SETUP AND INSTALLATION

Follow these steps for proper installation of your Schonbek Quantum Bathroom Light.

1. **Prepare for Installation:** Turn off power at the circuit breaker or fuse box. Ensure the power is completely disconnected before proceeding.
2. **Mounting the Fixture:** The fixture is designed to mount to a standard electrical box. Secure the mounting bracket to the electrical box using the provided hardware. Ensure the bracket is firmly attached.
3. **Electrical Connections:** Connect the fixture's wires to the corresponding household wires (black to black, white to white, ground to ground) using wire nuts. Ensure all connections are secure.
4. **Secure the Fixture:** Carefully attach the fixture body to the mounting bracket, ensuring all wires are tucked safely inside the electrical box. Secure the fixture using the provided screws or fasteners.
5. **Crystal Assembly:** This fixture requires assembly and pinning of the crystals. Refer to the detailed instruction sheets included in the box for specific guidance on attaching the baguette, square, and octagon crystals. Handle crystals with care to avoid damage or fingerprints.

6. **Install Light Bulbs:** Insert the 6 included E12 base, G11 shape, 120V incandescent bulbs (40W max each) into the sockets. Do not exceed the maximum wattage.
7. **Restore Power:** Once installation is complete and all crystals are securely attached, restore power at the circuit breaker or fuse box.

OPERATING INSTRUCTIONS

The Schonbek Quantum Bathroom Light is designed for straightforward operation.

- **Power On/Off:** Control the light using a standard wall switch connected to the fixture's electrical circuit.
- **Dimming Functionality:** This fixture supports smooth and continuous dimming when used with a compatible

dimmer switch (not included). Ensure your dimmer switch is rated for incandescent loads.

- **Control Method:** The fixture itself does not have an integrated control method beyond the wall switch. The 'Touch' and 'Push Button' control methods mentioned in some specifications typically refer to the type of wall switch used, not a feature on the fixture itself.

MAINTENANCE

Proper care will ensure the lasting beauty and performance of your Schonbek Quantum Bathroom Light.

- **Cleaning the Fixture:** Disconnect power before cleaning. Use a soft, dry, or slightly damp cloth to wipe the stainless steel frame. Avoid abrasive cleaners or solvents, as they can damage the finish.
- **Cleaning Crystals:** For crystal elements, use a soft, lint-free cloth. A mild glass cleaner can be sparingly applied to the cloth (not directly to the crystals) for stubborn spots. Ensure no liquid drips into electrical components.
- **Bulb Replacement:** Disconnect power before replacing bulbs. Allow bulbs to cool completely. Replace with E12 base, G11 shape, 120V incandescent bulbs, not exceeding 40W per bulb.

TROUBLESHOOTING

If you encounter issues with your fixture, refer to the following common solutions:

Problem	Possible Cause	Solution
Light does not turn on.	No power to the fixture. Loose wiring connection. Faulty bulb.	Check circuit breaker/fuse. Verify all electrical connections are secure (with power off). Replace bulb.
Light flickers or dims inconsistently.	Loose bulb. Incompatible dimmer switch. Loose wiring.	Tighten bulb. Ensure dimmer is compatible with incandescent loads. Check wiring connections (with power off).
Crystals appear dull or dirty.	Dust or residue buildup.	Clean crystals as per maintenance instructions.

If the problem persists after attempting these solutions, contact a qualified electrician or Schonbek customer support.
