## Grace Frame FBA\_EZ3

# Grace Start-Right EZ3 No-Baste Hand Quilting Frame User Manual

MODEL: FBA\_EZ3

## Introduction

---

The Grace Start-Right EZ3 No-Baste Hand Quilting Frame is designed to provide a convenient and adjustable platform for hand quilting. Featuring a three-rail, no-baste work area, this frame allows for efficient fabric management and tension control. Its design prioritizes ease of use, with tool-free adjustments and a foldable structure for compact storage.

## Safety Information

---

- Always assemble the frame on a flat, stable surface to prevent tipping.
- Ensure all knobs and fasteners are securely tightened before use.
- Keep small parts away from children and pets during assembly.
- Do not overload the frame with excessive weight.
- Exercise caution when adjusting the frame's angle or folding it to avoid pinching.

## Setup and Assembly

---

The EZ3 frame is designed for straightforward assembly. While it involves multiple components, all adjustments and locking mechanisms are tool-free, utilizing integrated knobs. It is recommended to follow the detailed instructions provided in the product packaging for a smooth setup process.

1. **Unpack Components:** Carefully unbox all parts and verify against the packing list.
2. **Assemble Frame Legs:** Attach the leg supports to the main frame structure. Ensure all connections are firm.
3. **Install Rails:** Secure the three aluminum rails onto the frame. These rails are specifically designed for the quilting process.
4. **Attach Ratchet Wheels:** Connect the 30-tooth ratchet wheels to the appropriate rail ends. These are crucial for tension control.
5. **Adjust Height and Angle:** Utilize the integrated knobs to set the desired height and tilt angle of the work area. The frame can tilt to four different angles.

## Operating Instructions

---

The EZ3 frame simplifies the quilting process with its no-baste fabric installation and precise tensioning system.

- **Fabric Installation:** Unlike traditional methods, the EZ3 allows you to install your fabric without tacks or tape.

Simply align your fabric and push it into the designated tubing along the rails. This creates a secure and even attachment.

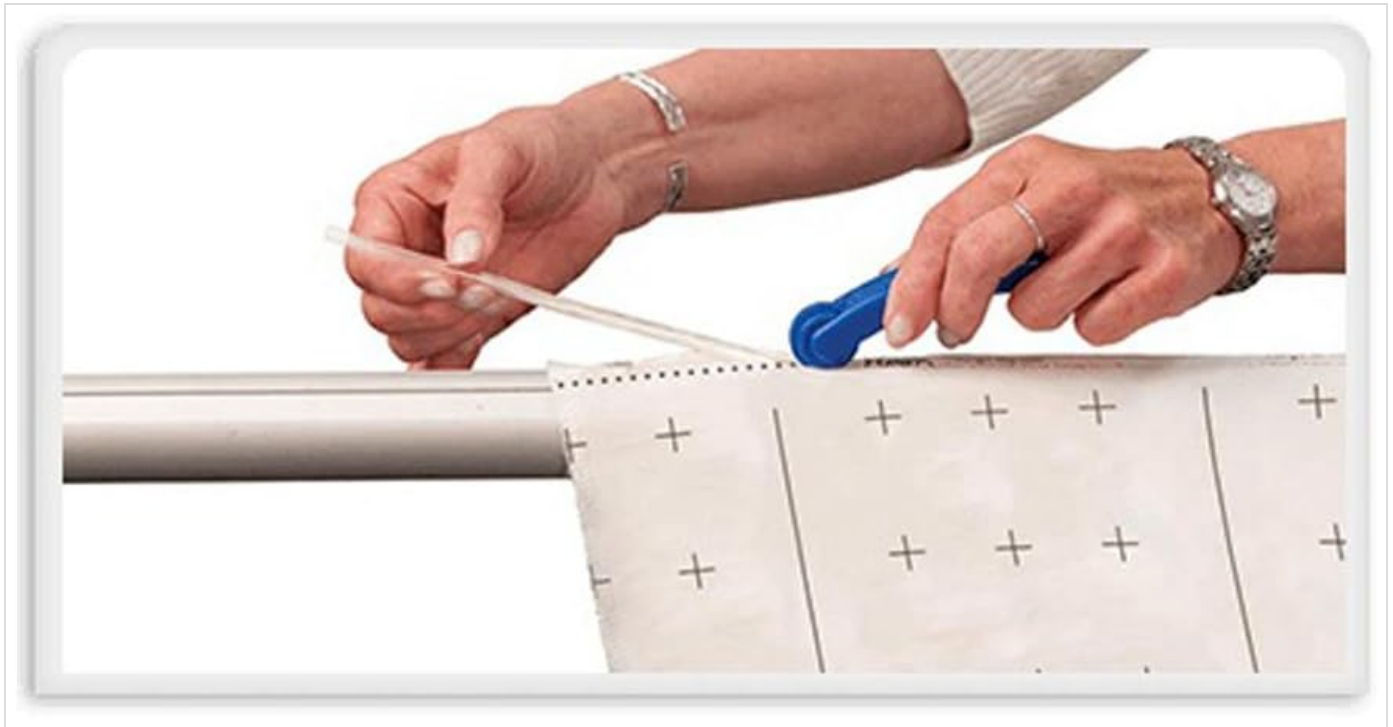

Image: A close-up view demonstrating how fabric is inserted into the tubing system of the EZ3 frame for a no-baste setup.

- **Achieving Tension:** Excellent front-to-back tension is achieved using the three 30-tooth ratchet wheels. Rotate the wheels to tighten or loosen the fabric as needed, ensuring a smooth and taut surface for quilting.

Image: A detailed view of the 30-tooth ratchet wheels on the EZ3 frame, illustrating their function in adjusting fabric tension with rotational arrows.

- **Adjusting Work Angle:** The work area can be tilted to four different angles to suit your comfort and quilting style. Adjustments are made easily using the frame's integrated knobs.

## Maintenance

---

To ensure the longevity and optimal performance of your Grace Start-Right EZ3 frame, follow these maintenance

guidelines:

- **Cleaning:** Wipe down the Baltic Birch plywood and aluminum components with a soft, dry cloth. For stubborn marks, a slightly damp cloth can be used, followed by immediate drying. Avoid harsh chemicals or abrasive cleaners.
- **Inspections:** Periodically check all knobs, bolts, and connections to ensure they remain tight. Re-tighten as necessary.
- **Storage:** When not in use, fold the EZ3 frame for space-saving storage. Store in a dry environment away from extreme temperatures or humidity to protect the wood and metal components.

---

## Troubleshooting

---

- **Frame Feels Wobbly:**
  - Ensure all assembly bolts and knobs are fully tightened.
  - Verify that the frame is placed on a level surface.
  - Check that the leg supports are correctly installed and locked into position.
- **Fabric Not Taut Enough:**
  - Confirm that the fabric is properly inserted into the tubing along all three rails.
  - Adjust the 30-tooth ratchet wheels to increase tension. Rotate them incrementally until desired tautness is achieved.
- **Difficulty Folding/Unfolding:**
  - Ensure all locking knobs are loosened before attempting to fold or unfold the frame.
  - Check for any obstructions or misaligned parts.
