

## TEMPO 521A

# TEMPO Communications 521A Irrigation Sprinkler Valve Locator Tool

User Instruction Manual

## INTRODUCTION

---

This manual provides comprehensive instructions for the safe and effective operation of the TEMPO Communications 521A Irrigation Sprinkler Valve Locator Tool. The 521A is designed to assist professionals in locating buried wires and valves within irrigation systems, offering precision and reliability for troubleshooting and maintenance tasks. Please read this manual thoroughly before using the device.

## SAFETY INFORMATION

---

- Always ensure the transmitter is connected to a **de-energized** circuit. Connecting to an active circuit can cause damage to the device and potential injury.
- Wear appropriate personal protective equipment (PPE) as required by site conditions.
- Keep the device away from water and extreme temperatures unless specified for such conditions.
- Do not attempt to modify or repair the device. Refer all servicing to qualified personnel.
- Store the device and its components in the provided carry case to prevent damage.

## PACKAGE CONTENTS

---

Verify that all items listed below are present in your package:

- 521-C Carry Case
- 521-R Receiver
- 521-T Transmitter
- HS-1 Headset

Image: The TEMPO Communications 521A system, including the receiver, transmitter, headphones, and connecting cables, neatly organized within its durable orange carry case.

## PRODUCT OVERVIEW

---

The 521A system consists of a transmitter, a receiver, and a headset, all housed in a protective carry case. Understanding each component is crucial for effective operation.

1. Headphones  
2. Transmitter

3. Battery Cover  
4. Receiver

Image: A detailed view of the TEMPO 521A components, clearly indicating the Headphones (1), Transmitter (2), Battery Cover (3), and Receiver (4).

### Transmitter (521-T)

The transmitter generates a signal that is sent through the wire being traced. It features an adjustable output power dial and a battery test function.

# HIGH POWER TRANSMITTER

OFFERS EXTENDED LONG RANGE  
AND ALLOWS USE ON HIGHER  
RESISTANCE WIRE PATHS.

Image: A close-up of the 521A Transmitter's control panel, showing the ON/OFF switch, output power selection dial (1-5), and battery test indicator.

## Receiver (521-R)

The receiver detects the signal emitted by the transmitter, allowing for the tracing of buried wires and the pinpointing of valves. It includes a loudspeaker and a port for the headset.

## Headset (HS-1)

The rugged headset provides clear audio feedback from the receiver, helping to block ambient noise for improved signal detection.

## SETUP

1. **Battery Installation:** The 521A requires batteries for both the transmitter and receiver. Open the battery compartments and insert the specified alkaline batteries, ensuring correct polarity. The product does not include batteries.
2. **Transmitter Connection:** Connect the transmitter's leads to the wire you intend to trace. One lead should be

connected to the irrigation wire, and the other to a good ground stake. Ensure a secure connection.

3. **Receiver Assembly:** Attach the receiver to its probe handle.
4. **Headset Connection:** Plug the HS-1 headset into the receiver's audio jack for enhanced signal clarity.

Image: A user connecting the transmitter's red and black leads, one to an irrigation wire and the other to a ground stake, preparing for wire tracing.

## OPERATING INSTRUCTIONS

---

### 1. Preparing the Transmitter

1. Ensure the irrigation system is turned off and the wire to be traced is de-energized.
2. Connect the red lead of the transmitter to the irrigation wire.
3. Connect the black lead of the transmitter to a suitable ground point, such as a metal stake driven into the earth or a known good ground.
4. Turn the transmitter ON.
5. Perform a battery test by rotating the output power dial. A reading between 4 and 8 indicates sufficient battery power.
6. Adjust the output power dial to a setting that provides a clear signal without excessive bleed-over to adjacent wires. Start with a lower setting and increase if needed.

### 2. Using the Receiver to Trace Wires

1. Turn the receiver ON.
2. Hold the receiver vertically with the tip near the ground, directly above the suspected path of the buried wire.
3. Listen for the audio signal through the loudspeaker or headset. The signal will be strongest directly over the wire.
4. Move the receiver slowly along the suspected path. The signal will decrease as you move away from the wire and increase as you move closer.
5. To pinpoint the exact location, sweep the receiver from side to side. The peak signal indicates the wire's position.

Image: A visual guide demonstrating various techniques for using the 521A receiver, including sweeping motions to locate wires and pinpoint valves.

Image: A user holding the 521A receiver, sweeping it across the ground to detect the signal from a buried irrigation wire.

### 3. Pinpointing Valves (Hotspot Signal Detection)

When tracing a wire, a significant increase in signal strength, often accompanied by a distinct change in tone, indicates the presence of a valve solenoid. This "hotspot" signal allows for precise valve location.

1. As you trace the wire, pay close attention to sudden increases in signal intensity.
2. Once a hotspot is detected, move the receiver in a small circular or grid pattern around the area to find the exact center of the strongest signal. This will be the location of the valve.

Image: A user carefully maneuvering the 521A receiver over an area of ground, focusing on a strong signal to pinpoint the exact location of a buried valve.

## MAINTENANCE

---

- **Cleaning:** Wipe down the transmitter and receiver with a damp cloth after each use. Do not use abrasive cleaners or solvents.
- **Storage:** Always store the 521A system in its original carry case in a dry, cool place when not in use.
- **Battery Care:** Remove batteries from both the transmitter and receiver if the device will not be used for an extended period to prevent leakage.
- **Inspection:** Periodically inspect all cables and connections for signs of wear or damage. Replace damaged components as necessary.

## TROUBLESHOOTING

---

- **No Signal:**
  - Check battery levels in both transmitter and receiver. Replace if low.
  - Ensure all connections are secure and correct.
  - Verify the wire being traced is de-energized and has a good ground connection.
  - Increase the transmitter's output power setting.
- **Weak or Intermittent Signal:**
  - Ensure the ground connection is optimal.
  - Increase transmitter output power.
  - Check for excessive moisture or highly conductive soil conditions which can attenuate the signal.
  - Ensure the receiver is held vertically and close to the ground.
- **Difficulty Pinpointing Valve:**
  - Ensure the transmitter is connected directly to the valve wire, not a common wire.
  - Slow down your sweeping motion and listen carefully for the distinct hotspot signal.
  - Adjust the transmitter's output power to a lower setting if the signal is too broad.

## SPECIFICATIONS

Feature	Detail
Model Number	521A
Manufacturer	Tempo Communications
Item Weight	8.13 pounds
Product Dimensions	34.4 x 7 x 10.25 inches
Power Source	Battery Powered
Batteries Required	Yes (Alkaline)
Included Components	521-C Carry Case, 521-R Receiver, 521-T Transmitter, HS-1 Headset
Usage	Professional
Material	Plastic

## WARRANTY AND SUPPORT

### Warranty Information

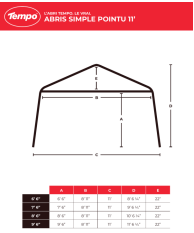

The TEMPO Communications 521A comes with a **Limited Lifetime Warranty**. For specific terms and conditions, please refer to the warranty documentation included with your product or visit the official Tempo Communications website.

### Customer Support

For technical assistance, troubleshooting, or replacement parts, please contact Tempo Communications customer support. *Contact information can typically be found on the manufacturer's website or in the product packaging.*

#### Find us on the Road! Visit us at the ISE Expo

Tempo Communications will be at the ISE Expo in Fort Worth, TX, September 14-16, 2019. Stop by Booth #222 to check out the new Tempo booth and grab some Tempo giveaways!

#### Visit us at the SCTE Expo and Cable-Tec Games

In New Orleans, October 1-3, 2019. Stop by Booth #2220 to learn more about the new Tempo booth, grab some Tempo swag, and get a sneak peek at our new TDS. While you're there, tell us how you can use a Portable Test Kit!

#### A Whole New Kind of Marker Ball

**OMNIMARKERII**

The next is new. Tempo Communications is excited to launch the Omni Marker II electronic marker ball, complete with a patent pending, self-healing feature and large diameter ball structure for optimal handling.

Free of hazardous materials, the Omni Marker II built on the company's 30 years of experience in developing robust, tested and reliable electronic marker ball and marker technology to identify and locate broken cables, splices, fittings and more—helping to avoid costly damage and enhance safety.

To learn more about this latest addition from Tempo Communications, go to [www.omnii.com](http://www.omnii.com)

#### Tips & Tricks from Industry Expert:

As independent test and test equipment specialists we are able to operate with increased flexibility to ensure that we are best focused on meeting our customers' evolving needs. We also have a wealth of knowledge based on years of firsthand experience.

Our technical support team can help you answer any of your product related questions to make doing your jobs as easy as possible. Often after installing or replacing batteries in a DCSA transmitter, the unit will not power up. The reason this occurs is because one or more of the D...

Due to the tight fit of the batteries in their individual slots, it can appear that the battery's positive side is making contact when there is actually a small gap between the battery's positive side and the battery compartment positive terminal. This problem is easily fixed by pushing each of the batteries on the negative side towards the battery compartment positive terminals (shown in the picture below).

If there is a topic you'd like covered, please send your questions to [my.editor@tempocomm.com](mailto:my.editor@tempocomm.com)
