TIMEX T2N151

Timex T2N151 Women's Analog Watch Instruction Manual

1. INTRODUCTION

This manual provides essential instructions for the proper use, care, and maintenance of your Timex T2N151 Women's Analog Watch. Please read this guide thoroughly to ensure optimal performance and longevity of your timepiece.

2. SETUP

2.1 Setting the Time

1. **Pull out the crown:** Gently pull the crown (the small knob on the side of the watch case) to its outermost position.
2. **Adjust the time:** Rotate the crown clockwise or counter-clockwise until the hour and minute hands indicate the correct time.
3. **Push in the crown:** Once the time is set, push the crown back into its original position against the watch case. This will start the watch movement.

Image 2: Side view of the watch, highlighting the crown used for time adjustment.

3. OPERATING THE WATCH

Your Timex T2N151 is an analog watch designed for simple timekeeping. Once the time is set, the watch will continuously display the current time using its hour, minute, and second hands.

3.1 Reading the Time

The watch features a white dial with clear hour markers and hands. The longer hand indicates minutes, the shorter hand indicates hours, and the thin sweeping hand indicates seconds.

4. MAINTENANCE AND CARE

4.1 Cleaning Your Watch

- Wipe the watch case and crystal with a soft, dry cloth.
- For the leather strap, avoid prolonged exposure to water, direct sunlight, and harsh chemicals. Clean with a slightly damp cloth and allow to air dry.

4.2 Water Resistance

This watch is water resistant up to 50 meters (5 ATM). This means it is suitable for short periods of recreational swimming, but not for diving or snorkeling. Avoid operating the crown while the watch is wet.

Image 4: Illustration detailing the water resistance capabilities of a watch, indicating suitability for swimming.

4.3 Battery Replacement

The watch is powered by a quartz movement, which requires a battery. When the watch stops running, the battery may need replacement. It is recommended to have the battery replaced by an authorized Timex service center to ensure proper sealing and water resistance.

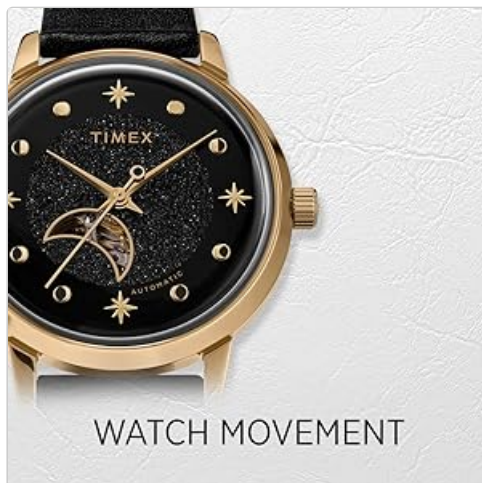

Image 5: A detailed view of a watch's quartz movement, which houses the battery.

5. TROUBLESHOOTING

- **Watch not running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Time is incorrect:** Reset the time as described in Section 2.1. If the time continues to be inaccurate, the watch may require servicing.
- **Condensation under crystal:** This indicates a loss of water resistance. Avoid further contact with water and seek professional servicing immediately.

6. SPECIFICATIONS

Feature	Detail
Model Number	T2N151
Display Type	Analog

Movement Type	Quartz
Case Diameter	36 Millimetres
Case Thickness	10 Millimetres
Band Material	Leather
Band Width	17 Millimetres
