placement

The control unit measures 9" x 9" x 5.25" and should be mounted in a secure, accessible location, protected from extreme weather conditions if possible, although it is designed to be weather-resistant. Ensure it is within reach of a power outlet.

## 2. Speaker Placement

Each speaker measures 4" x 4" x 6" and comes with 100 feet of wire, allowing for flexible placement. Strategically position the four speakers to maximize coverage of the desired area (up to 6 acres). Speakers should be mounted facing the areas where birds are most problematic. Consider mounting them on poles, walls, or other elevated structures to ensure sound dispersion.

Image: A close-up view of the four speakers, highlighting their compact design and mounting points.

### 3. Wiring

Connect each of the four speakers to the corresponding speaker outputs on the control unit using the provided wires. Ensure all connections are secure to prevent signal loss.

### 4. Power Connection

Plug the power adaptor into the control unit and then into a standard electrical outlet. The unit is now ready for operation.

## OPERATING INSTRUCTIONS

---

The Super BirdXPeller PRO Version 2 offers programmable settings for precise control over sound, volume, and hours of operation.

### 1. Power On/Off

Locate the ON/OFF switch on the control unit. Flip it to the 'ON' position to power the device. The unit will begin broadcasting sounds according to its current settings.

### 2. Volume Control

Adjust the volume knob on the control unit to achieve the desired sound level. The device emits sound pressure ranging from 105 to 110 dB at 1 meter.

### 3. Sound Selection and Frequency

The unit broadcasts a variety of bird distress calls and predator sounds. The frequency range is 3-5 kHz. Refer to the control unit's interface for specific sound mode selections. Some models may have dip switches or dials to select specific bird types or sound patterns.

Image: A detailed view of the control unit, showing the various settings and connections.

## 4. Programmable Settings (Time and Delay)

The Super BirdXPeller PRO Version 2 allows for customization of sound delays and hours of operation. Consult the labels on the control unit for specific switch settings related to:

- **MODE SET:** Select specific bird species or general predator calls.
- **TIME:** Set the operational hours (e.g., day, night, 24-hour).
- **DELAY:** Adjust the interval between sound broadcasts to vary sound intervals to prevent birds from habituating to the sounds.

Experiment with different settings to find the most effective combination for your specific bird problem and environment.

## MAINTENANCE

Regular maintenance ensures the longevity and effectiveness of your Bird-X Super BirdXPeller PRO.

- **Cleaning:** Periodically wipe down the control unit and speakers with a damp cloth to remove dust and debris. Do not use harsh chemicals or abrasive cleaners.
- **Cable Inspection:** Regularly check all speaker wires and the power cable for any signs of wear, fraying, or damage. Replace damaged cables immediately.
- **Speaker Check:** Ensure speakers are free from obstructions (e.g., spiderwebs, leaves) that could impede sound output.
- **Environmental Protection:** While weather-resistant, consider providing additional shelter for the control unit in areas prone to extreme weather to extend its lifespan.

## TROUBLESHOOTING

If you encounter issues with your Super BirdXPeller PRO, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No sound from speakers	Unit not powered on Loose speaker connections Damaged speaker wire Volume set too low	Ensure ON/OFF switch is in 'ON' position. Check all speaker cables are securely plugged into the control unit and speakers. Inspect wires for cuts or breaks; replace if necessary. Increase the volume using the control knob.

Problem	Possible Cause	Solution
Birds are not deterred	Incorrect sound mode selected Birds habituating to sounds Speakers not optimally placed Area too large for coverage	Verify the selected sound mode matches the target bird species. Adjust the delay settings to vary sound intervals. Reposition speakers to cover problem areas more effectively. Consider adding more units for areas larger than 6 acres.
Intermittent sound	Loose power connection Faulty power adaptor Internal unit issue	Ensure power adaptor is firmly plugged into the unit and outlet. Try a different power outlet or adaptor if available. Contact customer support if the issue persists.

## SPECIFICATIONS

<b>Model Number</b>	SBXP-PRO-2
<b>Brand</b>	Bird-X
<b>Coverage Area</b>	Up to 6 acres
<b>Sound Pressure</b>	105-110 dB at 1 meter
<b>Frequency Range</b>	3-5 kHz

**GRAINGER**

**Occupational Health & Safety**

**Bird-X Bird/Pest Control** lowers health and safety risks while saving money with "green" solutions

**Issues:**

- Risk of Disease for employees and customers. Over 60 transmissible diseases from birds and their droppings
- Financial loss from bird damage to property and equipment
- Financial liability from slips and falls on bird droppings (pigeon, gulls, etc)
- Health and safety concerns from bird droppings
- Bird infest facilities give a bad image for employees and customers and make products unusable
- Cost of cleaning bird droppings is high and wastes valuable resources

**Application:** Bird and pest can be controlled without harming them or the environment. Physical barriers like spiked mesh, spikes or wire fencing, sound deterrents, visual repellents, etc. saves money and resources.

**Repel:** Pigeons, Sparrows, Starlings, Crows, etc. - electronic bird control devices are simple and low-maintenance.

**BirdBlast PRO:** Bombs birds with unrelenting sound contrabutions (100W)

- Operates on 110VAC or 220VAC and can be programmed to turn on and off
- Equivalent to having BOTH the Super BirdBuster PRO #1 and the UltraSound PRO #1
- Ships with three visual repellent device for maximum repel and effectiveness

**Repel:** Pigeons, Sparrows, Starlings, Crows, etc. - electronic bird control devices are simple and low-maintenance.

**Super QuadBlast PRO 4+ Stroke visual deterrent (100W)**

- Repel birds and bats for up to 6,500 sq. ft.
- Use in loading docks, warehouses, storage facilities - enclosed or open areas
- Ships with three visual repellent device for maximum repel and effectiveness

**BirdBuster PRO 04+ Stroke visual deterrent (100W)**

- Repel birds and bats for up to 6,500 sq. ft.
- Use in loading docks, warehouses, storage facilities - enclosed or open areas
- Ships with three visual repellent device for maximum repel and effectiveness

**BirdBuster PRO indoor laser bird repeller (3K2D)**

- Laser beam repels birds from areas up to 2,500 sq. ft.
- UltraSound X ultrasonic bird repeller (100W)
- Controls up to 1 acre, indoors or outdoors
- Repels pigeons, gulls, starlings and sparrows
- Ships with three visual repellent device for maximum repel and effectiveness

**Repel:** Pigeons, Sparrows, Starlings, Crows, etc. - electronic bird control devices are simple and low-maintenance.

**BirdBuster PRO #1 (100W) & SBXP-PRO-1 (360W)**

- Protects up to 1 acre, indoors or outdoors
- Repels pigeons, gulls, starlings and sparrows
- Ships with three visual repellent device for maximum repel and effectiveness

**SBXP-PRO 1 (100W) & SBXP-PRO-2 (360W)**

- Protects up to 1 acre, indoors or outdoors
- Repels pigeons, gulls, starlings and sparrows
- Ships with three visual repellent device for maximum repel and effectiveness

**Mega Blaster PRO wide-area bird control (100W)**

- Protects up to 30 acres/over 50 customized sounds available
