Heiden HD009

Heiden Single Automatic Watch Winder Model HD009 Instruction Manual

Model: HD009

1. INTRODUCTION

Thank you for choosing the Heiden Single Automatic Watch Winder Model HD009. This device is designed to keep your automatic watch wound and ready to wear, ensuring its accuracy and longevity. Please read this manual carefully before operating the watch winder to ensure proper use and maintenance.

2. PRODUCT OVERVIEW

The Heiden HD009 watch winder is crafted with quality materials, including a vegan black leather exterior with elegant white stitching and a soft velvet interior. It features a quiet Japanese Mabuchi Motor designed with zero magnetization to protect your watch. The winder is designed to accommodate various watch sizes with its adjustable soft watch pillow.

Key Features:

- **Quality Construction:** Vegan black leather finish, soft velvet interior.
- **Japanese Motor:** Ensures quiet operation and zero magnetization.

- **Dual Power Options:** Operates via included AC adapter or 2 x D size batteries.
- **Multiple Settings:** 12 distinct settings for Turns Per Day (TPD) and rotation direction.
- **Adjustable Watch Pillow:** Accommodates various watch sizes, includes an extender for larger wristbands.

3. SETUP

3.1 Unpacking

Carefully remove the watch winder and all accessories from its packaging. Ensure all components are present: the watch winder unit, AC adapter, storage bag, microfiber cloth, and watch pillow extender.

3.2 Inserting Your Watch

1. Open the winder's lid.

2. Gently place your automatic watch onto the adjustable watch pillow. Ensure the watch is securely fitted. For larger wristbands, use the included watch pillow extender.
3. Place the watch pillow with the watch into the rotating cradle inside the winder.
4. Close the lid.

4. POWER OPTIONS

4.1 AC Power

Connect the included AC adapter (110-240V) to the power input port located at the back of the watch winder. Plug the adapter into a suitable wall outlet.

4.2 Battery Power

The watch winder can also be powered by 2 x D size batteries (not included). To install batteries:

1. Locate the battery compartment on the back of the winder.
2. Open the compartment cover.
3. Insert 2 D size batteries, ensuring correct polarity (+/-).
4. Close the battery compartment cover.

When powered by batteries, the winder can operate for approximately 1-3 months, depending on the selected winding

setting.

5. OPERATION

5.1 Power On/Off

Press the power button located on the front of the winder to turn the unit on or off.

5.2 Winding Settings

The Heiden HD009 offers 12 multiple settings to accommodate various automatic watch movements. These settings control the Turns Per Day (TPD) and the direction of rotation (clockwise, counter-clockwise, or bi-directional). To adjust the settings, locate the switch on the back of the winder. Refer to your watch manufacturer's recommendations for the optimal TPD and rotation direction for your specific watch model. Experiment with different settings if you are unsure, starting with a bi-directional setting and a moderate TPD.

Heiden

DUAL POWERED

Can run on batteries or included power adapter (110-220V)

6. MAINTENANCE

To ensure the longevity and appearance of your Heiden watch winder, follow these maintenance guidelines:

- **Cleaning:** Use the included microfiber cloth to gently wipe the exterior and interior surfaces. Avoid abrasive cleaners or solvents.
- **Placement:** Place the winder on a stable, level surface away from direct sunlight, extreme temperatures, and high humidity.
- **Watch Pillow:** Periodically check the watch pillow for wear and tear. Ensure it remains soft and supportive for your watch.

7. TROUBLESHOOTING

Winder Not Operating:

- Ensure the AC adapter is securely plugged into both the winder and a working wall outlet.
- If using batteries, check that they are correctly installed with the proper polarity and are not depleted. Replace batteries if necessary.
- Confirm the power button on the front of the winder has been pressed to the 'On' position.

Watch Not Winding:

- Verify that your watch is an automatic movement watch.
- Check the winding settings (TPD and direction) against your watch manufacturer's recommendations. Adjust as needed.
- Ensure the watch is securely seated on the watch pillow and not obstructing the rotation.

Compatibility Note:

Watch winders are generally not compatible with Seiko Kinetic Watches. The winding mechanism for Seiko Kinetic watches differs from traditional automatic movement watches. This winder is designed for standard automatic watches.
