

## Moen 104400

# Moen 104400 Commercial Service Kit Filter Instruction Manual

Model: 104400

## INTRODUCTION

This manual provides essential instructions for the installation, care, and maintenance of the Moen 104400 Commercial Service Kit Filter. This kit is designed as a direct replacement part for commercial plumbing fixtures, ensuring continued optimal performance.

## PRODUCT OVERVIEW

**Figure 1:** Moen 104400 Commercial Service Kit Filter. This image displays the Moen 104400 Commercial Service Kit Filter. It features a brass body with threaded connections at both ends for secure attachment within a plumbing system. A small blue rubber band is visible near the top connection, possibly indicating a seal or a temporary securing element. The filter is designed for commercial applications.

The Moen 104400 Commercial Service Kit Filter is an authentic Moen replacement component. It is engineered for straightforward installation, facilitating the repair of existing plumbing fixtures without requiring a complete unit replacement. This kit helps maintain the functionality of your commercial faucet system.

- Authentic Moen replacement part.
- Designed for hassle-free installation.
- Ideal for repairing problematic plumbing fixtures.

## INSTALLATION GUIDELINES

### Safety Precautions

Before commencing any installation or replacement procedure, it is crucial to turn off the main water supply to the fixture. Subsequently, open the faucet handle to relieve any residual water pressure within the system. This ensures a complete water shut-off and prevents unintended water flow during the process, minimizing the risk of leaks or injury.

## Installation Steps

1. Ensure water supply is completely off as described in the safety precautions.
2. Carefully remove the existing filter or component that is being replaced.
3. Install the Moen 104400 Commercial Service Kit Filter, ensuring all connections are secure and properly tightened to prevent leaks.
4. Slowly turn the water supply back on and check for any leaks around the newly installed filter.
5. Test the faucet's operation to confirm proper functionality.

## CARE AND MAINTENANCE

To maintain the appearance and integrity of the metallic parts of your Moen faucet, including components associated with this service kit, follow these guidelines:

- Apply a non-abrasive wax, such as car wax, to preserve the finish.
- If using cleaners, rinse them off immediately with water to prevent damage to the finish.
- Mild abrasives are acceptable for Platinum and LifeShine® finishes only. For other finishes, avoid abrasive cleaners.

## TROUBLESHOOTING

If you encounter issues after installing the Moen 104400 Commercial Service Kit Filter, consider the following:

- **Leaks:** Ensure all connections are securely tightened. Check for proper seating of any gaskets or O-rings.
- **Reduced Water Flow:** Verify that the filter is installed correctly and not obstructed. Ensure the main water supply valve is fully open.
- **Persistent Problems:** If issues persist despite troubleshooting, it is recommended to consult a qualified plumbing professional.

## SPECIFICATIONS

Attribute	Detail
Brand	Moen
Model Number	104400
Part Number	104400
Item Weight	8 ounces
Product Dimensions	3.32 x 1.52 x 1.52 inches
Included Components	Filter
Item Package Quantity	1
Number Of Pieces	1
Color	Chrome
Finish	Chrome
UPC	026508167670

Attribute	Detail
Date First Available	June 29, 2009
