## Poolmaster 37650

# Poolmaster 37650 Adapter Spring V Clips User Manual

Brand: Poolmaster | Model: 37650

## 1. INTRODUCTION

---

The Poolmaster 37650 Adapter Spring V Clips are designed to securely connect various swimming pool maintenance tools to standard telescopic poles. These clips ensure a stable attachment, allowing for efficient cleaning and maintenance of your pool or spa. This manual provides instructions for proper installation, usage, and care of your V-clips.

## 2. PRODUCT OVERVIEW

---

The Poolmaster 37650 Adapter Spring V Clips are made from durable plastic, engineered for a sturdy connection with pool equipment. They are essential for attaching items such as pool brushes, skimmer nets, leaf rakes, and vacuum heads to your pool pole.

ITEM #37650

## ADAPTER SPRING CLIPS

Fits Quick Change Handles

Several Poolmaster 37650 Adapter Spring V Clips are shown resting on the textured coping of a swimming pool, with the blue water visible in the background.

### 3. INSTALLATION AND SETUP

---

Follow these steps to properly install the adapter spring V clips and attach your pool cleaning tools:

1. **Identify the Tool Connection Point:** Most pool cleaning tools (skimmers, brushes, vacuum heads) have a designated hole or slot for attaching to a telescopic pole.
2. **Insert the V-Clip:** Gently squeeze the V-clip and insert the two pins into the corresponding holes on your pool cleaning tool. Ensure the clip is fully seated and the pins extend through the tool.
3. **Attach to Telescopic Pole:** Align the V-clip with the end of your telescopic pool pole. The V-clip will slide into the pole's opening. The spring action of the clip will secure the tool to the pole.
4. **Verify Secure Connection:** Lightly tug on the tool to ensure it is firmly attached to the pole before use.

This video illustrates the process of inserting a V-clip into a standard pool pole and then securing a pool skimmer net to the pole using the installed clip. It highlights the ease of attachment for various pool cleaning tools.

### 4. OPERATING INSTRUCTIONS

---

Once your pool cleaning tool is securely attached to the telescopic pole using the Poolmaster 37650 Adapter Spring V Clips, you can proceed with your pool maintenance tasks. The clips provide a reliable connection, allowing you to:

- **Skim Debris:** Use a skimmer net to remove leaves, insects, and other floating debris from the pool surface.
- **Brush Walls and Floor:** Attach a pool brush to scrub algae and dirt from the pool walls, steps, and floor.
- **Vacuum the Pool:** Connect a vacuum head to a pool hose and then to the pole for thorough cleaning of

the pool bottom.

- **Reach Difficult Areas:** The secure connection allows for extended reach and maneuverability in all areas of your pool.

This video from Poolmaster Inc. demonstrates a range of pool maintenance accessories, including skimmers, brushes, and vacuum heads, being used to clean a swimming pool. It provides a visual context for how the adapter spring V clips enable the connection of these tools to a pole for effective pool cleaning.

## 5. MAINTENANCE

---

To ensure the longevity and continued performance of your Poolmaster 37650 Adapter Spring V Clips, follow these maintenance guidelines:

- **Rinse After Use:** After each use, rinse the clips with fresh water to remove any pool chemicals, dirt, or debris.
- **Inspect for Wear:** Periodically inspect the clips for any signs of wear, cracks, or damage. Replace clips that show significant wear to maintain a secure connection.
- **Proper Storage:** Store the clips in a cool, dry place away from direct sunlight when not in use. This helps prevent material degradation over time.

## 6. TROUBLESHOOTING

---

If you encounter any issues with your Poolmaster 37650 Adapter Spring V Clips, consider the following:

- **Tool Not Securing Properly:**
  - Ensure the V-clip pins are fully inserted into the tool's holes.
  - Check if the tool's connection point or the pole's opening is obstructed by debris.
  - Inspect the V-clip for damage or loss of spring tension. A worn clip may not hold securely and should be replaced.
- **Difficulty Inserting/Removing Clip:**
  - Apply gentle pressure while squeezing the clip to insert or remove it. Avoid excessive force.
  - Ensure the tool and pole openings are clean and free of grit.

## 7. SPECIFICATIONS

---

| Feature            | Detail                 |
|--------------------|------------------------|
