Swimline PCO1431

SWIMLINE HYDROTOOLS Silver King Deluxe Pro Pool Cover (PCO1431) Instruction Manual

Model: PCO1431 | Brand: Swimline

INTRODUCTION

The SWIMLINE HYDROTOOLS Silver King Deluxe Pro Pool Cover is designed to protect your above-ground swimming pool during the winter season. This heavy-duty cover effectively prevents snow, ice, and debris from entering your pool, helping to maintain its condition for the next swimming season.

Constructed from a unique woven fabric material, this cover features a solid, tight weave with a 12x12 scrim count, ensuring no water or debris penetrates. It is also UV and chemical resistant, contributing to its durability and extended lifespan.

SHIELD YOUR POOL THROUGH THE WINTER FROM:

COUNT

A detailed view highlighting the Silver King pool cover's construction, featuring a tight-woven fabric with a 12x12 scrim count, designed for enhanced durability and protection against debris and water.

SETUP AND INSTALLATION

The installation process for your Swimline Hydrotools pool cover is designed to be straightforward. Each cover includes perimeter attachment grommets, a steel cable, and a winch for secure fastening.

Components Included:

- Heavy-duty pool cover
- Perimeter attachment grommets (integrated)
- Steel cable
- Winch

This image displays the essential components included with the pool cover: integrated grommets for securing, a durable red cable wire, and a robust metal winch for tightening the cover around the pool.

Installation Steps:

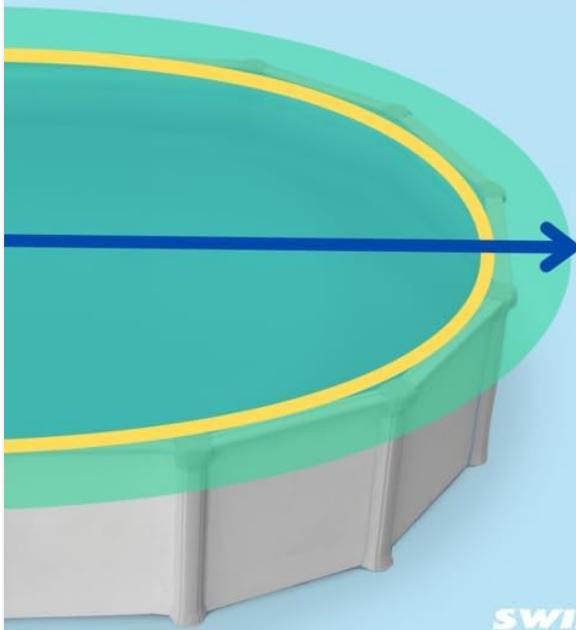

1. Unpack the pool cover and all included accessories.
2. Carefully spread the cover over your above-ground pool, ensuring it is centered.
3. Refer to the sizing guide: This 31 FT diameter cover is designed for 28 FT round pools, providing ample overlapping material for a secure fit.
4. Ensure the cover naturally floats loosely on the water's surface.
5. Thread the steel cable through the perimeter grommets.
6. Use the provided winch to tighten the cable, securing the cover firmly around the pool. Ensure it is snug but not overstressed.
7. For enhanced protection and stability, consider using additional winterizing accessories such as ice equalizer air pillows, water tubes, or wall bags, utilizing the integrated perimeter grommets for attachment.

SWIMLINE ORDERING GUIDE

Swimline pool covers are designed to be **LARGER** than the size of your pool. This is to ensure proper overlapping material for a perfect fit.

PLEASE NOTE THE:

POOL SIZE and **COVER SIZE**
when selecting your pool cover!

POOL

COVER

Always covers
top rail

Ensures good
fit + room for
additional
accessories

SWIMLINE™

This guide clarifies the sizing principle for Swimline pool covers: the cover itself is designed to be larger than the pool's diameter to ensure adequate overlap, cover the top rail, and allow space for additional accessories.

SWIMLINE

PAIRS PERFECTLY WITH SWIMLINE'S FULL SUITE OF WINTER ACCESSORIES

Water Tubes

Shapes & Sizes Vary

Holds winter covers securely in place.

AG Cover Wall Bag

Extra security against wind damage.

Air Pillows

Protects above-ground pools from damage caused by rain, snow & ice.

Winter Cover Cable

Used with cover to help secure in place.

Cover Blocks

Fill with water or sand & keep inground winter covers in place.

Cable Winch

Aids in tightening cable for securing pool cover.

Cover Clips

Holds winter covers securely in place.

Stainless Steel Winterizing Plate

For wide mouth & standard thru-wall skimmers.

CoverSaver

Protects winter cover from water, ice & mildew damage.

This image illustrates the range of Swimline winter accessories that can be used in conjunction with the pool cover for enhanced security and protection, such as water tubes, air pillows, and cover clips.

OPERATING INSTRUCTIONS

Once installed, the pool cover should be checked periodically to ensure optimal performance throughout the winter season.

- Ensure the cover maintains a loose float on the water's surface, allowing for natural movement with water levels.
- Verify that the winch and cable remain securely tightened around the pool's perimeter. Adjust as necessary to prevent sagging or excessive stress on the cover.
- Regularly remove any accumulated snow, ice, or heavy debris from the cover's surface to prevent undue strain and potential damage.

MAINTENANCE AND CARE

Proper maintenance will extend the life of your Swimline Hydrotools pool cover.

- **Cleaning:** Keep the cover secure and free from excessive debris. For general cleaning, use a soft brush and water. Avoid harsh chemicals that could degrade the material.

- **Storage:** When not in use, clean the cover thoroughly, allow it to dry completely, and fold it neatly. Store it in a dry, cool place away from direct sunlight and extreme temperatures to prolong its lifespan and prevent damage.
- **Material Properties:** The cover is designed to be UV and chemical resistant, offering protection against environmental factors. However, prolonged exposure to concentrated chemicals or sharp objects should be avoided.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Cover Appears Thin or Has Imperfections:** While the cover is designed for durability, minor manufacturing variations can occur. Monitor these areas. If significant defects are present upon initial receipt, contact customer support.
- **Incorrect Fit:** Ensure you have selected the correct cover size for your pool. The cover is intentionally larger than your pool's diameter to allow for proper overlap and securing. Refer to the sizing guide in the Setup section.
- **Leaks or Premature Tears:** Inspect the pool area for any sharp edges that might have caused damage. Verify that the winch and cable are tightened adequately but not excessively, as over-tightening can cause stress. For issues suspected to be manufacturing defects, refer to the Warranty section.
